TO THE OWNER

Before operating this projector, read this manual thoroughly and operate the projector properly. This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time. Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the “Trouble-shooting” section of the end of this booklet. If the problem still persists, contact the sales dealer where you purchased the projector or the service center.

!!! SAFETY PRECAUTIONS !!!

WARNING : TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

● This projector produces intense light from the projection lens. Do not stare directly into the lens as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam.

● This projector should be set in the way indicated. If not, it may result in a fire hazard.

● Take appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum distance should be taken. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.

● Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.

● If the projector is not to be used for an extended time, unplug the projector from the power outlet.

READ AND KEEP THIS OWNER’S MANUAL FOR LATER USE.
SAFETY INSTRUCTIONS

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Voor de klanten in Nederland

Bij dit product zijn batterijen geleverd. Wanneer deze leeg zijn, moet u ze niet weggooien maar inleveren als KCA.
Federal Communication Commission Notice
This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

For use in Germany
This product is intended for use in residential, commercial and light industry environment.

AC POWER CORD REQUIREMENT
The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:
  AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).
  AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

## TRADEMARKS

- Apple, Macintosh, and PowerBook are trademarks or registered trademarks of Apple Computer, Inc.
- IBM and PS/2 are trademarks or registered trademarks of International Business Machines, Inc.
- Windows and PowerPoint are registered trademarks of Microsoft Corporation.
- Each name of corporations or products in the owner's manual is a trademark or a registered trademark of its respective corporation.
This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. The projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

**Compact Design**
This projector is extremely compact in size and weight. It is designed to carry and work anywhere you wish to use.

**Compatibility**
This projector widely accepts various video and computer input signals including;
- **Computers**
  IBM-compatible and Macintosh computers up to 1280 x 1024 resolution.
- **6 Color Systems**
  NTSC, PAL, SECAM, NTSC 4.43, PAL-M or PAL-N color system can be connected.
- **Component Video**
  Component video signals, such as a DVD player output high definition TV signals including 480i, 480p, 575i, 575p, 720p, 1035i or 1080i, can be connected.
- **S-Video**
  S-Video signals, such as a S-VHS VCR output signals, can be connected.

**High Resolution Image**
This projector provides 800 x 600 dots resolution for computer input and 500 horizontal TV lines. The resolution from the computer between SVGA (800 x 600) and SXGA (1280 x 1024) is compressed into 800 x 600 dots. This projector cannot display image of over 1280 x 1024 dots. When the resolution of your computer is over than 1280 x 1024, reset the computer output for lower resolution.

**Multilanguage Menu Display**
Operation menu is displayed in; English, Deutsch, Français, Italiano, Español, or Japanese.

**Multi-Scan System**
This projector has Multi-Scan System to conform to almost all computer output signals quickly. There is no need for troublesome manual adjustment of frequency and other settings.

**One-Touch Auto Imaging**
Incoming computer video signals are recognized and the best setting is automatically selected by the Auto Image function. No complicated setup is necessary and projection is always precise.

**Digital Zoom (Computer Mode only)**
The Digital Zoom magnifies the image up to 16 times, allowing you to focus on crucial information at a presentation.

**Keystone Correction**
Positioning height of the projector may result in distorted images being displayed in a trapezoid shape. Keystone Correction solves this problem by digitally altering the projection to produce undistorted images.

**Power Management**
Power Management function is provided to reduce power consumption while the projector is not in use.
This Power Management function operates to turn the Projection Lamp off when the projector detects signal interruption and any button is not pressed over 5 minutes. The Projection Lamp is automatically turned on again when the projector detects the signal or any operation button is pressed.
This projector is shipped with this function ON.

**Wireless Mouse**
The Remote Control Unit supplied with this projector has Wireless Mouse function for the connected computer. This function enables you to operate both projector and computer with this Remote Control Unit only.
PREPARATION

NAME OF EACH PART OF THE PROJECTOR

FRONT OF THE CABINET
- PROJECTION LENS
- ZOOM RING
- FOCUS RING
- SPEAKER (Monaural)
- LENS COVER
- INFRARED REMOTE RECEIVER
- POWER CORD CONNECTOR

AIR INTAKE VENTS
(Both sides and Rear)
This projector is equipped with cooling fans for protection from overheating. Pay attention to the following to ensure proper ventilation and avoid a possible risk of fire and malfunction.
- Do not cover the vent slot.
- Keep sides and rear clear of any obstructions. Obstructions may block cooling air.

EXHAUST VENT
- HOT AIR EXHAUSTED!
Air blown from the exhaust vent is hot. When using or installing the projector, the following precautions should be taken.
- Do not put a flammable object near this vent.
- Keep the side grills at least 3’ (1m) away from any object, especially heat-sensitive object.
- Do not touch this area, especially screws and metallic parts. This area will become hot while the projector is used.

This projector detects the internal temperature and automatically controls the operating power of the Cooling Fans.

BACK OF THE CABINET
- TERMINALS AND CONNECTORS

BOTTOM OF THE CABINET
- LAMP COVER
- AIR INTAKE VENTS AND AIR FILTERS
- These Air Intake Vents should not be blocked.
- ADJUSTABLE FEET AND FEET LOCK LATCHES

This projector is equipped with cooling fans for protection from overheating. Pay attention to the following to ensure proper ventilation and avoid a possible risk of fire and malfunction.
- Do not cover the vent slot.
- Keep sides and rear clear of any obstructions. Obstructions may block cooling air.
This projector uses nominal input voltages of 100-120 V or 200-240 V AC. The projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system. Consult your authorized dealer or service station if you are not sure of the type of power supply being in use. Connect the projector with the peripheral equipment before turning the projector on. (Refer to pages 11 ~ 13 for connection.)

**CAUTION**

For safety, unplug the AC Power Cord when the appliance is not used. When this projector is connected to the outlet with the AC Power Cord, the appliance is in Stand-by Mode and consumes a little electric power.

**NOTE ON THE POWER CORD**

The AC Power Cord must meet the requirement of the country where you use the projector. Confirm the AC plug type with the chart below. The proper AC power cord must be used. If the supplied AC Power Cord does not match the AC outlet, contact your sales dealer.

<table>
<thead>
<tr>
<th>Projector side</th>

<td>For the U.S.A. and Canada Ground To the AC Outlet. (120 V AC)</td>
</tr>
</tbody>
</table>
POSITIONING THE PROJECTOR

- This projector is designed to project on a flat projection surface.
- The projector can be focused from 4.6’(1.4m) ~ 26.3’(8.0m).
- Refer to the figure below to adjust the screen size.

ROOM LIGHT
The brightness in the room has a great influence on the picture quality. It is recommended to limit ambient lighting in order to provide the best image.

ADJUSTABLE FEET

Picture tilt and projection angle can be adjusted by rotating the ADJUSTABLE FEET. Projection angle can be adjusted to 7.6 degrees.

1. Lift the front of the projector and pull the FEET LOCK LATCHES on both sides of the projector.
2. Release the FEET LOCK LATCHES to lock the ADJUSTABLE FEET and rotate the ADJUSTABLE FEET to fine tune the position and the tilt.
3. To shorten the ADJUSTABLE FEET, lift the front of the projector and pull and undo the FEET LOCK LATCHES.

The position and the keystone distortion of the image can be adjusted using the Menu Operation. (Refer to P 20, 28 and 30.)
When moving the projector, replace the lens cover and retract the feet to prevent damage to the lens and cabinet. When this projector is not in use for an extended period, put it into the case (carrying bag) supplied with this projector.

**CAUTION**

The Carrying Bag (supplied) is intended for protection from dust and scratches on the surface of the cabinet, and it is not designed to protect the LCD projector from external forces. Do not transport the projector through a courier or transport services with this bag. The projector can be damaged. When handling the projector, do not drop or bump the projector, subject it to strong forces or put other things on the cabinet.

**CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR**

- Do not drop or bump the projector, otherwise damages or malfunctions may result.
- When carrying the projector, use a suitable carrying case.
- Do not transport the projector by using a courier or transport service in an unsuitable transport case. This may cause damage to the projector. To transport the projector through a courier or transport service, consult your dealer for best way.
CONNECTIONS OF THE PROJECTOR

TERMINALS OF THE PROJECTOR

VIDEO INPUT JACKS (VIDEO/Y, Pb/Cb, Pr/Cr)
Connect the composite video output from the video equipment to the VIDEO/Y jack or connect the component video outputs to the Y/VIDEO, Pb/Cb and Pr/Cr jacks. (Refer to P12.)

RESET BUTTON
This projector uses a micro processor to control the unit. Occasionally, the micro processor may malfunction and need to be reset. This can be done by pressing the RESET button with a pen, which will shut down and restart the unit. Do not use the RESET function excessively.

AUDIO OUTPUT JACK (STEREO)
Connect an external audio amplifier to this terminal. (Refer to P12, 13.)

COMPUTER INPUT TERMINAL
Connect the computer output to this terminal. (Refer to P13.)

S-VIDEO INPUT JACK
Connect the S-VIDEO output from the video equipment to this terminal. (Refer to P12.)

AUDIO INPUT JACK
Connect the audio output from the video equipment to this terminal. (Refer to P12.)

COMPUTER AUDIO INPUT JACK
Connect the audio output from the computer to this terminal. (Refer to P13.)

CONTROL PORT CONNECTOR
When controlling the computer with the Remote Control of this projector, connect the mouse port of your personal computer to this terminal. (Refer to P13.)

COMPUTER INPUT TERMINAL
Terminal : HDB15-PIN
Connect the display output terminal of the computer to COMPUTER INPUT terminal of this projector with the VGA Cable (supplied). When connecting the Macintosh computer, the MAC Adapter (not supplied) is required.

Pin Configuration

| 1 | Red Input | 9 | No Connect |
| 2 | Green Input | 10 | Ground (Vert.sync.) |
| 3 | Blue Input | 11 | Sense 0 |
| 4 | Sense 2 | 12 | Sense 1 |
| 5 | Ground (Horiz.sync.) | 13 | Horiz. sync. |
| 6 | Ground (Red) | 14 | Vert. sync. |
| 7 | Ground (Green) | 15 | Reserved |

CONTROL PORT CONNECTOR
Terminal : DIN 8-PIN
Connect control port (PS/2, Serial or ADB port) on your computer to this terminal with the Control Cable (the Control Cable for PS/2 port is supplied).

Pin Configuration

| 1 | PS/2 | 2 | Serial | 3 | ADB |
| 1 | ----- | R X D | ----- |
| 2 | CLK | ----- | ADB |
| 3 | DATA | ----- | ----- |
| 4 | GND | GND | GND |

| 6 | ----- | T X D | ----- |
| 7 | GND | GND | GND |
| 8 | ----- | GND | GND |
CONNECTING TO THE VIDEO EQUIPMENT

Cables used for connection  (* = Cables are not supplied with this projector.)
- Video Cable (RCA x 1 or RCA x 3) *
- S-VIDEO Cable *
- Audio Cable (RCA x 2: Mini Plug x 1 (stereo) or Mini Plug (stereo)) *

Use any of VIDEO jack Y-Pb/Cb-Pr/Cr jacks or S-VIDEO jack.
- When both VIDEO jack and S-VIDEO jack are connected, the S-VIDEO jack has priority over the VIDEO jack.
- When both Y-Pb/Cb-Pr/Cr jacks and S-VIDEO jack are connected, the Y-Pb/Cb-Pr/Cr jacks has priority over the S-VIDEO jack.

NOTE : When connecting the cable, the power cords of both the projector and the external equipment should be disconnected from AC outlet. Turn the projector and peripheral equipment on before the computer is switched on.
CONNECTING TO THE COMPUTER

Cables used for connection ( asterisk = Cables are not supplied with this projector.)
- VGA CABLE (HDB 15 pin)
- CONTROL CABLE FOR PS/2 PORT
- CONTROL CABLE FOR SERIAL PORT, or ADB PORT asterisk
- MAC ADAPTER (When connecting to Macintosh computer) asterisk
- AUDIO CABLE (Mini Plug (stereo)) asterisk

NOTE:
When connecting the cable, the power cords of both the projector and the external equipment should be disconnected from AC outlet. Turn the projector and peripheral equipment on before the computer is switched on.

When connecting the cable, the power cords of both the projector and the external equipment should be disconnected from AC outlet. Turn the projector and peripheral equipment on before the computer is switched on.
OPERATION OF THE REMOTE CONTROL

Left Side

- **POWER ON-OFF BUTTON**
  Used to turn the projector on or off. (P19)

- **MENU BUTTON**
  Used to select MENU operation. (P17, 18)

- **SELECT BUTTON**
  Used to execute the item selected or to expand the image in DIGITAL ZOOM mode. (P28)
  It is also used as a PC mouse in Wireless Mouse Operation. (P34)

- **P-TIMER BUTTON**
  Used to operate P-TIMER function. (P21)

- **ALL-OFF SWITCH**
  When using the Remote Control Unit, turn this switch to “ON.” And turn it to “ALL OFF” when it is not used.

- **COMPUTER BUTTON**
  Used to select COMPUTER input source. (P22)

- **VIDEO BUTTON**
  Used to select VIDEO source. (P29)

- **RIGHT CLICK BUTTON**
  Used to compress the image in DIGITAL ZOOM mode. (P28)
  It is also used as a PC mouse in Wireless Mouse Operation. (P34)

- **POINT BUTTON**
  Used to move the pointer on the MENU, to adjust the item, or to pan the image in DIGITAL ZOOM mode. (P28)
  It is also used as a PC mouse in Wireless Mouse Operation. (P34)

* When pressing the center of this button, it works as the SELECT button.

Operating Range

Point the remote control toward the projector (the Remote Receiver) whenever pressing the buttons. Maximum operating range for the remote control is about 16.4’ (5m) and 60° in front of the projector.
Remote Control Batteries Installation

1. Remove the battery compartment lid.
2. Slide the batteries into the compartment.
3. Replace the compartment lid.

Two AA size batteries
For correct polarity (+ and -), be sure the battery terminals are in contact with the pins in the compartment.

To insure safe operation, please observe the following precautions:
- Use (2) AA, UM3 or R06 type alkaline batteries.
- Replace two batteries at the same time.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the Remote Control Unit to moisture, or heat.
- Do not drop the remote control unit.
- If batteries have leaked on the remote control, carefully wipe the case clean and load new batteries.
TOP CONTROLS AND INDICATORS

MENU BUTTON
Used to open or close the MENU operation. (P17, 18)

POINT BUTTONS
Used to select an item or adjust the value in the MENU. It is also used to pan the image in DIGITAL ZOOM mode. (P28)

WARNING TEMP. INDICATOR
This indicator flashes red when internal projector temperature is too high. (P35)

READY INDICATOR
This indicator lights green when the projector is ready to be turned on. And it flashes green in Power Management mode. (P33)

POWER ON-OFF BUTTON
Used to turn the projector on or off. (P19)

NORMAL BUTTON
Used to reset to normal picture adjustment preset by factory. (P26, 31)

SELECT BUTTON
Used to execute the item selected. It is also used to expand the image in DIGITAL ZOOM mode. (P28)

LAMP REPLACE INDICATOR
This indicator turns to yellow when the life of the projection lamp draws to an end. (P36)

LAMP INDICATOR
This indicator is dim when the projector is turned on. And bright when the projector is in stand-by mode.
OPERATING ON-SCREEN MENU

HOW TO OPERATE ON-SCREEN MENU

You can control and adjust this projector through the ON-SCREEN MENU. Refer to the following pages to operate each adjustment in the ON-SCREEN MENU.

1 MOVING THE POINTER
Move the pointer (see the NOTE below) by pressing POINT button(s) on the TOP CONTROL or the REMOTE CONTROL.

2 SELECT THE ITEM
Select the item by pressing SELECT button.

NOTE: Pointer is the icon on the ON-SCREEN MENU to select the item. See the figures on the section "FLOW OF ON-SCREEN MENU" below.

FLOW OF ON-SCREEN MENU

Display ON-SCREEN MENU
1 Press MENU button to display the ON-SCREEN MENU (MENU BAR). The red frame is the POINTER.

Select the Item
2 Move the POINTER (red frame) to the ITEM ICON that you want to select by pressing POINT RIGHT/LEFT buttons.
3 Select the ITEM by pressing SELECT button. The dialog box of the ITEM appears.

Control and adjust through ON-SCREEN MENU
4 Move the POINTER downward by pressing POINT DOWN button. (The shape of the POINTER becomes an arrow.)
5 Move the POINTER to the ITEM that you want to adjust and adjust the ITEM by pressing SELECT button. Refer to the following pages for details of respective adjustments.
BEFORE OPERATION

MENU BAR

MENU BAR IN COMPUTER MODE

Press MENU BUTTON while in Computer mode.

SYSTEM MENU
Used to select a computer system. (Refer to P22)

MODE MENU
Used to select the Computer input mode. (Refer to P22)

AUTO IMAGE MENU
Used to adjust Fine sync, Total dots, and Picture Position automatically. (Refer to P27)

PC ADJUST MENU
Used to adjust the parameters to match with the input signal format. (Refer to P24, 25)

SETTING MENU
Used to adjust Volume, set the Display Menu and reset Lamp Replacement Monitor Timer. (Refer to P32, 33)

LANGUAGE MENU
Used to select the language used in the MENU. (Refer to P33)

IMAGE MENU
Used to adjust the computer image. [Fine sync / Total dots / White Balance / Contrast / Brightness / Gamma] (Refer to P26)

POSITION MENU
Used to adjust the position of the image. (Refer to P27)

SCREEN MENU
Used to adjust the size of the image or to correct the Keystone distortion. (Refer to P28)

MENU BAR IN VIDEO MODE

Press MENU BUTTON while in Video mode.

MODE MENU
Used to select the Video input. (Refer to P29)

IMAGE MENU
Used to adjust the picture image. [Color / Tint / White Balance / Contrast / Brightness/ Sharpness / Gamma] (Refer to P31)

VIDEO SOURCE MENU
Used to select a video source among [Video, S-Video, and Y, Pb/Cb, Pr/Cr]. (Refer to P29)

SYSTEM MENU
Used to select a color system of the selected video source. (Refer to P30)

SCREEN MENU
Used to set the size of the image either Regular or Wide, or to correct the Keystone distortion. (Refer to P30)

Same function as the Computer Mode.
BASIC OPERATION

TURNING ON THE PROJECTOR

1. Complete the peripheral connections (with Computer, VCR, etc.) before turning on the projector. (Refer to "CONNECTING TO THE PROJECTOR" on Pages 11~13 for connecting that equipment.)

2. Connect the projector's AC Power Cord into a wall outlet. The LAMP indicator lights RED, and the READY indicator lights GREEN.

3. Press the power ON-OFF button on the Remote Control Unit or on the Top Control to ON. The LAMP indicator dims, and the Cooling Fans start to operate. The Preparation Display appears on the screen and the count-down starts. The signal from the source appears after 30 seconds.

TURNING OFF THE PROJECTOR

1. Press the power ON-OFF button on the Remote Control Unit or on the Top Control, and the message "Power off?" appears on the screen.

2. Press the power ON-OFF button again to turn off the projector. The LAMP indicator lights bright and the READY indicator turns off. The Cooling Fans operate for 90 seconds after the projector is turned off. (During this "Cooling Down" period, this appliance cannot be turned on.)

3. When the projector has cooled down, the READY indicator turns to green again and you can turn the projector on. After cooling down completely, disconnect the AC power cord.

TO MAINTAIN THE LIFE OF THE LAMP, ONCE YOU TURN THE PROJECTOR ON, WAIT AT LEAST 5 MINUTES BEFORE TURNING IT OFF.

NOTE: The Cooling Fan may work for cooling while the projector is turned off. When the Cooling Fan is working, WARNING TEMP. INDICATOR flashes red.

When the Power Management function is ON, the Projector detects the signal interruption and turns the Projection Lamp off automatically. Refer to “Power Management” on page 33.

When WARNING TEMP. indicator flashes red, the projector is automatically turned off. Wait at least 5 minutes before turning the projector on again.

When WARNING TEMP. indicator continues to flash, follow procedures below:

1. Press the power ON-OFF button to turn off the projector and disconnect the AC power cord from the AC outlet.
2. Check the air filters for dust accumulation.
3. Clean the Air Filter. (See "AIR FILTER CARE AND CLEANING" section on page 35.)
4. Press the power ON-OFF button to turn it on.

If WARNING TEMP. indicator should still continue to flash, contact the sales dealer where you purchased this projector or service center.

NOTE: The Cooling Fan may work for cooling while the projector is turned off. When the Cooling Fan is working, WARNING TEMP. INDICATOR flashes red.
ADJUSTING THE IMAGE

ZOOM ADJUSTMENT

Turn the ZOOM RING to adjust the projected picture size. Turn the ring to “WIDE” direction to make the image larger, and turn to “TELE” direction to make the image smaller.

FOCUS ADJUSTMENT

Turn the FOCUS RING to adjust the projected picture focus.

KEYSTONE ADJUSTMENT

If the picture has keystone distortion, correct image with KEYSTONE adjustment.

1. Press the KEYSTONE ▲▼ button on the Remote Control Unit or select the Keystone on SCREEN MENU. (Refer to page 28, 30.) The message “Keystone” is displayed.

2. Correct the Keystone distortion by pressing the KEYSTONE ▲▼ button or the POINT UP/DOWN button(s). Press the KEYSTONE ▲ button or the POINT UP button to reduce the upper part or the image, and press the KEYSTONE ▼ button or the POINT DOWN button to reduce the lower part.

The message disappears after 4 seconds.
BASIC OPERATION

NO SHOW FUNCTION

Press the NO SHOW button on the Remote Control Unit to black out the image. This function is cancelled when the NO SHOW button is pressed again or any other function button is pressed.

The message disappears after 4 seconds.

PICTURE FREEZE FUNCTION

Press the FREEZE button on the Remote Control Unit to freeze the picture on-screen. This function is cancelled when the FREEZE button is pressed again or any other function button is pressed.

P-TIMER FUNCTION

Press the P-TIMER button on the Remote Control unit. The timer display “00 : 00” appears on the screen and the timer starts to count the time (00 : 00 ~ 59 : 59). To stop the P-TIMER, press the P-TIMER button. And then, press the P-TIMER button again to cancel the P-TIMER function.

SOUND ADJUSTMENT

SOUND VOLUME ADJUSTMENT

Press the VOLUME (+/−) button on the Remote Control Unit to adjust the volume. The Volume dialog box appears on the screen for a few seconds. The VOLUME (+) button increases the volume, and the VOLUME (−) button decreases the volume. The sound volume can be adjusted through the ON-SCREEN MENU. (Refer to page 32.)

SOUND MUTE ADJUSTMENT

Press the MUTE button on the Remote Control Unit to mute the sound. To restore the sound to its previous level, press the MUTE button again or press the VOLUME (+/−) button. The sound mute can be set through the ON-SCREEN MENU. (Refer to page 32.)
COMPUTER MODE

SELECTING COMPUTER MODE

DIRECT OPERATION

Select COMPUTER mode by pressing the MODE button on the Top Control or the COMPUTER button on the Remote Control Unit.

MENU OPERATION

Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select Computer and press the SELECT button.

CURRENT MODE DISPLAY

When selecting the Computer Mode, the Current Mode display appears. It shows the information of the computer of the mode selected.

SELECTING COMPUTER SYSTEM

AUTOMATIC MULTI-SCAN SYSTEM

This projector automatically tunes to most different types of computers based on VGA, SVGA, XGA or SXGA (refer to “COMPATIBLE COMPUTER SPECIFICATION” on page 23). When selecting Computer, this projector automatically tunes to the incoming signal and projects the proper image without any special settings. (Setting of the Computer System may be required when connecting some computers.)

Note: The projector may display one of the following messages.

Go to PC adj. The projector cannot discriminate or detect the input signal from the computer. Adjust and set the computer system manually. (Refer to page 24.)

No signal There is no signal input from the computer. Make sure the connection of the computer and the projector is set correctly. (Refer to TROUBLESHOOTING on page 37.)

SELECT COMPUTER SYSTEM MANUALLY

To set the Computer system manually, select the mode on the ON-SCREEN MENU.

1 Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select SYSTEM and press the SELECT button. Another dialog box SYSTEM MENU will appear.

2 Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to the system that you want to set, and then press SELECT button.
COMPATIBLE COMPUTER SPECIFICATIONS

Basically this projector can accept the signal from all computers with the V, H-Frequency below mentioned and less than 100 MHz of Dot Clock.

NOTE : Specifications are subject to change without notice.
This Projector can automatically tune to the display signals from most personal computers currently distributed. However, some computers employ special signal formats which are different from the standard ones and may not be tuned by the Multi-Scan system of this projector. If this happens, the projector cannot reproduce a proper image and the image may be recognized as a flickering picture, a non-synchronized picture, a non-centered picture or a skewed picture.

This projector has a PC ADJUSTMENT function, to enable you to precisely adjust several parameters to match with those special signal formats. This projector has five independent memory areas to memorize those parameters manually adjusted. This enables you to recall the setting for a specific computer whenever you use it.

Note: This PC ADJUSTMENT function cannot be operated when “RGB,” “HDTV1035i” or “HDTV1080i” is selected on the SYSTEM MENU (P22 and 23).

1 Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT RIGHT/LEFT buttons to select PC ADJUST and press the SELECT button. Another dialog box “Where to reserve” MENU will appear.

2 In this dialog box, you can store the parameter into the area from “Mode 1” to “Mode 5.” When memorizing the new computer parameter, select the Mode with the message “Free” by pressing the POINT UP/DOWN buttons and the SELECT button. To change the parameters of the Mode previously set, select the Mode with “Stored.”

3 When the Mode is selected, Parameter adjustment dialog box appears. Move the arrow to the item that you want to change by pressing the POINT UP/DOWN buttons, and adjust each item to match with your computer. To change the value, press either the POINT RIGHT / LEFT button. Refer to the next page for adjusting each item.

4 Move the arrow to “Stored” and press the SELECT button. The parameter is memorized in the selected Mode.

5 To activate the Mode manually adjusted in this PC ADJUSTMENT MENU, select the Mode at the SYSTEM SELECT MENU. (Refer to page 22.)

Press the SELECT button to set Full screen function on/off.

Press the POINT RIGHT/LEFT button(s) to adjust the value.
Total lines
The number of the total vertical lines. Adjust the number to match the image of your personal computer.

Total dots
The number of the total dots in one horizontal period. Adjust the number to match the image of your personal computer.

Horizontal / Vertical
Adjustment of the horizontal or vertical picture position. When the image is not centered on the screen, adjust each of those items.

Clamp
Adjustment of the clamp level. When the image has a dark bar(s), try this adjustment.

Display area
Adjustment of the area displayed with this projector. Select the resolution at the Display area dialog box, or adjust the number at the column of “H” or “V” to match the resolution of the image.

Full Screen
Set “On” to resize the image with 4 x 3 aspect ratio to fit the screen.

Each of the keys operates as follow.

- **Reset**  ··· Recalls the parameter data that was previously adjusted.
- **Mode free**  ··· Clears the parameter data previously set.
- **Stored**  ··· Stores the parameters in the memory.
- **Quit**  ··· Closes the PC ADJUST MENU.
COMPUTER MODE

PICTURE IMAGE ADJUSTMENTS

ADJUST PICTURE IMAGE MANUALLY

1. Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select IMAGE and press the SELECT button. Another dialog box IMAGE MENU will appear.

2. Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to the item that you want to change by pressing the POINT UP/DOWN buttons. To change the value, press either the POINT RIGHT button or the POINT LEFT button.

   **Fine sync**
   Adjust the picture as necessary to eliminate flicker from the display. (From 0 to 255.)

   **Total dots**
   The number of the total dots in one horizontal period. Adjust the number to match your PC image.

   **White balance (Red / Green / Blue)**
   Move the arrow to the color that you want to adjust. Press POINT LEFT button to lighten the color and press POINT RIGHT button to deepen the color. (From 0 to 63.)

   **Contrast**
   Press POINT LEFT button to decrease contrast, and press POINT RIGHT button to increase contrast. (From 0 to 63.)

   **Brightness**
   Press POINT LEFT button to adjust the image darker, and press POINT RIGHT button to adjust brighter. (From 0 to 63.)

   **Gamma**
   Press either POINT LEFT button or POINT RIGHT button to obtain better balance of contrast. (From 0 to 16.)

Each of the keys operates as follow.

- **Reset** — Recalls the data previously adjusted.
- **Stored** — Stores the adjusted data in the memory.
- **Quit** — Closes the PICTURE IMAGE ADJUSTMENT MENU.

NOTE: The Fine sync and the Total dots cannot be fully adjusted when “RGB,” “HDTV1035i” or “HDTV1080i” is selected on the SYSTEM MENU (P22 and 23).

NORMAL FUNCTION

The normal picture level is preset on this projector at the factory and can be restored anytime you press the NORMAL button (located on the Top Control or on the Remote Control Unit). The “Normal” display will be displayed on the screen for a few seconds.
COMPUTER MODE

AUTO IMAGE FUNCTION

The Auto Image function is provided to automatically adjust Fine sync, Total dots, and Picture Position for most computers.

1 Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select AUTO IMAGE and press the SELECT button. Another dialog box AUTO IMAGE MENU will appear.

2 Move the arrow to an item that you want to adjust by pressing the POINT UP/DOWN button. Change the setting On or Off by pressing the SELECT button.

**Fine sync**
Adjust the picture as necessary to eliminate flicker from the display. This item can be adjusted manually. (Refer to page 26.)

**Total dots**
The number of the total dots in one horizontal period. This item can be adjusted manually. (Refer to page 26.)

**Position**
Adjustment of the position of the image. This item can be adjusted manually. (Refer to page 27.)

3 Move the arrow to “Go!” and press the SELECT button to start the Auto Image function. This adjustment can be executed by pressing AUTO IMAGE button on the Remote Control Unit.

- **Stored** Stores the On/Off setting of each item.
- **Go!** Starts the Auto Image Function.
- **Quit** Closes the AUTO IMAGE MENU.

**NOTE:** The Fine sync and the Total dots cannot be fully adjusted when “RGB,” “HDTV1035i” or “HDTV1080i” is selected on the SYSTEM MENU (P22 and 23). The Fine sync, Total dots, and Picture Position of some computers may not be fully adjusted with the Auto Image Function. In that case, manual adjustment is required to make fine image. (Refer to page 26 to adjust “Fine sync” or “Total dots” and page 27 to adjust Picture Position.)

PICTURE POSITION ADJUSTMENT

The position of the image can be adjusted vertically and horizontally through PICTURE POSITION ADJUSTMENT.

1 Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select POSITION and press the SELECT button. The PICTURE POSITION DIALOG BOX will appear.

2 Move the image by pressing the POINT UP / DOWN / RIGHT / LEFT buttons.

To cancel PICTURE POSITION ADJUSTMENT, press any button except POINT buttons. To return to the position previously set, press NORMAL button.
This projector has a picture screen resize function, which enables you to display the desirable image size.

1. Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select SCREEN and press the SELECT button. Another dialog box SCREEN MENU will appear.

2. Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to the function that you want to select and then press SELECT button.

**True**

To make the image into its original size select True in the dialog box. When the original image size is larger than the screen size (800 x 600), this projector enters Digital Zoom mode automatically.

**Keystone**

When the image is distorted vertically, select Keystone in the dialog box. The ON-SCREEN MENU and SCREEN MENU disappears and the message “Keystone” is displayed. Correct the Keystone distortion by pressing the KEYSTONE ▲/▼ button or the POINT UP/DOWN button(s). Refer to KEYSTONE ADJUSTMENT on page 20.

**Digital Zoom**

To adjust the image size or pan the image, select Digital zoom in the dialog box. The ON-SCREEN MENU and SCREEN MENU disappears and the message “D. Zoom” is displayed. This projector also enters Digital Zoom mode by pressing the D.ZOOM ▲/▼ button on the Remote Control Unit.

**Expand function**

To expand the image size, press the D.ZOOM ▲ button or the SELECT button. The image is magnified by degrees.

**Compress function**

To compress the image size, press the D.ZOOM ▼ button or the RIGHT CLICK button. The size of image is reduced by degrees.

**Panning function**

To pan the image, press the POINT UP/DOWN/LEFT/RIGHT buttons. Panning function can work only when the image is larger than the screen size.

To cancel Digital Zoom mode, press any button except D.ZOOM ▲/▼, SELECT, RIGHT CLICK, or POINT button. To adjust the image to 800 x 600, press NORMAL button.

- This projector cannot display any resolution higher than 1280 X 1024. If your computer’s screen resolution is higher than 1280 X 1024, reset the resolution to the lower before connecting the projector.
- The image data in other than SVGA (800 x 600) is modified to fit the screen size in the initial mode.
- The normal “Panning Operation” may not function properly if the computer system prepared with the “PC Adjust” is used.
VIDEO MODE

SELECTING VIDEO MODE

DIRECT OPERATION

Select VIDEO mode by pressing the MODE button on the Top Control or the VIDEO button on the Remote Control Unit.

MENU OPERATION

Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select Video and press the SELECT button.

SELECTING VIDEO SOURCE

This projector automatically detects the signal from the VIDEO INPUT JACK(s) or the S-VIDEO INPUT JACK. When those jacks are connected at the same time, select the type of Video source in VIDEO SOURCE MENU.

1. Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select VIDEO SOURCE and press the SELECT button. Another dialog box VIDEO SOURCE MENU will appear.

2. Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to the source that you want to select, and then press the SELECT button.

Auto

The projector automatically detects the incoming Video source, and adjusts itself to optimize its performance.

- When both VIDEO jack and S-VIDEO jack are connected, the S-VIDEO jack has priority over the VIDEO jack.
- When both Y-Pb/Cb-Pr/Cr jacks and S-VIDEO jack are connected, the Y-Pb/Cb-Pr/Cr jacks have priority over the S-VIDEO jack.

Video / S-Video / Y, Pb/Cb, Pr/Cr

When the VIDEO INPUT JACK(s) and the S-VIDEO INPUT JACK are connected at the same time, or if the projector cannot chose the proper video source, it is necessary to select a specific video source among Video, S-VIDEO and Y, Pb/Cb, Pr/Cr.
SELECTING COLOR SYSTEM

1 Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select SYSTEM and press the SELECT button. Another dialog box SYSTEM MENU will appear.

2 Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to “Auto”, and then press the SELECT button.

When the Video signal is from the VIDEO or the S-VIDEO JACK

**Auto**
The projector automatically detects the incoming Video system, and adjusts itself to optimize its performance. When the Video System is PAL-M or PAL-N, select the system manually.

**PAL / SECAM / NTSC / NTSC4.43 / PAL-M / PAL-N**
If the projector cannot reproduce the proper video image, it is necessary to select a specific broadcast signal format among PAL, SECAM, NTSC, NTSC 4.43, PAL-M, and PAL-N.

When the Video signal is from the Y, Pb/Cb, Pr/Cr JACKS

**Auto**
The projector automatically detects the incoming Video signal, and adjusts itself to optimize its performance.

**COMPONENT VIDEO SIGNAL FORMAT**
If the projector cannot reproduce the proper video image, it is necessary to select a specific component video signal format among 480i, 575i, 480p, 575p, 720p, 1035i and 1080i.

PICTURE SCREEN ADJUSTMENT

This projector has a picture screen resize function, which enables you to display the desirable image size.

1 Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select SCREEN and press the SELECT button. Another dialog box SCREEN MENU will appear.

2 Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to the screen size that you want to set, and then press the SELECT button.

**Regular**
Normal Video Image size with 4 x 3 aspect ratio.

**Wide**
Resizes the image for wide screen size with 16 x 9 aspect ratio.

**Keystone**
When the image is distorted vertically, select Keystone in the dialog box. Correct the Keystone distortion by pressing KEYSTONE ▲/▼ button or POINT UP/DOWN button(s). Refer to KEYSTONE ADJUSTMENT on page 20.
PICTURE IMAGE ADJUSTMENT

ADJUSTING THE PICTURE IMAGE

1. Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select IMAGE and press the SELECT button. Another dialog box IMAGE MENU will appear.

2. Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to the item that you want to adjust by pressing the POINT UP/DOWN buttons. To change the value, press either the POINT RIGHT button or the POINT LEFT button.

**Color**
Press POINT LEFT button to lighten the image, and press POINT RIGHT button to deepen the image. (From 0 to 63.)

**Tint**
Press POINT LEFT button to increase purple, and press POINT RIGHT button to increase green. (From 0 to 63.)

**White balance (Red / Green / Blue)**
Move the arrow to the color that you want to adjust. Press POINT LEFT button to lighten the color, and press POINT RIGHT button to deepen the color. (From 0 to 63.)

**Contrast**
Press POINT LEFT button to decrease contrast, and press POINT RIGHT button to increase contrast. (From 0 to 63.)

**Brightness**
Press POINT LEFT button to darken the image, and press POINT RIGHT button to brighten the image. (From 0 to 63.)

**Sharpness**
Press POINT LEFT button to soften the image, and press POINT RIGHT button to sharpen the image. (From 0 to 15.)

**Gamma**
Press either POINT LEFT button or POINT RIGHT button to obtain better balance of contrast. (From 0 to 16.)

Each of the keys operates as follow.

- **Reset** ••• Recalls the data previously adjusted.
- **Stored** ••• Stores the data in the memory.
- **Quit** ••• Closes the PICTURE IMAGE ADJUSTMENT MENU.

NORMAL FUNCTION

The normal picture level is preset on this projector at the factory and can be restored anytime you press the NORMAL button (located on the Top Control or on the Remote Control Unit). The "Normal" display will be displayed on the screen for a few seconds.
SETTNG

1 Press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select SETTING and press the SELECT button. Another dialog box SETTING MENU will appear.

2 Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to the item that you want to set, and then press the SELECT button to set it "On" or "Off" or press the POINT LEFT/RIGHT button to adjust the value.

**Setting Menu**

**Volume**
Press POINT LEFT button to decrease volume, and press POINT RIGHT button to increase the volume. (From 0 to 63.) The sound volume can be also adjusted by pressing the VOLUME (+/-) button on the remote control unit. (Refer to page 21)

**Mute**
Set "On" to mute the sound. To restore the sound, set "Off" or press the MUTE button or the VOLUME (+/-) button on the remote control unit.

The mute can be also set by pressing the MUTE button on the remote control unit. (Refer to page 21)

**Blue back**
When this function is "On," this projector will produce a blue image instead of the video noise on the screen when the input source is unplugged or turned off.

**Display**
This function decides whether to display the On-Screen Displays (except ON-SCREEN MENU).
Set "On1" to show all the On-Screen Displays.
Set "On2" to show the On-Screen Displays except the Preparation Display (Our Logo).
Set "Off" to set the On-Screen Displays below disappeared.

- Preparation Display (Our Logo and the Number-counting-down Display)
- Mode Display (Computer / Video)
- Volume/Mute Displays
- Normal Display
- No show Display
- Keystone Display
- True Display
- D.Zoom Display

**Ceiling**
When this function is "On," the top / bottom and the left / right reversed picture is provided to project the image from a ceiling mounted projector.

**Rear**
When this function is "On," the left / right reversed picture is provided to project the image to a rear projection screen.
**Power management**

This function turns the Projection Lamp off when the projector detects signal interruption and the projector is not used for a certain period in order to reduce power consumption and maintain the Lamp-life. (This projector is shipped with this function ON.)

Power Management function operates to turn the Projection Lamp off when the input signal is interrupted and the projector is not operated over 5 minutes. This function operates as follows:

1. When the signal is interrupted, “No signal” and the counting down (5 minutes) display appears.
2. When the Projection Lamp turned off, the READY indicator turns off. The Cooling Fans operate for 90 seconds after the Projection Lamp is turned off. (During this “Cooling Down” period, the Lamp cannot be turned on.)
3. When the Lamp has cooled down, the READY indicator flashes and the Lamp can be turned on again (Power Management mode).

In this Power Management mode, the Projection Lamp is automatically turned on when the input signal connected or the projector is operated with any button on the Top Control or the Remote Control.

**Lamp age**

The Lamp age function is designed to reset the lamp replacement monitor timer. When replacing the lamp, reset the lamp replacement monitor timer by using this function. (Refer to page 36.)

---

**SELECTING LANGUAGE**

The language used in the ON-SCREEN MENU is selectable from among English, German, French, Italian, Spanish and Japanese.

1. Press the MENU button and the ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to select LANGUAGE and press the SELECT button. Another dialog box LANGUAGE MENU will appear.

2. Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to the language that you want to set, and then press the SELECT button.
OPERATING WIRELESS MOUSE

The Wireless Remote Control Unit is not only able to operate the projector but also usable as a wireless mouse for most Personal Computers. The POINT buttons and the two CLICK buttons are used for the wireless mouse operation.

The wireless mouse is available only when PC mouse pointer is displayed on the screen. When the ON-SCREEN MENU or the indicator of the projector is displayed on the screen instead of the PC mouse pointer, the wireless mouse cannot be used.

INSTALLATION

To use the Wireless Remote Control Unit as the Wireless Mouse for a Personal Computer, installation of the mouse driver (not supplied) is required. Make sure that the mouse driver is properly installed in your computer. And make sure that the mouse port of the computer connected to Control Port is activated.

1. Connect the mouse port of your computer to the Control Port of the projector with the Control Cable. (Refer to page 11 to 13 for connection.)

2. Turn the projector on first, and then turn on your computer. When the computer is switched on first, the Wireless Mouse may not work properly.

Note: When the computer has no mouse port, connect the Serial Port of the computer to Control Port of the projector with the Control Cable for Serial Port.

OPERATING WIRELESS MOUSE

When controlling the pointer of the computer, operate the Wireless Mouse with POINT button, SELECT button, and RIGHT CLICK button on the Wireless Remote Control Unit.

POINT button

Used to move the pointer. The pointer is moved corresponding with the direction you are pressing.

SELECT (LEFT CLICK) button

This button has the same function as the left button in a PC mouse.

RIGHT CLICK button

This button has the same function as the right button in a PC mouse.
APPENDIX

MAINTENANCE

WARNING TEMP. INDICATOR

WARNING TEMP. Indicator flashes red when the internal temperature of the projector exceeds the normal temperature. The Indicator stops flashing when the temperature of the projector returns to normal. When WARNING TEMP. Indicator continues to flash, check the items listed below.

1. The Ventilation slots of the projector may be blocked. In such an event, reposition the projector so that the ventilation slots are not obstructed.

2. Air filters may be clogged with dust particles. Clean the air filters by following the section AIR FILTER CARE AND CLEANING below.

3. If WARNING TEMP. Indicator remains on after performing the above checks, the Cooling Fans or the Internal Circuits may be malfunctioning. Contact service personnel from an authorized dealer or service station.

AIR FILTER CARE AND CLEANING

The Removable Air Filters prevent dust from accumulating on the surface of the Projection Lens and the Projection Mirror. Should the Air Filters become clogged with dust particles, it will reduce the Cooling Fans’ effectiveness and may result in internal heat build up and adversely affect the life of the projector.

Clean the Air Filters following the steps below:

1. Turn the power off, and disconnect the AC power cord from the AC outlet.

2. Turn the projector upside down and remove two Air Filters (Large and Small) by pulling the latches upward.

3. Clean the Air Filters with brush or wash out the dust and particles.

4. Replace each Air Filter properly. Make sure that the Air Filters are fully inserted.

CAUTION
Do not operate the projector with the Air Filter removed. Dust may accumulate on the LCD Panel and the Mirror degrading picture quality. Do not put small parts into the Air Intake Vents. It may result in malfunction of the projector. The Air Filter is a small part. Ensure that children don’t eat or swallow it.

RECOMMENDATION
We recommend avoiding dusty/smoky environments when operating the projector. Usage in these environments may cause poor image quality.

When using under dusty or smoky conditions, dust may accumulate on the liquid crystal panel, lens, or optical elements inside it. This condition may degrade the quality of the projected image. When the above symptoms are noticed, contact your authorized dealer or service station for proper cleaning.

CLEANING THE PROJECTION LENS

Follow these steps to clean the projection lens:

1. Apply a non-abrasive camera lens cleaner to a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents or other harsh chemicals might scratch the lens.

2. Lightly wipe the cleaning cloth over the lens.

3. When the projector is not in use, replace the lens cover.
LAMP REPLACEMENT

When the life of the Lamp of this projector draws to an end, the LAMP REPLACEMENT indicator lights yellow. When the image becomes dark or the color of the image becomes unnatural, replacement of the Lamp is required.

CAUTION

● For continued safety, replace with a lamp assembly of the same type.
● Allow the projector to cool for at least 45 minutes before you open the lamp cover. The inside of the projector can become very hot.
● Do not drop the lamp assembly or touch the glass bulb! The glass can shatter and may cause injury.

Follow these steps to replace the lamp assembly.

1. Turn off the projector and disconnect the AC plug. Allow the projector to cool for at least 45 minutes.
2. Remove the screw with a screwdriver and remove the Lamp Cover.
3. Remove the two screws with a screwdriver and pull out the Lamp Assembly by grasping the handle.
4. Replace the Lamp Assembly with a new one and tighten the two screws. Make sure that the Lamp Assembly is set properly.
5. Replace the Lamp Cover and tighten the screw.
6. Connect the AC Power Cord to the projector and turn the projector on.

NOTE: Do not reset the LAMP REPLACEMENT MONITOR TIMER when the lamp is not replaced.

ORDER REPLACEMENT LAMP

Replacement Lamp can be ordered through your dealer. When ordering the Lamp, give the following information to the dealer.

● Model No. of your projector : LV-5100
● Replacement Lamp Type No. : LV-LP09 (610 285 2912)

LAMP REPLACEMENT MONITOR TIMER

Be sure to reset the Lamp Replacement Monitor Timer when the Lamp Assembly is replaced. When the Lamp Replacement Monitor Timer is reset, the LAMP REPLACEMENT indicator stops lighting.

1. Turn the projector on, and press the MENU button and the ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select SETTING and press the SELECT button (refer to the page 32, 33). Another dialog box SETTING MENU will appear.
2. Press the POINT DOWN button and a red-arrow icon will appear. Move the arrow to “Lamp age,” and then press the SELECT button. The message “Lamp replace monitor Reset?” is displayed.
3. Select [Yes] to reset the Timer.

Do not reset the Lamp Replacement Monitor Timer, except after the lamp is replaced.
TROUBLESHOOTING

Before calling your dealer or service center for assistance, check the matters below once again.

1. Make sure you have connected the projector to your equipment as described in the section “CONNECTING THE PROJECTOR” on pages 11 ~ 13.
2. Check cable connection. Verify that all computer, video and power cords are properly connected.
3. Verify that all power is switched on.
4. If the projector still does not produce an image, re-start the computer.
5. If the image still does not appear, unplug the projector from the computer and check the computer monitor's display. The problem may be with your graphics controller rather than with the projector. (When you reconnect the projector, remember to turn the computer and monitor off before you power up the projector. Power the equipment back on in order of : Projector and computer.)
6. If the problem still exists, check the following chart.

<table>
<thead>
<tr>
<th>Problem:</th>
<th>Try these Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>No power.</td>
<td></td>
</tr>
<tr>
<td>- Plug the projector into the AC outlet.</td>
<td></td>
</tr>
<tr>
<td>- Be sure READY Indicator light is On.</td>
<td></td>
</tr>
<tr>
<td>- Wait 90 seconds after the projector is turned OFF before turning the projector back on.</td>
<td></td>
</tr>
<tr>
<td>NOTE: After pressing the power ON-OFF switch to OFF, make sure the projector works as follows:</td>
<td></td>
</tr>
<tr>
<td>1. The LAMP indicator will light and the READY indicator will turn off.</td>
<td></td>
</tr>
<tr>
<td>2. After 90 seconds, the READY indicator will light green again and the projector may be turned on by pressing the power ON-OFF button.</td>
<td></td>
</tr>
<tr>
<td>- Check WARNING TEMP. indicator. If the indicator flashes red, the projector cannot be turned on.</td>
<td></td>
</tr>
<tr>
<td>(See “TURNING ON/OFF THE PROJECTOR” section on page 19.)</td>
<td></td>
</tr>
<tr>
<td>- Check the Projection Lamp. (Refer to page 36.)</td>
<td></td>
</tr>
<tr>
<td>Image is out of focus.</td>
<td></td>
</tr>
<tr>
<td>- Adjust the focus</td>
<td></td>
</tr>
<tr>
<td>- Make sure the projection screen is at least 4.6’ (1.4m) from the projector.</td>
<td></td>
</tr>
<tr>
<td>- Check the projection lens to see if it needs cleaning.</td>
<td></td>
</tr>
<tr>
<td>NOTE: Moving the projector from a cool temperature location to a warm temperature location may result in moisture condensation on the lens. In such an event, leave the projector OFF and wait until condensation disappears.</td>
<td></td>
</tr>
<tr>
<td>Picture is Left/Right reversed.</td>
<td></td>
</tr>
<tr>
<td>- Check Ceiling / Rear feature. (See “SETTING section on page 32.)</td>
<td></td>
</tr>
<tr>
<td>Picture is Top/Bottom reversed.</td>
<td></td>
</tr>
<tr>
<td>- Check Ceiling feature. (See “SETTING” section on page 32.)</td>
<td></td>
</tr>
<tr>
<td>Some displays are not seen during the Operation.</td>
<td></td>
</tr>
<tr>
<td>- Check Display feature.(See “SETTING” section on page 32.)</td>
<td></td>
</tr>
<tr>
<td>No image.</td>
<td></td>
</tr>
<tr>
<td>- Check the connection between the computer or video equipment and the projector.</td>
<td></td>
</tr>
<tr>
<td>- When turning the projector on, it takes about 30 seconds to display the image.</td>
<td></td>
</tr>
<tr>
<td>- Check the system that you select is corresponding with the computer or the video equipment.</td>
<td></td>
</tr>
<tr>
<td>- Make sure the temperature is not out of the Operating Temperature (5°C ~ 35°C).</td>
<td></td>
</tr>
<tr>
<td>No sound.</td>
<td></td>
</tr>
<tr>
<td>- Check audio cable connection from audio input source.</td>
<td></td>
</tr>
<tr>
<td>- Adjust the audio source.</td>
<td></td>
</tr>
<tr>
<td>- Press VOLUME (+) button.</td>
<td></td>
</tr>
<tr>
<td>- Press MUTE button.</td>
<td></td>
</tr>
</tbody>
</table>
### WARNING:

High voltages are used to operate this projector. Do not attempt to open the cabinet.

If the problem still persists after following all operating instructions, contact the sales dealer where you purchased the projector or the service center. Give the model number and explain the difficulty. We will advise you how to obtain service.

### OPTIONAL PARTS

The parts listed below are optionally supplied. When ordering those parts, give the name and the Type No. of it to the sales dealer.

- **Control Cable for Serial Port**  
  Type No. : LV-CA26
- **Control Cable for ADB Port**  
  Type No. : LV-CA27
- **MAC Adapter**  
  Type No. : LV-AD02
