

ADVANCED SOLUTIONS FOR EDUCATION

Improve Course Development and Management

We need access to common forms like attendance sheets and permission slips, but storing updated paper versions is inconvenient and wastes space.

Our teachers use Google Docs to store class documents and coursework. We need to give them better access and the ability to print easily when needed.

Keeping students engaged requires the ability to create and update course materials. Is there an easier way to combine content from multiple sources into one integrated document?

Students benefit when we can provide supplemental information beyond the textbook, but we really need ways to cut down on all the scanning, printing, copying, and collating.

Each day, mobile device use becomes more commonplace and expected. Can we leverage this technology to access and print course documents from wherever we are working?

GET ADVANCED

Educators spend a good amount of time outside the classroom preparing materials and working with other faculty and assistants to make their classes as engaging and effective as possible.

Advances in modern technology have made some of these tasks easier, but there is still a fair amount of manual labor required. Teachers and administrators can be more effective when given access to tools that help them better collaborate and more easily prepare course materials.

Canon offers innovative solutions that make it simple to assemble custom educational materials and distribute them to colleagues, students, and students' parents.

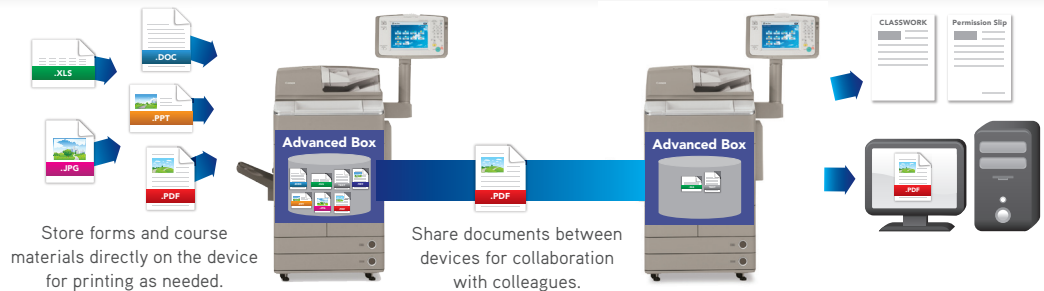

Assemble Customized Educational Materials with Ease

Teachers draw on many sources for course materials, including content from the Internet, PDF files, even scanned photographs or hard-copy originals. With imageRUNNER ADVANCE Desktop software, you can now easily collect and assemble these sources into compelling, integrated course materials.

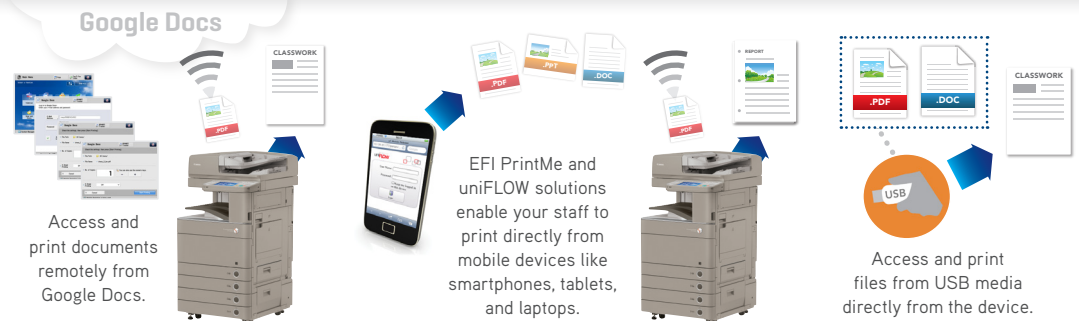

Store and Share Documents on Your Device

imageRUNNER ADVANCE devices offer Advanced Box, an integrated storage space for department, campus, and district-wide collaboration. You can share lesson plans and course materials with colleagues, or store common forms like permission slips and attendance sheets.

Easily Access, Print, and Share Course Materials from Wherever You Work

Canon mobile solutions make it easier for faculty to print from — and scan to — Google Docs through a simple MFP touchscreen interface. You can also print course materials from your mobile device through an app or by using a simple print request workflow via e-mail.
