SECTION 3  HAZARDS IDENTIFICATION

EU Classification: Not classified as dangerous.

Emergency Overview:
- Cyanish gray fine powder, slight plastic odor.
- Inhalation of excessive amount of manganese powder may cause cough, shortness of breath or pneumonitis.

Potential Health Effects and Symptoms:

Inhalation:
Inhalation of excessive amounts of manganese powder may cause cough, shortness of breath or pneumonitis.

Ingestion:
Low acute toxicity. Ingestion is a minor route of entry for intended use of this product.

Eye:
May cause transient slight irritation.

Skin:
May be non-irritant.

Chronic Effects:
Prolonged inhalation of excessive amounts of manganese powder may cause lung damage and nervous system effects. Normal use and handling of this product does not result in inhalation of excessive amounts of manganese powder.

Medical Conditions Generally known to be Aggravated by Exposure:
Not determined
SECTION 4 FIRST AID MEASURES

First Aid Measures:

Inhalation:
Remove victim to fresh air. Get medical attention if symptoms persist.

Ingestion:
Rinse mouth. Drink 1 or 2 glasses of water. If irritation or discomfort occurs, obtain medical advice immediately.

Eye:
Do not allow victim to rub eye(s). Flush with lukewarm, gently flowing water for 5 minutes or until particle is removed. If irritation persists, obtain medical attention.

Skin:
Wash with soap and water. If irritation persists, obtain medical advice.

Note to Physicians:
None

SECTION 5 FIRE FIGHTING MEASURES

Fire Fighting Measures:

Extinguishing Media:
CO₂, water, dry chemicals

Unsuitable Extinguishing Media:
None

Special Fire Fighting Procedures:
None

Unusual Fire and Explosion Hazards:
Can form explosive dust-air mixtures when finely dispersed in air.

Fire and Explosive Properties (See also Section 9):
Hazardous Combustion Products:
CO₂, CO

Other Properties:
Not available

SECTION 6 ACCIDENTAL RELEASE MEASURES

Personal Precautions:
Do not breathe dust. Wash thoroughly after handling.

Environmental Precautions:
Do not wash away into sewer.

Method for Cleaning Up:
Sweep slowly spilled powder on to paper, and carefully transfer into a waste container. Clean remainder with wet paper, wet cloth or a vacuum cleaner.
If a vacuum cleaner is used, it must rate as a dust explosion-proof type. Fine powder can form explosive dust-air mixtures.

SECTION 7 HANDLING AND STORAGE

Handling:
Do not breathe dust. Wash thoroughly after handling. Use with adequate ventilation. Minimize dust generation.

Storage:
Keep away from oxidizing materials.

Specific Uses:
Toner for electrophotographic apparatus.
For more information, please refer to the instruction of this product.

SECTION 11 TOXICOLOGICAL INFORMATION

Acute Toxicity:

Inhalation:

Not available

Ingestion:

Estimate: Rat, LD50 > 2000mg/kg

Eye:

Estimate: Rabbit, transient slight conjunctival irritation only.

Skin:

Estimate: Rabbit, non-irritant

Sensitization:

Not available

Mutagenicity:

Estimate: Ames Test (Salmonella typhimurium): Negative

Reproductive Toxicity:

Manganese and its inorganic compounds:

There is a study showing that prolonged inhalation of excessive amounts of manganese powder may cause adverse effects on the fertility of male workers. However, normal use and handling of this product, as intended, does not result in inhalation of excessive amounts of manganese powder.

Carcinogenicity:

Not available

Others:

Chronic effects:

Muhle et al. reported pulmonary response upon chronic inhalation exposure in rats to a toner enriched in respirable-sized particles compared to commercial toner. No pulmonary change was found at 1mg/m³ which is most relevant to potential human exposure. A minimal to mild degree of fibrosis was noted in 22% of the animals at 4mg/m³, and a mild to moderate degree of fibrosis was observed in 92% of the animals at 16mg/m³. These findings are attributed to "lung overloading", a generic response to excessive amounts of any dust retained in the lung for a prolonged interval.
