

# How to Start Google Cloud Print Manually

PIXMA MG6820

## When you want to print from Google Cloud Print immediately

When the printer cannot receive the print data, or you want to start printing immediately, you can check whether there is a print job on the Google Cloud Print and start printing manually.

Follow the steps below.

1. Make sure printer is turned on.
2. Flick HOME screen and tap  Setup.
3. Tap  **Web service inquiry**.

### ▶▶ Note

---

- If you have not registered the printer with Google Cloud Print, **Web service inquiry** is not displayed.
- 

4. Tap **Print from Google Cloud Print**.

The confirmation screen to check is displayed.

5. Tap **Yes**.

If there is print data, the printer receives the print data and prints it.
