How to Use Google Cloud Print

•Downloading the Printer Update Utility

Downloading the Printer Update Utility to your Computer

Follow the steps below to download the Printer Update Utility

1. [Click here](#) to go to the MG8220 **Drivers & Software** page on the website.
2. Select Your Operating System and version in the dropdown lists. (example below)

Drivers & Software

Select an Operating System and OS Version from the drop down menu below then click on a category to view the latest supported files for your product. Click on the file description to navigate to download, then click on "I Agree - Begin Download" to start downloading.

3. In the **Firmware** section, click the "**Printer Update Utility**" file. On the next screen, click "**I Agree – Begin Download**" and save the file to your computer's hard drive. Do not select the Run option when downloading.
4. Expand the download file.

On a **Mac OS X** computer, double-click the downloaded **.dmg** file to decompress it. The **Printer Update** folder will open.

On a **Windows** computer, double-click the downloaded **.exe** file to decompress it. A folder with the same name as the downloaded **.exe** file will be created. Double-click the folder to open it.

5. Proceed to the next step, "[Performing the Firmware Update](#)"
