SECTION 11: Toxicological information

Information on toxicological effects

Acute toxicity
Estimate: LD50 > 2000 mg/kg (Ingestion)

Skin corrosion/irritation
Estimate: Mild irritant

Serious eye damage/eye irritation
Estimate: Transient slight conjunctival irritation only.
Sensitization: Non-sensitizing

Germ cell mutagenicity: Ames Test (S. typhimurium, E. coli): Negative

Carcinogenicity: No data available

Reproductive Toxicity: No data available

STOT - single exposure: No data available

STOT - repeated exposure: Muhle et al. reported pulmonary response upon chronic inhalation exposure in rats to a toner enriched in respirable-sized particles compared to commercial toner. No pulmonary change was found at 1 mg/m³ which is most relevant to potential human exposure. A minimal to mild degree of fibrosis was noted in 22% of the animals at 4 mg/m³, and a mild to moderate degree of fibrosis was observed in 92% of the animals at 16 mg/m³. These findings are attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lung for a prolonged interval.

Aspiration hazard: No data available

Other Information: No data available

SECTION 12: Ecological information

Toxicity

Ecotoxicity effects
- Fish, 96h LC50 > 100 mg/l
- Crustaceans, 48h EC50 > 100 mg/l
- Algae, ErC50(0-72h) > 100 mg/l

Persistence and degradability: No data available

Bioaccumulative potential: No data available

Mobility in soil: No data available

Other adverse effects: No data available

SECTION 13: Disposal considerations

Waste treatment methods
DO NOT put toner or a toner container into fire. Heated toner may cause severe burns. DO NOT dispose of a toner container in a plastic crusher. Use a facility with dust explosion prevention measures. Finely dispersed particles form explosive mixtures with air. Dispose of in accordance with local regulations.
