TO THE OWNER

Before operating this projector, read this manual thoroughly and operate the projector properly.
This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time. Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.
If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the “Trouble-shooting” section of the end of this booklet. If the problem still persists, contact the sales dealer where you purchased the projector or the service center.

SAFETY PRECAUTIONS

WARNING : TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

- This projector produces intense light from the projection lens. Do not stare directly into the lens as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam.
- This projector should be set in the way indicated. If not, it may result in a fire hazard.
- Take appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum distance should be taken. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.
- Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.
- Remote Control Unit, supplied to this projector, emits the laser beam as the laser pointer function from Laser Light Window while pressing LASER button (for 1 minute / LASER POINTER INDICATOR lights red to indicate laser emission). Do not look into Laser Light Window or shine the laser beam on yourself or other people. Eye damage may result.
- If the projector is not to be used for an extended time, unplug the projector from the power outlet.

READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE.
SAFETY INSTRUCTIONS

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance--this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Voor de klanten in Nederland

Bij dit product zijn batterijen geleverd.
Wanneer deze leeg zijn, moet u ze niet weggooien maar inleveren als KCA.
COMPLIANCES

Federal Communication Commission Notice
Multimedia Projector, Model: LV-7545U, LV-7545E
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
Use of shielded cable is required to comply with class B limits in Subpart B of Part of FCC Rules.
Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.
Canon U.S.A., Inc.
One Canon Plaza, Lake Success, NY 11042, U.S.A.
Tel No. (516)328-5600

For use in Germany
This product is intended for use in residential, commercial and light industry environment.

Canadian Radio Interference Regulations
This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

AC POWER CORD REQUIREMENT
The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:
AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).
AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

## TRADEMARKS
- Apple, Macintosh, and PowerBook are trademarks or registered trademarks of Apple Computer, Inc.
- IBM and PS/2 are trademarks or registered trademarks of International Business Machines, Inc.
- Windows and PowerPoint are registered trademarks of Microsoft Corporation.
- Each name of corporations or products in the owner's manual is a trademark or a registered trademark of its respective corporation.
This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

◆ Compact Design
This projector is extremely compact in size and weight. It is designed to carry and work anywhere you wish to use.

◆ Compatibility
This projector widely accepts various video and computer input signals including:
- Computers
  IBM-compatible or Macintosh computer up to 1280 x 1024 resolution.
- 6 Color Systems
  NTSC, PAL, SECAM, NTSC 4.43, PAL-M or PAL-N color system can be connected.
- Component Video
  Component video signal, such as a DVD player output high definition TV signals including 480i, 480p, 575i, 575p, 720p, 1035i or 1080i, can be connected.
- S-Video
  S-Video signal, such as a S-VHS VCR output signal, can be connected.

◆ High Resolution Image
This projector provides 1024 x 768 dots resolution for computer input and 800 horizontal TV lines. Resolution from a computer between XGA (1024 x 768) and SXGA (1280 x 1024) is compressed into 1024 x 768 dots. This projector cannot display image of over 1280 x 1024 dots. When resolution of your computer is over 1280 x 1024, reset a computer output for lower resolution.

◆ Multi-Scan System
This projector has Multi-Scan System to conform to almost all computer output signals quickly. There is no need for troublesome manual adjustment of frequency and other settings.

◆ One-Touch Auto PC Adjustment
Incoming computer video signals are recognized and the best adjustment is automatically set by Auto PC Adjustment. No complicated setup is necessary and projection is always precise.

◆ Turbo Bright System
Turbo Bright System switches picture brightness from normal setting to brighter mode, and it enables you to select better brightness for projected image.

◆ Motor-driven Lens Shift
The projection lens can be moved up and down with the motor-driven lens shift function. This function makes it easy to provide the projected image where you want. The zoom and focus can be also adjusted with motor-driven operation.

◆ Digital Zoom (for Computer)
Digital Zoom function adjusts the image size to approx. 1/4 ~ 49 times of original image size, allowing you to focus on crucial information at a presentation.

◆ Keystone Correction
Positioning height of a projector may result in distorted image being displayed in a trapezoid shape. Keystone Correction solves this problem by digitally altering projection to produce undistorted images.

◆ Power Management
Power Management function is provided to reduce power consumption while a projector is not in use. This Power Management function operates to turn Projection Lamp off when a projector detects signal interruption and any button is not pressed over 5 minutes. Projection Lamp is automatically turned on again when a projector detects signal or any operation button is pressed. This projector is shipped with this function ON.

◆ Digital Visual Interface
This projector is equipped with DVI 24-pin terminal for connecting DVI output from a computer.

◆ Laser Pointer Function
Remote Control Unit supplied with this projector includes Laser Pointer function. This function helps you to make a smart presentation on a projected screen.

◆ Wireless Mouse
Remote Control Unit supplied with this projector has Wireless Mouse function for a connected computer. This function enables you to operate both projector and computer with Remote Control Unit only.

◆ Multilanguage Menu Display
Operation menu is displayed in: English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Chinese, Korean or Japanese.
**NAME OF EACH PART OF PROJECTOR**

**FRONT OF CABINET**
- TOP CONTROLS AND INDICATORS
- PROJECTION LENS
- LENS COVER

**BACK OF CABINET**
- EXHAUST VENT

⚠️ HOT AIR EXHAUSTED!

Air blown from exhaust vent is hot. When using or installing projector, following precautions should be taken.
- Do not put any flammable object near these vents.
- Keep rear grills at least 3’(1 m) away from any object, especially heat-sensitive object.
- Do not touch this area, especially screws and metallic parts. This area will become hot while a projector is used.

This projector detects internal temperature and automatically controls operating power of Cooling Fans.

**BOTTOM OF CABINET**
- ADJUSTABLE FEET AND FEET LOCK LATCHES

**This projector is equipped with cooling fans for protection from overheating. Pay attention to the following to ensure proper ventilation and avoid a possible risk of fire and malfunction.**
- Do not cover vent slots.
- Keep side clear of any objects. Obstructions may block cooling air.
This projector uses nominal input voltages of 100-120 V or 200-240 V AC. This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce risk of electrical shock, do not plug into any other type of power system. Consult your authorized dealer or service station if you are not sure of the type of power supply being in use. Connect a projector with a peripheral equipment before turning a projector on. (Refer to pages 11 ~ 13 for connection.)

**CAUTION**

For safety, unplug AC Power Cord when an appliance is not used. When this projector is connected to the outlet with AC Power Cord, an appliance is in Stand-by Mode and consumes a little electric power.

**NOTE ON THE POWER CORD**

The AC Power Cord must meet the requirement of the country where you use the projector. Confirm the AC plug type with the chart below. The proper AC power cord must be used. If the supplied AC Power Cord does not match the AC outlet, contact your sales dealer.

<table>
<thead>
<tr>
<th>Projector side</th>
<th>AC Outlet side</th>

<tr>
<td>To the POWER CORD CONNECTOR on the projector.</td>
<td>For the U.S.A. and Canada (120 V AC)</td>
</tr>
<tr>
<td>For Continental Europe (200 - 240 V AC)</td>
<td>Ground</td>
</tr>
</tbody>
</table>

Connect AC Power Cord (supplied) to a projector. The AC outlet must be near this equipment and must be easily accessible.
POSITIONING PROJECTOR

- This projector is designed to project on a flat projection surface.
- The projector can be focused from 4.6’ (1.4m) ~ 48.3’ (14.7m).
- Refer to the figure below to adjust a screen size.

ROOM LIGHT
The brightness in a room has a great influence on picture quality. It is recommended to limit ambient lighting in order to provide the best image.

LENS SHIFT ADJUSTMENT
The projection lens can be moved up and down with the motor-driven lens shift function. This function makes it easy to provide the projected image where you want. The U/D ratio can be adjusted 10 : 0 ~ 1 : 1 (refer to the figure below.). Refer to P 20 for operation.
PREPARATION

ADJUSTABLE FEET

Picture tilt and projection angle can be adjusted by rotating the ADJUSTABLE FEET. Projection angle can be adjusted to 10.5 degrees.

1. Lift the front of the projector and pull the FEET LOCK LATCHES on both sides of the projector.

2. Release the FEET LOCK LATCHES to lock the ADJUSTABLE FEET and rotate the ADJUSTABLE FEET to fine tune the position and the tilt.

3. To shorten the ADJUSTABLE FEET, lift the front of the projector and pull and undo the FEET LOCK LATCHES.

The position and the keystone distortion of the image can be adjusted using the Menu Operation. (Refer to P 20 and 35.)

MOVING PROJECTOR

Use the Carry Handle when moving a Projector.
When moving a projector, replace the lens cover and retract the feet to prevent damage to the lens and cabinet.
When a projector is not in use for an extended period, put it into the case (dust cover) supplied with a projector.

WARNING

CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR

- Do not drop or bump a projector, otherwise damages or malfunctions may result.
- When carrying a projector, use a suitable carrying case.
- Do not transport a projector by using a courier or transport service in an unsuitable transport case. This may cause damage to a projector. To transport a projector through a courier or transport service, consult your dealer for best way.
This projector has input and output terminals on its back for connecting computers and video equipment. Refer to figures on pages 11 to 13 and connect properly.

**COMPUTER AUDIO INPUT (1 and 2) JACKS**
Connect an audio output (stereo) from computer to these jacks. (Refer to P12.)

**USB CONNECTOR (Series B)**
When controlling the computer with Remote Control Unit of this projector, connect USB port of your personal computer to this connector. (Refer to P12.)

**RESET BUTTON**
This projector uses a micro processor to control this unit, and occasionally, this micro processor may malfunction and need to be reset. This can be done by pressing RESET button with a pen, which will shut down and restart the unit. Do not use RESET function excessively.

* Do not press this button. This button is used for our optional accessories.

**5 BNC INPUT JACKS**
Connect the component video output (Y, Cb, Cr or Y, Pb, Pr) from video equipment to VIDEO/Y, Cb/Pb and Cr/Pr jacks or connect the computer output (5 BNC Type (Green, Blue, Red, Horiz. Sync and Vert. Sync.)) from computer to G, B, R, H/V and V jacks. (Refer to P12 and 13.)

**VIDEO INPUT JACKS**
Connect the composite video output from video equipment to VIDEO/Y jack or connect the component video outputs to VIDEO/Y, Cb/Pb and Cr/Pr jacks. (Refer to P13.)

**AUDIO INPUT JACKS**
Connect an audio output from video equipment to these jacks. (Refer to P13.)

**S-VIDEO INPUT JACK**
Connect the S-VIDEO output from video equipment to this jack. (Refer to P13.)

**CONTROL PORT CONNECTOR**
When controlling the computer with Remote Control Unit of this projector, connect the mouse port of your personal computer to this connector. (Refer to P12.)

**R/C JACK**
When using the Wired/Wireless Remote Control Unit as Wired Remote Control, Connect the Wired Remote Control Unit to this jack with Remote Control Cable (supplied).

When controlling the computer with Remote Control Unit of this projector, connect USB port of your personal computer to this connector. (Refer to P12.)

OPERATION OF REMOTE CONTROL

Left Side

ALL-OFF SWITCH
When using Remote Control Unit, turn this switch to “ON.” And turn it to “ALL OFF” when it is not used.

OPERATION OF REMOTE CONTROL

LASER POINTER INDICATOR
Lights red while laser beam is emitted from Laser Light Window.

POWER ON-OFF BUTTON
Used to turn projector on or off. (P19)

MENU BUTTON
Used to select MENU operation. (P17, 18)

INPUT BUTTON
Used to select input source. (P22, 30)

SET BUTTON
Used to execute the item selected, or to expand or compress the image in DIGITAL ZOOM +/- mode. (P29)
It is also used as a PC mouse in Wireless Mouse Operation. (P37)

POINT BUTTON
Used to move a pointer on ON-SCREEN MENU, adjust each item, or pan image in DIGITAL ZOOM +/- mode. (P29)
It is also used as a PC mouse in Wireless Mouse Operation. (P37)

When pressing the center of this button, it works as SET button.

RIGHT CLICK BUTTON
Used to operate P-TIMER function. (P21)

LASER POINTER FUNCTION

This Remote Control Unit emits a laser beam as the laser pointer function from Laser Light Window. When LASER button is pressed, the laser light goes on. And when LASER button is being pressed for more than 1 minute or LASER button is released, light goes off. LASER POINTER INDICATOR lights RED and Laser is emitted with RED light to indicate laser beam is being emitted.
The laser emitted is a class II laser; therefore, do not look into Laser Light Window or shine the laser beam on yourself or other people. The three marks below are the caution labels for the laser beam.

CAUTION: Use of controls, adjustments or performance of procedures other than those specified herein may result hazardous radiation exposure.

These caution labels are put on the remote control.
BEFORE OPERATION

To insure safe operation, please observe the following precautions:

- Use (2) AA, UM3 or R06 type alkaline batteries.
- Replace two batteries at the same time.
- Do not use a new battery with an used battery.
- Avoid contact with water or liquid.
- Do not expose Remote Control Unit to moisture, or heat.
- Do not drop Remote Control Unit.
- If a battery has leaked on Remote Control Unit, carefully wipe the case clean and install new batteries.
- Danger of explosion if battery is incorrectly replaced.
- Dispose of used batteries according to batteries manufacturers instructions and local rules.

Remote Control Batteries Installation

1. Remove the battery compartment lid.
   Press the lid downward and slide it.

2. Slide the batteries into the compartment.

3. Replace the compartment lid.

To insure safe operation, please observe the following precautions:

- Use (2) AA, UM3 or R06 type alkaline batteries.
- Replace two batteries at the same time.
- Do not use a new battery with an used battery.
- Avoid contact with water or liquid.
- Do not expose Remote Control Unit to moisture, or heat.
- Do not drop Remote Control Unit.
- If a battery has leaked on Remote Control Unit, carefully wipe the case clean and install new batteries.
- Danger of explosion if battery is incorrectly replaced.
- Dispose of used batteries according to batteries manufacturers instructions and local rules.

Operating Range

Point Remote Control Unit toward projector (Receiver Window) whenever pressing any button. Maximum operating range for Remote Control Unit is about 16.4' (5m) and 60° in front and rear of the projector.

BEFORE OPERATION

TOP CONTROLS AND INDICATORS

This projector has CONTROL BUTTONS (TOP CONTROLS) and INDICATORS on its top.

- **LAMP REPLACE INDICATOR**: Turns yellow when the life of projection lamp draws to an end. (P39)
- **WARNING TEMP. INDICATOR**: Flashes red while internal projector temperature is too high. (P38)
- **READY INDICATOR**: Lights green when the projector is ready to be turned on. And flashes green while in Power Management mode. (P36)
- **LAMP INDICATOR**: Becomes dim when the projector is turned on. And bright when the projector is in stand-by mode.

**POWER ON-OFF BUTTON**
Used to turn a projector on or off. (P19)

**INPUT BUTTON**
Used to select input source. (P22)

**BRIGHT BUTTON**
Used to enhance picture brightness. (P20)

**LENS SHIFT BUTTON**
Used to select LENS SHIFT function. (P20)

**ZOOM BUTTON**
Used to adjust zoom. (P20)

**FOCUS BUTTON**
Used to adjust focus. (P20)

**SET BUTTON**
Used to execute the item selected. It is also used to expand / compress the image in DIGITAL ZOOM mode. (P29)

**POINT (VOLUME + / –) BUTTONS**
Used to select an item or adjust value in ON-SCREEN MENU. They are also used to pan the image in DIGITAL ZOOM +/- mode. (P29) POINT LEFT/RIGHT buttons are also used as VOLUME +/- buttons.

**MENU BUTTON**
Used to open or close ON-SCREEN MENU operation. (P17, 18)
You can control and adjust this projector through ON-SCREEN MENU. Refer to the following pages to operate each adjustment on ON-SCREEN MENU.

1. DISPLAY MENU
Press MENU button to display ON-SCREEN MENU.

2. MOVING POINTER
Move the pointer (see below) or adjust the value of item by pressing POINT button(s) on Top Control or on Remote Control Unit.

* Pointer is the icon on ON-SCREEN MENU to select the item. See the figures on the section "FLOW OF ON-SCREEN MENU OPERATION" below.

3. SELECT ITEM
Select the item or set selected function by pressing SET button.

FLOW OF ON-SCREEN MENU OPERATION

1. Display ON-SCREEN MENU
Press MENU button to display ON-SCREEN MENU (MENU BAR). A red frame is POINTER.

2. Select Menu to be adjusted
Move POINTER (red frame) to MENU ICON that you want to select by pressing POINT RIGHT / LEFT buttons.

3. Control or adjust item through ON-SCREEN MENU
Press POINT DOWN button and move POINTER (red frame or red arrow) to ITEM that you want to adjust, and then press SET button to show ITEM DATA.

4. Adjust ITEM DATA by pressing POINT RIGHT / LEFT buttons. Refer to the following pages for details of respective adjustments.
**BEFORE OPERATION**

**MENU BAR**

**FOR PC SOURCE**  Press MENU BUTTON while connecting to PC input source.

- **GUIDE WINDOW**  Shows selected item of ON-SCREEN MENU.
- **PC SYSTEM MENU**  Used to select computer system. (Refer to P22, 23)
- **IMAGE SELECT MENU**  Used to select image level among: Standard, High contrast and Custom. (Refer to P27)
- **SCREEN MENU**  Used to adjust size of image. [Normal / True / Wide / Digital zoom +/-] (Refer to P29)
- **SETTING MENU**  Used to change settings of projector or reset Lamp Replace Counter. (Refer to P35-37)

**FOR VIDEO SOURCE**  Press MENU BUTTON while connecting to VIDEO input source.

- **INPUT MENU**  Used to select input source (Input 1, Input 2 or Input 3). (Refer to P22)
- **IMAGE SELECT MENU**  Used to select image level among: Standard, Cinema and Custom. (Refer to P32)
- **SCREEN MENU**  Used to set size of image to Normal or Wide. (Refer to P34)
- **INPUT MENU**  Used to select input source (Input 1, Input 2 or Input 3). (Refer to P30)
- **IMAGE SELECT MENU**  Used to select image level among: Standard, Cinema and Custom. (Refer to P32)
- **SCREEN MENU**  Used to set size of image to Normal or Wide. (Refer to P34)

Same function as Menu for PC source.
BASIC OPERATION

TURNING ON PROJECTOR

1. Complete peripheral connections (with Computer, VCR, etc.) before turning on projector. (Refer to "CONNECTING TO PROJECTOR" on pages 11~13 for connecting that equipment.)

2. Connect the projector's AC Power Cord into an AC outlet. LAMP Indicator lights RED, and READY Indicator lights GREEN.

   NOTE : When "On start" function is ON, this projector is turned on automatically by connecting AC Power Cord to an AC outlet. (Refer to pages 35, 36.)

3. Press POWER ON-OFF button on Top Control or on Remote Control Unit to ON. LAMP Indicator dims, and Cooling Fans start to operate. Preparation Display appears on a screen and the count-down starts. The signal from PC or Video source appears after 30 seconds.

4. When WARNING TEMP. Indicator flashes red, projector is automatically turned off. Wait at least 5 minutes before turning on projector again.

   When "Power Management" function is ON, projector detects signal interruption and turns off Projection Lamp automatically. Refer to "Power Management" on pages 35 and 36.

   When WARNING TEMP. Indicator flashes red, projector is automatically turned off. Wait at least 5 minutes before turning on projector again.

When WARNING TEMP. Indicator continues to flash, follow procedures below:

1. Press POWER ON-OFF button to turn off projector and disconnect AC Power Cord from an AC outlet.

2. Check Air Filters for dust accumulation.

3. Clean Air Filters. (See "AIR FILTER CARE AND CLEANING" section on page 38.)

4. Turn a projector on again.

If WARNING TEMP. Indicator should still continue to flash, contact the sales dealer where you purchased this projector or service center.

TURNING OFF PROJECTOR

1. Press POWER ON-OFF button on Top Control or on Remote Control Unit, and a message "Power off?" appears on a screen.

2. Press POWER ON-OFF button again to turn off projector. LAMP Indicator lights bright and READY Indicator turns off. After projector is turned off, Cooling Fans operate (for 90 seconds). During this "Cooling Down" period, this appliance cannot be turned on.

3. During this "Cooling Down" period, this appliance cannot be turned on.

3. When projector has cooled down, READY Indicator lights GREEN again and you can turn projector on. After cooling down completely, disconnect AC Power Cord.

   TO MAINTAIN THE LIFE OF LAMP, ONCE YOU TURN PROJECTOR ON, WAIT AT LEAST 5 MINUTES BEFORE TURNING IT OFF.

   When "Power Management" function is ON, projector detects signal interruption and turns off Projection Lamp automatically. Refer to "Power Management" on pages 35 and 36.

   When WARNING TEMP. Indicator flashes red, projector is automatically turned off. Wait at least 5 minutes before turning on projector again.

   When WARNING TEMP. Indicator continues to flash, follow procedures below:

   1. Press POWER ON-OFF button to turn off projector and disconnect AC Power Cord from an AC outlet.

   2. Check Air Filters for dust accumulation.

   3. Clean Air Filters. (See "AIR FILTER CARE AND CLEANING" section on page 38.)

   4. Turn a projector on again.

   If WARNING TEMP. Indicator should still continue to flash, contact the sales dealer where you purchased this projector or service center.
ADJUSTING SCREEN

ZOOM ADJUSTMENT

1 Press ZOOM button on Top Control or ZOOM ▲▼ button on Remote Control Unit. The message “Zoom” is displayed.

2 Press ZOOM ▲ button or POINT UP button to make image larger, and press ZOOM ▼ button or POINT DOWN button to make image smaller.

FOCUS ADJUSTMENT

1 Press FOCUS button on Top Control or FOCUS ▲▼ button on Remote Control Unit. The message “Focus” is displayed.

2 Adjust focus of image by pressing FOCUS ▲▼ button or POINT UP/DOWN button(s).

LENS SHIFT ADJUSTMENT

1 Press LENS SHIFT button on Top Control or on Remote Control Unit. The message “Lens shift” is displayed.

2 Press POINT UP button to move image up, press POINT DOWN button to move image down.

KEYSTONE ADJUSTMENT

If a projected picture has keystone distortion, correct image with KEYSTONE adjustment.

1 Press KEYSTONE (▲▼) button on Top Control or on Remote Control Unit, or select Keystone on SETTING menu. (Refer to P.35.) Keystone dialog box appears.

2 Correct keystone distortion by pressing KEYSTONE ▲▼ button or POINT UP/DOWN button(s). Press KEYSTONE ▲ button or POINT UP button to reduce the upper part of image, and press KEYSTONE ▼ button or POINT DOWN button to reduce the lower part.

TURBO BRIGHT FUNCTION

Turbo Bright System enhances picture brightness. When BRIGHT button is pressed to on, the message “Bright on” is displayed and BRIGHT button lights orange. To return to original picture brightness, press BRIGHT button again.

* When Turbo Bright System is set to on, the color of image may change slightly.
PICTURE FREEZE FUNCTION

Press FREEZE button on Remote Control Unit to freeze the picture on-screen. To cancel FREEZE function, press FREEZE button again or press any other button.

NO SHOW FUNCTION

Press NO SHOW button on Remote Control Unit to black out the image. To restore to normal, press NO SHOW button again or press any other button.

P-TIMER FUNCTION

Press P-TIMER button on Remote Control unit. The timer display “00:00” appears and the timer starts to count time (00:00 ~ 59:59). To stop P-TIMER display, press P-TIMER button. And then, press P-TIMER button again to cancel P-TIMER function.

SOUND ADJUSTMENT

DIRECT OPERATION

Volume
Press VOLUME (+/-) button(s) on Top Control or on Remote Control Unit to adjust volume. Volume dialog box appears. (+) button to increase volume, and (-) button for decreasing.

Mute
Press MUTE button on Remote Control Unit to cut off sound. To restore sound to its previous level, press MUTE button again or press Volume (+/-) button(s).

MENU OPERATION

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to SOUND Menu icon.

2 Press POINT DOWN button to move a red frame pointer to the item that you want to select, and then press SET button.

Volume
Press POINT RIGHT button to increase volume, and press POINT LEFT button for decreasing.

Mute
Press POINT LEFT/RIGHT button to cut off sound. Dialog box display is changed to “On” and sound is cut off. To restore sound to its previous level, press POINT LEFT/RIGHT button again.
SELECTING INPUT SOURCE

DIRECT OPERATION

Choose Computer by pressing INPUT button on Top Control or on Remote Control Unit. If projector cannot reproduce proper image, select correct input source through MENU OPERATION (see below).

MENU OPERATION

2. Press POINT DOWN button and a red-arrow icon will appear. Move arrow to INPUT source that you want to select, and then press SET button.

SELECTING COMPUTER SYSTEM

WHEN SELECT INPUT 1 (COMPUTER INPUT TERMINALS)

2. Move a pointer to either Digital or Analog and then press SET button.

Digital When your computer is connected to COMPUTER INPUT (DIGITAL) terminal, select Digital.

Analog When your computer is connected to COMPUTER INPUT (ANALOG) terminal, select Analog.

WHEN SELECT INPUT 2 (5 BNC INPUT JACKS)

When connect a computer output [5 BNC Type (Green, Blue, Red, Horiz. Sync and Vert. Sync.)] from a computer to G, B, R, H/HV and V jacks.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to INPUT Menu icon.

2. Press POINT DOWN button to move a red arrow pointer to Input 2 and then press SET button. Source Select Menu will appear.

3. Press POINT DOWN button and a red-arrow icon will appear. Move arrow to “RGB”, and then press SET button.
COMPUTER INPUT

AUTOMATIC MULTI-SCAN SYSTEM

This projector automatically tunes to most different types of computers based on VGA, SVGA, XGA or SXGA (refer to “COMPATIBLE COMPUTER SPECIFICATION” on page 26). When selecting Computer, this projector automatically tunes to incoming signal and projects proper image without any special setting. (Some computers need setting manually.)

Note : Projector may display one of the following messages.

**Auto**

- When projector cannot recognize connected signal as PC system provided in this projector, Auto PC Adjustment function operates to adjust projector and the message “Auto” is displayed on SYSTEM Menu icon.
- When image is not provided properly, manual adjustment is required. (Refer to P24 and 25.)

There is no signal input from computer. Make sure the connection of computer and a projector is set correctly. (Refer to TROUBLESHOOTING on page 40.)

**D-VGA, D-SVGA or D-XGA**

When digital computer signal is received on DVI terminal, above message is displayed on PC SYSTEM Menu icon.

SELECT COMPUTER SYSTEM MANUALLY

This projector automatically selects PC system among those provided in this projector and PC system can be also selected manually.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to PC SYSTEM Menu icon.

2. Press POINT DOWN button to move a red arrow pointer to the system that you want to set, and then press SET button.

PC ADJUSTMENT

AUTO PC ADJUSTMENT

Auto PC Adjustment function is provided to automatically adjust Fine sync, Total dots and Picture Position to conform to your computer. Auto PC Adjustment function can be operated as follows.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to PC ADJUST Menu icon.

2. Press POINT DOWN button to move a red frame pointer to AUTO PC Adj. icon and then press SET button twice. This Auto PC Adjustment can be also executed by pressing AUTO PC ADJ. button on Remote Control Unit.

Store adjustment parameters.

Adjustment parameters from Auto PC Adjustment can be memorized in this projector. Once parameters are memorized, setting can be done just by selecting Mode in PC SYSTEM Menu (P23). Refer to step 3 of MANUAL PC ADJUSTMENT section (P25).

**NOTE**

- Fine sync, Total dots and Picture Position of some computers can not be fully adjusted with this Auto PC Adjustment function. When the image is not provided properly through this function, manual adjustments are required. (Refer to page 24, 25.)

- Auto PC Adjustment function cannot be operated in Digital Signal input on DVI terminal and “RGB”, “720p (HDTV)”, “1035i (HDTV)” or “1080i (HDTV)” is selected on PC SYSTEM Menu.
This projector can automatically tune to the display signals from most personal computers currently distributed. However, some computers employ special signal formats which are different from the standard ones and may not be tuned by Multi-Scan system of this projector. If this happens, projector cannot reproduce a proper image and the image may be recognized as a flickering picture, a non-synchronized picture, a non-centered picture or a skewed picture.

This projector has a Manual PC Adjustment to enable you to precisely adjust several parameters to match with those special signal formats. This projector has 5 independent memory areas to memorize those parameters manually adjusted. This enables you to recall the setting for a specific computer whenever you use it.

Note: This PC ADJUST Menu cannot be operated when in digital signal input on DVI terminal and “RGB” is selected on PC SYSTEM MENU (P23).

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to PC ADJUST Menu icon.

2. Press POINT DOWN button to move a red frame pointer to the item that you want to adjust and then press SET button. Adjustment dialog box will appear. Press POINT LEFT/RIGHT button to adjust value.

**Fine sync**

Adjusts an image as necessary to eliminate flicker from the display. Press POINT LEFT/RIGHT button to adjust value. (From 0 to 31.)

**Total dots**

The number of total dots in one horizontal period. Press POINT LEFT/RIGHT button(s) and adjust number to match your PC image.

**Horizontal**

Adjusts horizontal picture position. Press POINT LEFT/RIGHT button(s) to adjust the position.

**Vertical**

Adjusts vertical picture position. Press POINT LEFT/RIGHT button(s) to adjust the position.

**Current mode**

Press SET button to show the information of computer selected.

**Clamp**

Adjusts clamp level. When the image has a dark bar(s), try this adjustment.
**Display area**
Selects area displayed with this projector. Select the resolution at Display area dialog box.

**Display area H**
Adjustment of horizontal area displayed with this projector. Press POINT LEFT/RIGHT button(s) to decrease/increase value and then press SET button.

**Display area V**
Adjustment of vertical area displayed with this projector. Press POINT LEFT/RIGHT button(s) to decrease/increase value and then press SET button.

**Full screen**
Press POINT LEFT/RIGHT button(s) to switch Full screen function to “On” or “Off.” Set “On” to resize the image with 4 x 3 aspect ratio to fit the screen.

NOTE : Display area (H/V) and Full screen cannot be adjusted when “1035i (HDTV)” or “1080i (HDTV)” is selected on PC SYSTEM Menu (P23).

3 **Store**
To store adjustment parameters, move a red frame pointer to Store icon and then press SET button. Move a red arrow pointer to any of Mode 1 to 5 that you want to store to and then press SET button.

**Mode free**
To clear adjustment parameters previously set, move a red frame pointer to Mode free icon and then SET button. Move a red arrow pointer to the Mode that you want to clear and then press SET button.

Other icons operates as follows.

**Reset**
Reset all adjust parameters on adjustment dialog box to previous figure.

**Quit**
Closes PC ADJUST MENU.
**COMPATIBLE COMPUTER SPECIFICATIONS**

Basically this projector can accept the signal from all computers with V, H-Frequency below mentioned below and less than 160 MHz of Dot Clock.

PICTURE IMAGE ADJUSTMENTS

IMAGE LEVEL SELECT (DIRECT)

Select image level among Standard, High contrast and Custom by pressing IMAGE button on Remote Control Unit.

**Standard**
Normal picture adjustment preset on this projector.

**High contrast**
Picture adjustment improved in reproduction of halftones. This adjustment is suitable for providing better image in brighter place.

**Custom**
User preset picture adjustment in IMAGE ADJUST Menu (P28).

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to IMAGE SELECT Menu icon.

2. Press POINT DOWN button to move a red frame pointer to the level that you want to set and then press SET button.

**IMAGE button**

**IMAGE LEVEL SELECT (MENU)**

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to IMAGE SELECT Menu icon.

2. Press POINT DOWN button to move a red frame pointer to the level that you want to set and then press SET button.

**IMAGE SELECT MENU**

- Normal picture adjustment preset on this projector.
- Picture adjustment improved in reproduction of halftones. This adjustment is suitable for providing better image in brighter place.
- User preset picture adjustment in IMAGE ADJUST Menu (P28).
**IMAGE LEVEL ADJUSTMENT**

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to IMAGE ADJUST Menu icon.

2. Press POINT DOWN button to move a red frame pointer to the item that you want to adjust, and then press SET button. The level of each item is displayed. Adjust each level by pressing POINT LEFT/RIGHT button(s).

   - **Contrast**
     Press POINT LEFT button to decrease contrast, and POINT RIGHT button to increase contrast. (From 0 to 63.)

   - **Brightness**
     Press POINT LEFT button to adjust image darker, and POINT RIGHT button to adjust brighter. (From 0 to 63.)

   - **White balance (Red)**
     Press POINT LEFT button to lighten red tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

   - **White balance (Green)**
     Press POINT LEFT button to lighten green tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

   - **White balance (Blue)**
     Press POINT LEFT button to lighten blue tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

   - **Gamma**
     Press either POINT LEFT button or POINT RIGHT button to obtain better balance of contrast. (From 0 to 15.)

3. **Store**
   To store manually preset image level, move a red frame pointer to Store icon and press SET button. The message “OK?” will appear. Select [Yes] to store manual adjustment. To set this manual adjustment, select Custom by pressing IMAGE button or through IMAGE SELECT MENU (refer to P27).

   Other icons operates as follows.

   - **Reset**
     Reset all adjustment to previous figure.

   - **Quit**
     Closes IMAGE MENU.
This projector has a picture screen resize function, which enables you to display the desirable image size.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SCREEN Menu icon.

2. Press POINT DOWN button and move a red frame pointer to the function that you want to select and then press SET button.

- **Normal**
  Provides image to fit screen size.

- **True**
  Provides image in its original size. When the original image size is larger than screen size (1024 x 768), this projector enters “Digital zoom +” mode automatically.

- **Wide**
  Provides image to fit wide video aspect ratio (16 : 9) by expanding image width uniformly. This function can be used for providing a squeezed video signal at 16 : 9.

- **Digital zoom +**
  When Digital zoom + is selected, ON-SCREEN MENU disappears and the message “D. Zoom +” is displayed. Press SET button to expand image size. And press POINT UP/DOWN/LEFT/RIGHT button(s) to pan the image. Panning function can work only when the image is larger than screen size.
  A projected image can be also expanded by pressing D.ZOOM ▲ button on Remote Control Unit.

- **Digital Zoom –**
  When Digital zoom – is selected, ON-SCREEN MENU disappears and the message “D. Zoom –” is displayed. Press SET button to compress image size.
  A projected image can be also compressed by pressing D.ZOOM ▼ button on Remote Control Unit.

To cancel Digital Zoom +/- mode, press any button except D.ZOOM ▲/▼, SET, POINT and LASER buttons.

**NOTE**
- This SCREEN Menu cannot be operated when “1035i (HDTV)” or “1080i (HDTV)” is selected on PC SYSTEM Menu (P23).
- Wide cannot be selected when “720p (HDTV)” is selected on PC SYSTEM Menu (P23).
- True and Digital zoom +/- cannot be selected when “RGB” is selected on PC SYSTEM Menu (P23).
- This projector cannot display any resolution higher than 1280 X 1024. If your computer’s screen resolution is higher than 1280 X 1024, reset the resolution to the lower before connecting projector.
- The image data in other than XGA (1024 x 768) is modified to fit the screen size in initial mode.
- Panning function may not operate properly if the computer system prepared on PC ADJUST Menu is used.
SELECTING INPUT SOURCE

WHEN SELECT INPUT 2 (5 BNC INPUT JACKS)

When connecting to those equipment, select a type of Video source in SOURCE SELECT Menu.

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to INPUT Menu icon.

2 Press POINT DOWN button to move a red arrow pointer to Input 2 and then press SET button. Source Select Menu will appear.

3 Move a pointer to source that you want to select and then press SET button.

- **Video** When video input signal is connected to VIDEO jack, select Video.
- **Y,Pb/Cb,Pr/Cr** When video input signal is connected to Y-Pb/Cb-Pr/Cr jacks, select Y, Pb/Cb, Pr/Cr.

WHEN SELECT INPUT 3 (AV TERMINALS)

When connecting to those equipment, select a type of Video source in SOURCE SELECT (VIDEO) Menu.

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to INPUT Menu icon.

2 Press POINT DOWN button to move a red arrow pointer to Input 3 and then press SET button. Source Select Menu will appear.

3 Move a pointer to source that you want to select and then press SET button.

- **Video** When video input signal is connected to VIDEO jack, select Video.
- **Y,Pb/Cb,Pr/Cr** When video input signal is connected to Y-Pb/Cb-Pr/Cr jacks, select Y, Pb/Cb, Pr/Cr.
- **S-Video** When video input signal is connected to S-VIDEO jack, select S-Video.
SELECTING VIDEO SYSTEM

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to AV SYSTEM Menu icon.

2 Press POINT DOWN button to move a red arrow pointer to the system that you want to select and then press SET button.

VIDEO (Y) JACK OR S-VIDEO JACK

<table>
<thead>
<tr>
<th>Auto</th>
</tr>
</thead>
</table>
Projector automatically detects incoming Video system, and adjusts itself to optimize its performance.
When Video System is PAL-M or PAL-N, select system manually.

PAL / SECAM / NTSC / NTSC4.43 / PAL-M / PAL-N
If projector cannot reproduce proper video image, it is necessary to select a specific broadcast signal format among PAL, SECAM, NTSC, NTSC 4.43, PAL-M, and PAL-N.

Y, Pb/Cb, Pr/Cr JACKS

<table>
<thead>
<tr>
<th>Auto</th>
</tr>
</thead>
</table>
Projector automatically detects incoming Video signal, and adjusts itself to optimize its performance.

COMPONENT VIDEO SIGNAL FORMAT
If projector cannot reproduce proper video image, it is necessary to select a specific component video signal format among 480i, 575i, 480p, 575p, 720p, 1035i and 1080i.
PICTURE IMAGE ADJUSTMENTS

IMAGE LEVEL SELECT (DIRECT)

Select image level among Standard, Cinema, and Custom by pressing IMAGE button on Remote Control Unit.

- **Standard**
  Normal picture level preset on this projector.

- **Cinema**
  Picture level adjusted for the picture with fine tone.

- **Custom**
  User preset picture adjustment in IMAGE ADJUST Menu (P33-34).

IMAGE LEVEL SELECT (MENU)

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to IMAGE SELECT Menu icon.

2. Press POINT DOWN button to move a red frame pointer to the level that you want to set and then press SET button.

- **Standard**
  Normal picture level preset on this projector.

- **Cinema**
  Picture level adjusted for the picture with fine tone.

- **Custom**
  User preset picture adjustment in IMAGE ADJUST Menu (P33-34).
VIDEO INPUT

IMAGE LEVEL ADJUSTMENT

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to IMAGE ADJUST Menu icon.

2. Press POINT DOWN button to move a red frame pointer to the item that you want to adjust and then press SET button. The level of each item is displayed. Adjust each level by pressing POINT LEFT/RIGHT button(s).

### Contrast
Press POINT LEFT button to decrease contrast, and POINT RIGHT button to increase contrast. (From 0 to 63.)

### Brightness
Press POINT LEFT button to adjust image darker, and POINT RIGHT button to adjust brighter. (From 0 to 63.)

### Color
Press POINT LEFT button to lighten color, and POINT RIGHT button to deeper color. (From 0 to 63.)

### Tint
Press POINT LEFT button or POINT RIGHT button to obtain proper color. (From 0 to 63.)

### White balance (Red)
Press POINT LEFT button to lighten red tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

### White balance (Green)
Press POINT LEFT button to lighten green tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

### White balance (Blue)
Press POINT LEFT button to lighten blue tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

### Sharpness
Press POINT LEFT button to soften the image, and POINT RIGHT button to sharpen the image. (From 0 to 31.)

### Gamma
Press either POINT LEFT button or POINT RIGHT button to obtain better balance of contrast. (From 0 to 15.)

### Noise reduction
Press POINT LEFT/RIGHT button(s) to change noise reduction mode. Dialog box display is changed to “On” to reduce noise (rough parts) of image. Press POINT LEFT/RIGHT button(s) again, to change noise reduction mode to off.

### Progressive scan
Press POINT LEFT/RIGHT button(s) to change progressive scan mode. Dialog box display is changed to “Off” and progressive scan mode to off. Press POINT LEFT/RIGHT button(s) again, progressive scan mode to on.

NOTE:
Tint cannot be adjusted when the video system is PAL, SECAM, PAL-M or PAL-N.
Noise Reduction cannot be operated when the video signal types and systems as follow.
- Composite video signal (SECAM, NTSC4.43, PAL-M and PAL-N systems).
- S-video signal (SECAM, PAL-M and PAL-N systems).
- Component video signal.
Progressive cannot be operated when “480p”, “575p”, “720p”, “1035i” or “1080i” is selected on AV SYSTEM MENU (P31).
3

To store manually preset image level, move a red frame pointer to Store icon and press SET button. The message "OK?" will appear. Select [Yes] to store manual adjustment. To set this manual adjustment, select Custom by pressing IMAGE button or through IMAGE SELECT MENU (refer to P32).

Other icons operates as follows.

- Reset
  Reset all adjustment to previous figure.

- Quit
  Closes IMAGE MENU.

PICTURE SCREEN ADJUSTMENT

This projector has a picture screen resize function, which enables you to display the desirable image size.

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SCREEN Menu icon.

2 Press POINT DOWN button and move a red frame pointer to the function that you want to select and then press SET button.

- Normal
  Provides image at a normal video aspect ratio of 4 : 3.

- Wide
  Provides image at a wide screen ratio of 16 : 9.

SCREEN MENU

- Normal

Move the red frame to the function and press SET button.

NOTE: SCREEN Menu cannot be operated when "720p," "1035i," or "1080i" is selected on AV SYSTEM Menu (P31).
SETTING MENU

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red-frame pointer to SETTING icon.

2. Press POINT DOWN button to move a red-frame pointer to the item that you want to set and then press SET button. Setting dialog box appears.

Language
Language used in ON-SCREEN MENU is selectable from among English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Chinese, Korean and Japanese.

Keystone
When the image is distorted vertically, select Keystone. ON-SCREEN MENU disappears and Keystone dialog box is displayed. Correct keystone distortion by pressing POINT UP/DOWN button(s). Refer to KEYSTONE ADJUSTMENT on page 20.

Blue back
When this function is “On,” this projector will produce a blue image instead of the video noise on the screen when any input source is unplugged or turned off.

Display
This function decides whether to display On-Screen Displays.

   On … shows all the On-Screen Displays.
   Off … sets On-Screen Displays disappeared except;
       • ON-SCREEN MENU
       • “Power off?” message

Logo
When this function is “On,” projector displays our logo when starting up.

Ceiling
When this function is “On,” picture is top / bottom and left / right reversed. This function is used to project the image from a ceiling mounted projector.

Rear
When this function is “On,” picture is left / right reversed. This function is used to project the image to a rear projection screen.
**Power management**

This function turns Projection Lamp off when this projector detects signal interruption and is not used for a certain period in order to reduce power consumption and maintain the Lamp-life. (This projector is shipped with this function ON.)

Power Management function operates to turn Projection Lamp off when the input signal is interrupted and any button is not pressed over 5 minutes. This function operates as follows:

1. When any input signal is interrupted, “No signal” and the counting down display appears (for 5 minutes).
2. After counting down for 5 minutes, projector lamp and READY indicator are turned off.
3. When READY indicator flashing, Projection Lamp can be turned on again (Power Management mode).

In this Power Management mode, Projection Lamp is automatically turned on when the input signal connected or projector is operated with any button on Top Control or on Remote Control Unit again.

**On start**

When this function is “On,” projector is automatically turned on just by connecting AC Power cord to a wall outlet.

Note: Be sure to turn projector off properly (refer to the section “TURNING OFF THE PROJECTOR” on P19). If projector is turned off in the wrong steps, On Start function does not operate properly.

**Remote control**

This projector has two different remote control codes; the factory-set normal code (Code 1) and the secondary code (Code 2). This switching function prevents remote control operation mixture (jam) when operating several projectors or video equipment together.

When operating projector in “Code 2,” both projector and Remote Control Unit must be switched to “Code 2.”

**To change the code of Projector:**
Set Remote control in the SETTING MENU to “Code 2.”

**To change the code of the Remote Control Unit:**
Press both MENU and IMAGE buttons on Remote Control Unit together for over 10 seconds.

After changing the code, make sure Remote Control operates properly.

To return to the normal code (Code 1), operate both projector and Remote Control in the ways above again.

NOTE: When batteries of Remote Control Unit are replaced or ALL-OFF switch is turned to “ALL-OFF,” the remote transmit code automatically returns to the normal code (Code 1).

**Lamp counter reset**

This function is used to reset Lamp Replace Counter. When replacing Projection Lamp, reset Lamp Replace Counter by using this function. Refer to page 39 for operation.
OPERATING WIRELESS MOUSE

This Projector is equipped with USB port for interactive operation between a projector and computer. Set mode following steps below.

**USB**

Wireless Mouse mode
Select " " when controlling a computer with Remote Control of this projector.

Projector mode
Select " " when controlling a projector with computer.

NOTE: Before you control a projector by computer, install USB driver (optionally sold parts) and set up computer following instruction in USB driver package. Contact your authorized dealer.

---

OPERATING WIRELESS MOUSE

Wireless Remote Control Unit is not only able to operate this projector but also usable as a wireless mouse for most Personal Computers. POINT buttons and two CLICK buttons are used for wireless mouse operation.

This Wireless Mouse function is available only when PC mouse pointer is displayed on a projected screen. When ON-SCREEN MENU or any message / dialog box is displayed on the screen instead of PC mouse pointer, this Wireless Mouse function cannot be used.

**INSTALLATION**

To use Wireless Remote Control Unit as Wireless Mouse for a Personal Computer, installation of the mouse driver (not supplied) is required. Make sure that the mouse driver is properly installed in your computer. And make sure that the mouse port (or USB port) of a Personal Computer is activated.

1. Connect the mouse port (or USB port) of your computer to Control Port (or USB connector) of this projector with Control Cable (or USB cable). (Refer to page 11, 12 for connection.)

2. Turn the projector on first, and then turn on your computer. When the computer is switched on first, Wireless Mouse may not work properly.

**NOTE:** When your computer has no mouse port, connect Serial Port of your computer to Control Port of the projector with Control Cable for Serial Port (not supplied).

---

OPERATING WIRELESS MOUSE

When controlling a PC mouse pointer, operate Wireless Mouse with POINT button, SET button, and RIGHT CLICK button on Wireless Remote Control Unit.

**POINT button**
Used to move PC mouse pointer. The pointer is moved corresponding with the direction you are pressing.

**SET (LEFT CLICK) button**
This button has the same function as the left button in a PC mouse.

**RIGHT CLICK button**
This button has the same function as the right button in a PC mouse. This button is not available for controlling this projector.
MAINTENANCE

WARNING TEMP. INDICATOR

WARNING TEMP. Indicator flashes red when an internal temperature of a projector exceeds the normal temperature. This Indicator stops flashing when the temperature of a projector returns to normal. When WARNING TEMP. Indicator continues to flash, check the items listed below.

1 Ventilation Slots of the projector may be blocked. In such an event, reposition the projector so that Ventilation Slots are not obstructed.

2 Air Filter may be clogged with dust particles. Clean Air Filter by following the section AIR FILTER CARE AND CLEANING below.

3 If WARNING TEMP. Indicator remains on after performing the above checks, Cooling Fans or the Internal Circuits may be malfunctioning. Contact service personnel from an authorized dealer or a service station.

AIR FILTER CARE AND CLEANING

Removable Air Filter prevents dust from accumulating on the surface of Projection Lens and Projection Mirror. Should Air Filter become clogged with dust particles, it will reduce Cooling Fans’ effectiveness and may result in internal heat build up and adversely affect the life of the projector. Clean Air Filter following the steps below:

1 Turn off the projector, and disconnect AC power cord from the AC outlet.

2 Turn the projector upside down and remove Air Filter (2 used) by pulling the latches upward.

3 Clean Air Filter with a brush or wash out dust and particles.

4 Replace Air Filter properly. Make sure that Air Filter is fully inserted.

CAUTION

Do not operate the projector with Air Filter removed. Dust may accumulate on LCD Panel and Projection Mirror degrading picture quality. Do not put small parts into Air Intake Vents. It may result in malfunction of the projector.

RECOMMENDATION

We recommend avoiding dusty/smoky environments when operating a projector. Usage in these environments may cause poor image quality.

When using under dusty or smoky conditions, dust may accumulate on a lens, liquid crystal panels, or optical elements inside the projector. This condition may degrade the quality of a projected image. When the above symptoms are noticed, contact your authorized dealer or service station for proper cleaning.

CLEANING PROJECTION LENS

Follow these steps to clean Projection Lens:

1 Apply a non-abrasive camera lens cleaner to a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents or other harsh chemicals might scratch a surface.

2 Lightly wipe a cleaning cloth over Projection Lens.

3 When the projector is not in use, replace Lens Cover.
When the life of Projection Lamp of this projector draws to an end, LAMP REPLACEMENT indicator lights yellow. When a projected image becomes dark or the color of an image becomes unnatural, replacement of Projection Lamp is required.

Follow these steps to replace the lamp assembly.

1. Turn off the projector and disconnect AC plug. Allow the projector to cool for at least 45 minutes.
2. Remove 2 screws with a screwdriver and open the Lamp Cover.
3. Loosen 2 screws with a screwdriver and pull out Lamp Assembly by grasping Handle.
4. Replace Lamp Assembly with a new one and tighten 2 screws back. Make sure that Lamp Assembly is set properly. Replace Lamp Cover and tighten 2 screws.
5. Connect AC Power Cord to the projector and turn it on.
6. Reset Lamp Replace Counter (refer to the section “Lamp Replace Counter” below).

**NOTE**: Do not reset Lamp Replace Counter when Projection Lamp is not replaced.

**ORDER REPLACEMENT LAMP**
Replacement Lamp can be ordered through your dealer. When ordering Projection Lamp, give the following information to the dealer.

- Model No. of your projector : LV-7545
- Replacement Lamp Type No. : LV-LP13 (610 293 5868)

**LAMP REPLACE COUNTER**
Be sure to reset Lamp Replace Counter when Lamp Assembly is replaced. When Lamp Replace Counter is reset, LAMP REPLACE Indicator stops lighting.

1. Turn projector on, press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SETTING Menu icon (refer to page 35, 36).
2. Press POINT DOWN button to move a red frame pointer to “Lamp counter reset” and then press SET button. The message “Lamp replace counter reset?” is displayed. Move the pointer to [Yes] and then press SET button.
3. Another confirmation dialog box appears and select [Yes] to reset Lamp Replace Counter.

Do not reset Lamp Replace Counter except after Projection Lamp is replaced.
# TROUBLESHOOTING

Before calling your dealer or service center for assistance, check the matters below once again.

1. Make sure you have connected a projector to your computer or video equipment as described in the section "CONNECTING THE PROJECTOR" on pages 11 ~ 13.
2. Check cable connection. Verify that all computer, video and power cord are properly connected.
3. Verify that all power is switched on.
4. If a projector still does not produce an image, re-start your computer.
5. If an image still does not appear, unplug a projector from your computer and check your computer monitor's display. The problem may be with your graphics controller rather than with a projector. (When you reconnect a projector, be sure to turn the computer and monitor off before you power up the projector. Power the equipment back on in order of : Projector and computer.)
6. If the problem still exists, check following chart.

<table>
<thead>
<tr>
<th>Problem:</th>
<th>Try these Solutions</th>
</tr>
</thead>
</table>
| No power. | ● Plug a projector into your AC outlet.  
| | ● Make sure READY Indicator lights.  
| | ● Wait 90 seconds after a projector is turned OFF when turning a projector back on.  
| | NOTE : After pressing Power ON-OFF button to OFF, make sure a projector works as follows:  
| | 1. LAMP indicator lights bright and READY indicator turns off.  
| | 2. After 90 seconds, READY indicator lights green again and a projector may be turned on by pressing Power ON-OFF button.  
| | ● Check WARNING TEMP. indicator. If this indicator flashes red, a projector cannot be turned on.  
| | (See "TURNING ON/OFF PROJECTOR" section on page 19.)  
| | ● Check Projection Lamp. (Refer to page 39.) |
| Image is out of focus. | ● Adjust focus of a projector.  
| | ● Make sure a projection screen is at least 4.6' (1.4m) from the projector.  
| | ● Check Projection Lens to see if it needs cleaning.  
| | NOTE : Moving a projector from a cool temperature location to a warm temperature location may result in moisture condensation on Projection Lens. In such an event, leave a projector OFF and wait until condensation disappears. |
| Picture is Left/Right reversed. | ● Check Ceiling / Rear feature. (See “SETTING” section on page 35.) |
| Picture is Top/Bottom reversed. | ● Check Ceiling feature. (See “SETTING” section on page 35.) |
| Some displays are not seen during the Operation. | ● Check Display feature.(See “SETTING” section on page 35.) |
| No image. | ● Check connection between your computer or video equipment and a projector.  
| | ● Check NO SHOW function. (Refer to P21.)  
| | ● When turning a projector on, it takes about 30 seconds to display an image.  
| | ● Check the system that you select is corresponding with your computer or video equipment.  
| | ● Make sure the temperature is not out of the Operating Temperature (5°С ~ 35°С). |
| No sound. | ● Check audio cable connection from audio input source.  
| | ● Adjust the audio source.  
| | ● Press VOLUME (+) button.  
| | ● Press MUTE button. |
**APPENDIX**

<table>
<thead>
<tr>
<th>Problem:</th>
<th>Try these Solution</th>
</tr>
</thead>
</table>
| Remote Control Unit does not work. | - Check the batteries.  
- Check ALL-OFF switch on Remote Control Unit is set to “ON.”.  
- Make sure nothing is between Infrared Remote Receiver and Remote Control Unit.  
- Make sure you are not too far from a projector when using Remote Control Unit. Maximum operating range is 16.4’ (5m).  
- Make sure the code of Remote Control is set to conform to projector. (See “SETTING” section on page 35, 36.) |
| Wireless Mouse function does not work. | - Check cable connection between a projector and your computer.  
- Check the mouse setting on your computer.  
- Turn a projector on before turning on a computer. |

**WARNING :**  
High voltages are used to operate this projector. Do not attempt to open the cabinet.

If the problem still persists after following all operating instructions, contact the sales dealer where you purchased the projector or the service center. Give the model number and explain the difficulty. We will advise you how to obtain service.
