

How to Use Google Cloud Print

How to Use Google Cloud Print

The machine is compatible with Google Cloud Print™ (Google Cloud Print is a service provided by Google Inc.).
By using Google Cloud Print, you can print from anywhere with applications or services supporting Google Cloud Print

Preparations for Printing with Google Cloud Print

To print with Google Cloud Print, you need to get Google account and register the machine with Google Cloud Print in advance

➡ Getting a Google Account

If you already have Google account, register the machine.

➡ Registering the Machine with Google Cloud Print

Printing with Google Cloud Print

When you send print data with Google Cloud Print, the machine receives the print data and prints it automatically if the machine is turned on.

When you print from the computer or smartphone with Google Cloud Print, load paper in advance.
