SECTION 4 F	TIRST A	AID MEASURES	
First Aid Measures	S:		
Inhalation:		nptoms are experienced, move victim to fresh air and obtain medical advice.	
Ingestion:	Rinse mouth. Drink 1 or 2 glasses of water. If irritation or discomfort occurs, obtain medical advice immediately.		
Eye:		ot allow victim to rub eye(s). Flush with lukewarm, gently flowing water for 5 tes or until particle is removed. If irritation persists, obtain medical attention.	
Skin:	Wash	with soap and water. If irritation persists, obtain medical advice.	
Note to Physicians:	None

SECTION 6 ACC	IDENTAL RELEASE MEASURES	
Personal Precautions:	Avoid breathing dust.	
Environmental Precautions:	Do not wash away into sewer.	
Method for Cleaning Up:	Sweep slowly spilled powder on to paper, and carefully transfer into a waste container. Clean remainder with wet paper, wet cloth or a vacuum cleaner. If a vacuum cleaner is used, it must rate as a dust explosion-proof type. Fine powder can form explosive dust-air mixtures.	
SECTION 7 HAN	IDLING AND STORAGE	
Handling:	Avoid breathing dust. Use with adequate ventilation.	
Storage:	Keep out of the reach of children. Keep away from oxidizing materials.

SECTION 11 TOXICOLOGICAL INFORMATION - Continued The IARC evaluated carbon black as a Group 2B carcinogen, for which there is inadequate human Carcinogenicity: evidence, but sufficient animal evidence. The latter is based upon the development of lung tumors in rats receiving chronic inhalation exposure to powdered carbon black at levels that induce particle overload of the lung. However, there is a two-year inhalation study of a toner containing carbon black which demonstrated no association between toner exposure and tumor development in rats. Others: Muhle et al. reported pulmonary response upon chronic inhalation exposure in rats to a toner enriched in respirable-sized particles compared to commercial toner. No pulmonary change was found at 1 mg/m3 which is most relevant to potential human exposure. A minimal to mild degree of fibrosis was noted in 22% of the animals at 4 mg/m3, and a mild to moderate degree of fibrosis was observed in 92% of the animals at 16 mg/m3. These findings are attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lung for a prolonged interval. **SECTION 12 ECOLOGICAL INFORMATION** Mobility: Not available Persistence / Not available Degradability: Bioaccumulation: Not available **Ecotoxicity:** Not available Other Adverse Not available Effects: **SECTION 13** DISPOSAL CONSIDERATION Method of Disposal: DO NOT put toner or toner cartridge into fire; heated toner may cause severe burns. DO NOT shred a toner cartridge, unless dust-explosion preventing measures are taken. Finely dispersed particles form explosive mixtures in air. Disposal should be subject to federal, state or local laws. **SECTION 14** TRANSPORT INFORMATION UN #: None UN Shipping Name: None UN Classification: None
