## INDUSTRIES/MARKETS

- Small, medium, and large offices within any industry
- Central Reprographics Departments
- Government and Public Administration
- Education
- Financial Services
- Government
- Healthcare
- Legal

## BENEFITS

- Streamlined workflow
- Extraordinary color and crisp black-and-white output
- Increased productivity
- Greater control of critical information

Canon's full line of Office Solutions include imageRUNNER ADVANCE, imageRUNNER, LASER CLASS, and imageCLASS multifunction solutions and printers; imageFORMULA document scanning and check transport solutions; and Canon and third-party software. Canon provides the solutions you need to help optimize business workflow.

## DID YOU KNOW?

Canon combines its exclusive technologies to deliver low energy use for imageRUNNER ADVANCE models while also maintaining fast warm-up times for high productivity.

# OFFICE SOLUTIONS

## MULTIFUNCTION SOLUTIONS

imageRUNNER ADVANCE C9280 PRO  
shown with optional accessories

### HIGH-VOLUME COLOR

These high-speed, high-performance digital color multifunction systems can satisfy the demanding needs of CRDs and high-volume office environments.

#### KEY FEATURES

- Exceptional speed and performance
- Robust finishing options
- Impressive color

#### AVAILABLE MODELS

- imageRUNNER ADVANCE C9280 PRO
- imageRUNNER ADVANCE C9270 PRO

imageRUNNER ADVANCE 8285  
shown with optional accessories

### HIGH-VOLUME BLACK AND WHITE

With blazing speed and outstanding performance, these digital monochrome multifunction models will help users unleash the powerful productivity required in high-volume office environments.

#### KEY FEATURES

- Robust productivity
- Easy operation
- Amazing versatility

#### AVAILABLE MODELS

- imageRUNNER ADVANCE 8205
- imageRUNNER ADVANCE 8295
- imageRUNNER ADVANCE 8285

**imageRUNNER ADVANCE C5255**  
shown with optional accessories

## MID-VOLUME COLOR

These digital multifunction models rapidly print, copy, fax, scan, and distribute documents to help drive your organization to new levels of performance and productivity.

### KEY FEATURES

- Streamlined workflow
- Intuitive operation
- Mobile solutions

### AVAILABLE MODELS

- imageRUNNER ADVANCE C7270
- imageRUNNER ADVANCE C7260
- imageRUNNER ADVANCE C5255
- imageRUNNER ADVANCE C5250
- imageRUNNER ADVANCE C5240A
- imageRUNNER ADVANCE C5235A

**imageRUNNER ADVANCE 6275**  
shown with optional accessories

## MID-VOLUME BLACK AND WHITE

Engineered for mid-volume, black-and-white environments, these digital multifunction models can rapidly print, copy, fax, scan in color, and distribute documents to help enhance efficiency.

### KEY FEATURES

- Powerful performance
- Efficient workflow
- Intuitive operation

### AVAILABLE MODELS

- imageRUNNER ADVANCE 6275
- imageRUNNER ADVANCE 6265
- imageRUNNER ADVANCE 6255
- imageRUNNER ADVANCE 4251
- imageRUNNER ADVANCE 4245
- imageRUNNER ADVANCE 4235
- imageRUNNER ADVANCE 4225

# OFFICE SOLUTIONS

## MULTIFUNCTION SOLUTIONS

**imageRUNNER ADVANCE C2230**  
shown with optional accessories

### WORKGROUP COLOR

These impressive multifunction models deliver exceptional output in both monochrome and brilliant color. Plus, they're small enough to fit in most compact environments.

#### KEY FEATURES

- Powerful performance in a compact size
- Intuitive and easy-to-read control panels
- User-friendly operation with simple maintenance

#### AVAILABLE MODELS

- imageRUNNER ADVANCE v
- imageRUNNER ADVANCE C2225
- imageRUNNER ADVANCE C350iF
- imageRUNNER ADVANCE C250iF

**imageRUNNER ADVANCE 500iF**  
shown with optional accessories

### WORKGROUP BLACK AND WHITE

These compact, monochrome, multifunction models deliver digital copying, network printing, and color scanning with available finishing, sending, and faxing capabilities to meet the needs of small- to mid-size offices, workgroups, and fleets.

#### KEY FEATURES

- Powerful black-and-white output for small spaces
- Color scanning and network printing
- Simple to manage for fleet deployments

#### AVAILABLE MODELS

- imageRUNNER ADVANCE 500iF
- imageRUNNER ADVANCE 400iF
- imageRUNNER 2530
- imageRUNNER 2525
- imageRUNNER 1730
- imageRUNNER 1730iF
- imageRUNNER 1025
- imageRUNNER 1025N
- imageRUNNER 1025iF

## PRINT CONTROLLER/FACSIMILE SOLUTIONS

ColorPASS-GX400

### ColorPASS/imagePASS CONTROLLERS

**ColorPASS** imagePASS

Canon's ColorPASS and imagePASS print solutions offer advanced tools and utilities designed to increase print processing power and productivity. These print controllers help users achieve accurate, consistent color or crisp black and white, and offer impressive job management capabilities.

#### KEY FEATURES

- Robust processing capabilities for increased printing speed
- Exceptional image quality
- Expert level control over document workflow

#### AVAILABLE MODELS

- ColorPASS-GX400
- imagePASS-A2
- imagePASS-B2
- imagePASS-U2

LASER CLASS 830i

### FACSIMILE

**LASER CLASS**

The Canon LASER CLASS facsimile products are ideal for use by virtually any size organization. Send and receive information that helps to drive your business.

#### KEY FEATURES

- Super G3 technology
- Printing options available up to 35 ppm (Letter)
- Advanced fax features

#### AVAILABLE MODELS

- LASER CLASS 830i
- LASER CLASS 810
- LASER CLASS 650i

# OFFICE SOLUTIONS

## LASER PRINTER SOLUTIONS

Color imageRUNNER LBP5480

### COLOR LASER

The Color imageRUNNER LBP Series of color desktop laser printers are built with the advanced technology users demand. They're designed to offer excellent productivity on their own or as a complement to imageRUNNER multifunction solutions.

#### KEY FEATURES

- Vibrant color printing for busy workgroups
- Standard duplex printing
- Extensive device and fleet management tools

#### AVAILABLE MODELS

- Color imageRUNNER LBP5480
- Color imageRUNNER LBP5280

imageRUNNER LBP3580

### BLACK-AND-WHITE LASER

The imageRUNNER LBP monochrome desktop laser printers have the productivity and advanced technology users demand on their own or as a complement to imageRUNNER multifunction solutions. These models allow auto-duplexing and produce exceptional image quality.

#### KEY FEATURES

- Network connectivity standard
- Standard UFR II, PCL, and Adobe® PostScript® 3™ printing
- Extensive device and fleet management tools

#### AVAILABLE MODELS

- imageRUNNER LBP3580
- imageRUNNER LBP3480

# ACCESSIBILITY AND SECURITY SOLUTIONS

LCD control panels can “reverse” to increase visibility.

Voice Operation Kit helps to simplify input of commands for users with low vision and/or limited mobility.

ADF Access Handle enables seated users to operate the device.

## ACCESSIBILITY

Designed for the senior workforce and those with disabilities, Canon accessibility solutions remove some common barriers associated with operating office equipment. These solutions are available on a number of Canon MFPs and aim to help everyone benefit from Canon technology and all it offers, regardless of their ability.

### KEY FEATURES

- **Visual** – control devices with voice operation and guidance
- **Mobility** – access and operate equipment remotely
- **Dexterity** – easily access paper drawers and/or document feeders

### AVAILABLE SOLUTIONS\*

#### Standard

- Remote User Interface
- Slide-and-tilt control panel
- Reverse display for control panel
- User-friendly control panel

#### Optional

- Remote Operator’s Software Kit
- Voice Operation Kit
- Voice Guidance Kit
- Braille Label Kit
- Accessibility Handle

## SECURITY

When considering information security, both physical and digital access must be carefully evaluated. Canon’s security solutions and services help users address the protection of documents and information. They help to secure sensitive information through device, document and network security options.

### KEY FEATURES

- **Device Security** – authentication and protection of data written to internal device hard disk drives
- **Document Security** – secure printing via access control, document password protection, encryption, document rights management, and audit capabilities
- **Network Security** – secure device communication on the network through control of ports, protocols, and PC access

### AVAILABLE SOLUTIONS\*

- Authentication
- Secure, Follow-Me Printing
- Document and disk encryption
- Secure mobile printing
- Data overwrite and removal
- Access management
- Secure audit
- IEEE2600.1 Certification
- Additional solutions

### AVAILABLE SERVICES

- MFP Security Consultation and Policy Design
- Security Software Implementation Services:
  - ▶ uniFLOW
  - ▶ imageWARE Secure Audit Manager
  - ▶ Access Management System
  - ▶ User Authentication
  - ▶ Authorized Send
  - ▶ Additional services

\* Some solutions are available as either standard or optional equipment, depending on the model, and some features are not available on all models. Please check with your local Canon Authorized Dealer for more details.

# OFFICE SOLUTIONS

## DESKTOP SOLUTIONS

Color imageCLASS MF8580Cdw

### COLOR LASER MULTIFUNCTION PRINTERS

#### Color imageCLASS

Canon's color imageCLASS multifunction printers generate impressive, cost-effective color documents. These devices are excellent for offices that demand professional results.

#### KEY FEATURES

- Wireless and/or network connectivity
- Excellent color technology
- Seamless navigation

#### AVAILABLE MODELS

- Color imageCLASS MF8580Cdw
- Color imageCLASS MF8280Cw

Color imageCLASS LBP7110Cw

### LASER PRINTERS

#### imageCLASS

Canon's line of imageCLASS color and black-and-white laser printers delivers the high-quality results necessary for business printing—a must for all business types.

#### KEY FEATURES

- Remarkable quality
- Outstanding speed and performance
- Seamless navigation

- Color imageCLASS LBP7780Cdn
- Color imageCLASS LBP7660Cdn
- Color imageCLASS LBP7110Cw
- imageCLASS LBP6780dn
- imageCLASS LBP6670dn
- imageCLASS LBP6230dw
- imageCLASS LBP6030w

imageCLASS MF229dw

## BLACK-AND-WHITE LASER MULTIFUNCTION PRINTERS

### imageCLASS

Canon imageCLASS black-and-white laser multifunction printers deliver key capabilities for businesses looking for improved efficiency and productivity.

#### KEY FEATURES

- Versatile and durable
- Compact and easy to use
- Combines functionality of up to four machines into one footprint

#### AVAILABLE MODELS

- imageCLASS MF229dw
- imageCLASS MF227dw
- imageCLASS MF216n
- imageCLASS MF212w
- imageCLASS MF6180dw
- imageCLASS MF6160dw

FAXPHONE L190

## FAXPHONE

### FAXPHONE

Canon FAXPHONE models combine easy to use fax functions and convenience in one compact device.

#### KEY FEATURES

- Approximately 33.6 Kbps Super G3 fax for quick results
- Versatile and easy to use
- Low energy consumption in Energy Saver mode

#### AVAILABLE MODELS

- FAXPHONE L190
- FAXPHONE L100

imageCLASS D530

## MULTIFUNCTION COPIERS

### imageCLASS

The imageCLASS multifunction copier line offers reliability, ease of use, and a broad range of features ideal for home offices as well as small to medium businesses. These devices provide outstanding image quality and durability.

#### KEY FEATURES

- Speedy copying and printing
- High-quality output
- Easy to use

#### AVAILABLE MODELS

## DOCUMENT SCANNING SOLUTIONS

imageFORMULA P-208 Scan-tini

### MOBILE DOCUMENT SCANNERS

Canon's line of imageFORMULA P-Series mobile scanners allows Small Office/Home Office users, telecommuters, and "road warriors" to improve personal efficiency and individual productivity. They're great for individual or shared use for general purpose, distributed scanning tasks—from the convenience of any location.

#### KEY FEATURES

- Highly portable and mobile
- Small, lightweight
- Easy to use
- "Plug-and-Scan"

#### AVAILABLE MODELS

- imageFORMULA P-215II Scan-tini
- imageFORMULA P-208 Scan-tini

imageFORMULA DR-M1060

imageFORMULA DR-C225

### OFFICE DOCUMENT SCANNERS

Canon's line of imageFORMULA DR-Series office scanners enables small- to medium-size businesses and large enterprises alike to distribute document capture closer to the work itself. They're typically used by individuals or small groups for ad hoc, general purpose scanning and some decentralized production scanning tasks.

#### KEY FEATURES

- Compact and desktop-friendly
- Outstanding value
- Good for individual, workgroup, or departmental use
- Robust functionality
- Universal models with flatbed and ADF available

#### AVAILABLE MODELS

- imageFORMULA DR-6030C
- imageFORMULA DR-6010C
- imageFORMULA DR-M160II
- imageFORMULA DR-M140
- imageFORMULA DR-M1060
- imageFORMULA DR-3010C
- imageFORMULA DR-C225
- imageFORMULA DR-C130

#### Universal Office Scanner

- imageFORMULA DR-F120

imageFORMULA ScanFront 330

imageFORMULA DR-G1130

## NETWORKED DOCUMENT SCANNERS

The Canon imageFORMULA ScanFront Series of networked scanners is ideal for decentralized or distributed scanning applications as well as easy document sharing via a network.

### KEY FEATURES

- Easy to use and manage
- Secure
- Some models can operate as stand-alone solutions

### AVAILABLE MODELS

- imageFORMULA ScanFront 330
- imageFORMULA ScanFront 300P CAC/PIV
- imageFORMULA ScanFront 300P
- imageFORMULA ScanFront 300
- imageFORMULA ScanFront 300eP
- imageFORMULA ScanFront 300e

## PRODUCTION DOCUMENT SCANNERS

Canon's line of imageFORMULA DR-Series production scanners is designed to maximize productivity in high-volume, centralized data capture environments. These scanners maintain document integrity at rapid speeds for document conversion and content management.

### KEY FEATURES

- High-speed scanning and reliable feeding
- Durable design

### AVAILABLE MODELS

- imageFORMULA DR-X10C
- imageFORMULA DR-G1130
- imageFORMULA DR-G1100

imageFORMULA CR-190i

## CHECK TRANSPORTS

The Canon imageFORMULA CR-Series of check transports converts paper checks into electronic images, helping to decentralize payment processing from the first point of presentment to settlement. They can be used in a wide variety of applications, including low-volume teller, branch, and remote deposit/merchant capture as well as high-volume branch and utility capture and remittance/lockbox processing.

### KEY FEATURES

- High speed
- Compact footprint
- Convenient and easy to use

### AVAILABLE MODELS

- imageFORMULA CR-190i
- imageFORMULA CR-135i
- imageFORMULA CR-80
- imageFORMULA CR-50

# OFFICE SOLUTIONS

## SOFTWARE SOLUTIONS

Canon is committed to delivering the products and solutions to help customers meet their digital office needs. As part of this commitment, Canon is working with leading software and hardware companies to offer a breadth of value-add solutions. Canon U.S.A. recognizes the distinctiveness of each business environment and has worked to help develop customized,

targeted solutions that focus on individual workflow needs. As a result, Canon and its development partners have created robust software and hardware solutions to address the unique requirements of the general office as well as various vertical markets, such as Financial Services, Legal, Manufacturing, State and Local Government, Education, and Healthcare.\*

\*See page 40 for more information on vertical market solutions.

## imageWARE

### imageWARE SOLUTIONS

Canon's imageWARE software solutions adapt to support many workflow requirements and help simplify complex tasks while improving enterprise productivity. imageWARE Software gives customers the power to better manage information—for a large variety of form, content, or location. imageWARE solutions offer businesses a smarter way to work.

### MEAP SOLUTIONS

Since the introduction of the Canon Multifunctional Embedded Application Platform (MEAP), many software developers have been delivering unique applications that address a variety of customer needs. Canon's MEAP portfolio—which includes existing and customized solutions developed by Canon and third parties—has helped set Canon apart from the competition by enabling its imageRUNNER and imageRUNNER ADVANCE lines to deliver personalized applications for end users. This not only has paid dividends to customers by improving their workflows, but it has also helped Canon become a recognized leader in digital office solutions.

# SERVICES

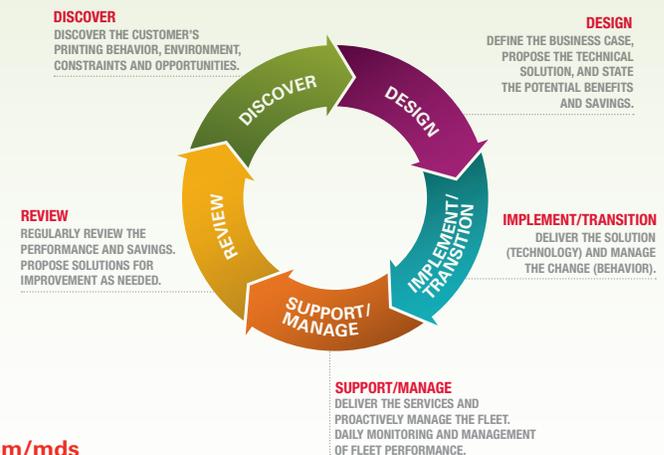

Canon MDS is a unified offering for total output and document solutions management. It consists of complete program customization within your desired time frame, specific to your unique business needs. From the printed page to the electronic document, Canon provides a portfolio of custom services to help you achieve your business goals for cost reduction, improved serviceability, support, and document accessibility.

## Canon's Global Five-Step Cycle

Canon's global Five-Step approach and methodology to MDS provides a single source of accountability at each stage of a managed services engagement, including optimization analysis, design, implementation, service and support, and continuous re-evaluation for business process improvements.

For more information about Canon's MDS, visit [www.usa.canon.com/mds](http://www.usa.canon.com/mds)

## CANON INFORMATION & IMAGING SOLUTIONS

A team of engineers, project managers, and solutions consultants, CIIS delivers market-driven B2B services and solutions to help your organization integrate the right technology and optimize vital business processes.

### PRACTICE AREAS

- **BUSINESS PROCESS AUTOMATION:** CIIS provides detailed analyses of a variety of business processes, along with recommendations for improvement, including efficiencies and cost savings.
- **SALES AND MARKETING AUTOMATION:** Consulting services focus on helping clients to optimize sales and marketing organizations, particularly for companies that use salesforce.com solutions.
- **RECORDS MANAGEMENT CONSULTING:** Assessment, analysis, and design of records classification that can include retention/disposition schedules, and electronic and physical storage and retrieval systems.
- **VISUALIZATION AND PROTOTYPING:** Consulting and implementation services in connection with Canon's "Mixed Reality" technologies that combine the virtual world of computer-generated images with real-world environments.
- **PRINT MANAGEMENT:** This consulting area includes solutions ranging from optimizing print costs, providing authentication, access, control and security, and mobile printing.

## // LOOK FORWARD

### PROFESSIONAL SERVICES

- IMPLEMENTATION SERVICES
- IMAGING SERVICES
- CUSTOM DEVELOPMENT
- SUPPORT SERVICES

CIIS offers custom development utilizing Canon's team of software engineers. It also provides onsite and offsite imaging services, including scanning and digitally archiving back-office file documents and capturing key index attributes. The help desk offers clients premium support, such as off hours and faster response times.

### PRODUCTS

- **ENTERPRISE IMAGING PLATFORM:** This single middleware platform automates complex business processes by integrating enterprise applications and paper-based information flows. Companies can benefit through significant cost savings and increased efficiencies. And they can gain business intelligence by bringing together vital information previously scattered across various back-end systems and/or stored on paper or electronic documents.
- **FORMS AND PRINT SERVICES FOR SALESFORCE:** This solution enables Salesforce users to easily create highly visual, complex reports or documents, and then print them, even on the road!

For more information about Canon's Information and Imaging Solutions, visit [www.ciis.canon.com](http://www.ciis.canon.com).

## LARGE-FORMAT SOLUTIONS

Océ ColorWave 650 printer

### OCÉ LARGE-FORMAT COLOR PRINTERS

#### Océ ColorWave

Océ large-format printing systems provide high-quality output with unmatched productivity in their class for color large-format technical document, GIS, and poster applications. Capacity to support a wide range of media types increases application versatility.

#### KEY FEATURES

- Océ CrystalPoint technology
- 1.2 pL aqueous inkjet technology
- Print up to 6,100 square feet of color production per hour
- Two to six rolls of 650' media
- Up to 13,500 square feet of media capacity
- Up to 1600 x 1600 dpi

#### AVAILABLE MODELS

- Océ ColorWave 900
- Océ ColorWave 650
- Océ ColorWave 300

Océ PlotWave 900 printer

### OCÉ LARGE-FORMAT MONOCHROME PRINTERS

#### Océ PlotWave

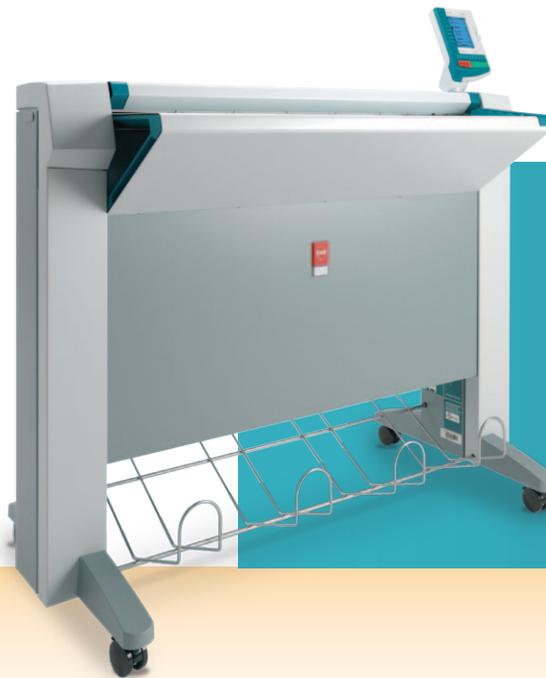

Océ black-and-white large-format technical document printers and multifunction systems consistently deliver impressive, comprehensive large-format document printing and management solutions that help optimize your document workflow.

#### KEY FEATURES

- Océ Radiant Fusing technology
- Océ Copy Press technology
- Print speeds from 9.5 to 43 linear feet per minute
- Online media capacity from two to six rolls of 650' media
- Multiple finishing options, including top-mounted stacking for collated output

#### AVAILABLE MODELS

- Océ PlotWave 900
- Océ PlotWave 750
- Océ PlotWave 500
- Océ PlotWave 360
- Océ PlotWave 340

Océ TC4 scanner

## OCÉ LARGE-FORMAT SCANNERS

### Océ

Fast, high-quality large-format scanners produce color and monochrome large-format documents, geographical maps, and drawings. Océ large-format scanners use various patented technologies, such as Océ Image Logic, to help ensure optimal quality while saving time with minimal operator intervention.

#### KEY FEATURES

- Océ Image Logic technology
- Easy, precision wide-format scanning
- Seamless integration with Océ printers
- Ideal for color archiving applications

#### AVAILABLE MODELS

##### Stand-alone Large-format Color Scanners

- Océ TC4
- Océ TC4XT

##### Microfilm Aperture Card Scanner

- Océ 3050

Océ Arizona 660 GT printer

## OCÉ DISPLAY GRAPHICS PRINTERS

### Océ Arizona

Océ display graphics printers offer print providers effective, large-format printing solutions for indoor and outdoor color applications like banners, signs, floor graphics, packaging, decor, promotional items, backlit and point-of-purchase displays, and so much more.

#### KEY FEATURES

- True stationary flatbed versatility at an affordable price
- Spot varnish and white ink capability for backlits or printing onto colored objects
- Near-photographic image quality
- Prints directly to rigid substrates and to roll media if the Roll Media option is purchased

#### AVAILABLE MODELS

- Océ Arizona 318 GL
- Océ Arizona 440 GT
- Océ Arizona 440 XT
- Océ Arizona 460 GT
- Océ Arizona 460 XT
- Océ Arizona 480 GT
- Océ Arizona 480 XT
- Océ Arizona 660 GT

**varioPRINT 135**  
shown with optional accessories

### CUT-SHEET MONOCHROME DIGITAL PRESSES

Océ VarioPrint

The Océ VarioPrint 6000+ Line provides unmatched productivity and reliability for ultra high-volume monochrome printing. It features Océ Gemini Instant Duplex technology, which lets you print more jobs faster, helping increase revenue through increased throughput and reduced turnaround time.

Canon's imagePRESS black-and-white digital presses deliver uncompromising image quality, text quality, productivity, and versatility.

The Canon varioPRINT 135/120/110 monochrome digital presses pair Océ DirectPress technology and PRISMAsync operations management with Canon's in-line finishing for a unified solution that pushes print productivity even higher.

#### KEY FEATURES

- Advanced feeding technologies
- Robust in-line finishing capabilities
- Sustainability

#### AVAILABLE MODELS

- Océ VarioPrint 6320 Ultra+/TP+\*
- Océ VarioPrint 6250 Ultra+/TP+/MICR+\*
- Océ VarioPrint 6200 Ultra+/TP+/MICR+\*
- Océ VarioPrint 6160 Ultra+/TP+/MICR+\*
- imagePRESS 1135+
- imagePRESS 1125+
- imagePRESS 1110+
- varioPRINT 135\*
- varioPRINT 120\*
- varioPRINT 110\*

\* These models offer PRISMAsync operation management.

**Océ ColorStream 3500**  
may be shown with  
optional accessories

## CONTINUOUS-FEED COLOR DIGITAL PRESSES

Océ high-speed digital color inkjet platforms address a wide range of applications like transaction, direct mail, books, and manuals. Graphic arts and corporate enterprise environments can count on proven, scalable customized solutions backed by unparalleled, award-winning service and support.

### KEY FEATURES

- Modular and upgradable offerings for business growth and new applications
- Based on proven Océ DigiDot inkjet and Océ SRA controller technology
- Consistent quality at production speeds
- Media flexibility for a variety of job types
- Full AFP color management

### AVAILABLE MODELS

#### Océ JetStream Dual Series

- Océ JetStream 3000
- Océ JetStream 2200
- Océ JetStream 1500

#### Océ JetStream Compact Series

- Océ JetStream 1900
- Océ JetStream 1400
- Océ JetStream 1000

#### Océ JetStream Wide Series

- Océ JetStream 5500
- Océ JetStream 4300
- Océ JetStream 3300

#### Océ ColorStream 3000 Twin Series

- Océ ColorStream 3900
- Océ ColorStream 3700
- Océ ColorStream 3500
- Océ ColorStream 3200

**Océ JetStream 5500**  
may be shown with  
optional accessories

## CONTINUOUS-FEED MONOCHROME DIGITAL PRESSES

Océ high-speed digital monochrome platforms set a completely new standard in speed and non-stop printing performance. Stunning print quality options, a host of advanced handling features, and incredible configuration flexibility combine to deliver true production performance supported by market-leading service and support.

### KEY FEATURES

- Simplex, duplex, and triplex configurations
- Versatile performance for book, transactional, and direct mail applications
- Powerful Océ SRA controller technology
- Robust paper transport and enhanced media flexibility

### AVAILABLE MODELS

#### Océ VarioStream

- Océ VarioStream 8750
- Océ VarioStream 8650
- Océ VarioStream 8550
- Océ VarioStream 7650
- Océ VarioStream 7550
- Océ VarioStream 7450
- Océ VarioStream 7300
- Océ VarioStream 7200
- Océ VarioStream 7120

#### Océ JetStream

- Océ JetStream 5500 mono
- Océ JetStream 4300 mono
- Océ JetStream 3300 mono
- Océ JetStream 2300 mono

#### Océ ColorStream

- Océ ColorStream 10000

# PRINTING SOLUTIONS

## SERVER SOLUTIONS FOR CUT-SHEET DIGITAL PRESSES

### PRISMAsync CONTROLLER

The PRISMAsync controller makes handling complex print jobs easy. An intuitive user interface with intelligent Job Scheduler displays every queued job and an overview of the day's work schedule. One or more PRISMAsync driven digital presses can be managed and monitored remotely with the new Web-based PRISMAsync Remote Manager.

#### KEY FEATURES

- Media-driven workflow
- Single point of control
- Efficient task-based workflow
- Total production control
- Full PRISMA software integration
- Intelligent color management
- Highly visual interface for ease of use
- Remote operation and monitoring with the new Web-based PRISMAsync Remote Manager
- DLink option for plug-and-print Xerox® DigiPath® and FreeFlow® Makeready connectivity
- KDKlink connectivity solution option to add VarioPrint 6000+ and varioPRINT DP Line digital presses to Kodak SmartBoard® workflows

#### AVAILABLE ON:

##### PRISMAsync Controller

- imagePRESS C7011VPS
- imagePRESS C6011VPS
- imagePRESS C6011S
- imagePRESS C800
- imagePRESS C700
- VarioPrint 6320 Ultra+/TP+
- VarioPrint 6250 Ultra+/TP+/MICR+
- VarioPrint 6200 Ultra+/TP+/MICR+
- VarioPrint 6160 Ultra+/TP+/MICR+
- varioPRINT 135
- varioPRINT 120
- varioPRINT 110

imagePRESS Server A3300

### imagePRESS SERVERS

## imagePRESS

imagePRESS servers based on EFI™ Fiery® or Creo Color Server technology offer an extensive set of features that help deliver high productivity, powerful image control, and ease of use for high flexibility.

#### KEY FEATURES

- Powerful processing
- Intelligent color management
- Control over document workflow
- Proven integration with EFI and third-party workflows
- Fiery Command WorkStation central operation tool for Fiery technology-based imagePRESS servers

#### AVAILABLE MODELS

##### Color

- imagePRESS Server A3300\*
- imagePRESS Server A2300\*
- imagePRESS Server A1300\*
- imagePRESS CR Server A7300\*\*
- imagePRESS Server F200\*
- imagePRESS Server G100\*

##### Black and White

- imagePRESS Server K200\*
- imagePRESS Server K100\*

# SOFTWARE SOLUTIONS

## OCÉ PRISMA WORKFLOW SOLUTIONS

The Océ PRISMA software solutions are a modular and integrated family of workflow solutions that enables your work to flow faster and more efficiently across a range of printing environments. What's more, it integrates with most print systems and work processes you already have in place to help optimize and streamline your workflow from job submission through completion.

- Océ PRISMAaccess** More efficient order submission and processing

---

- Océ PRISMAprepare™** Simplifies document make-ready from composition through production

---

- Océ DocSetter** Streamlines document scanning and make-ready functions

---

- Océ DPconvert and Océ VPconvert** Conversion of legacy job tickets and files to open standards

---

- Océ TrueProof** WYSIWYG, on-screen prepress proofing system

---

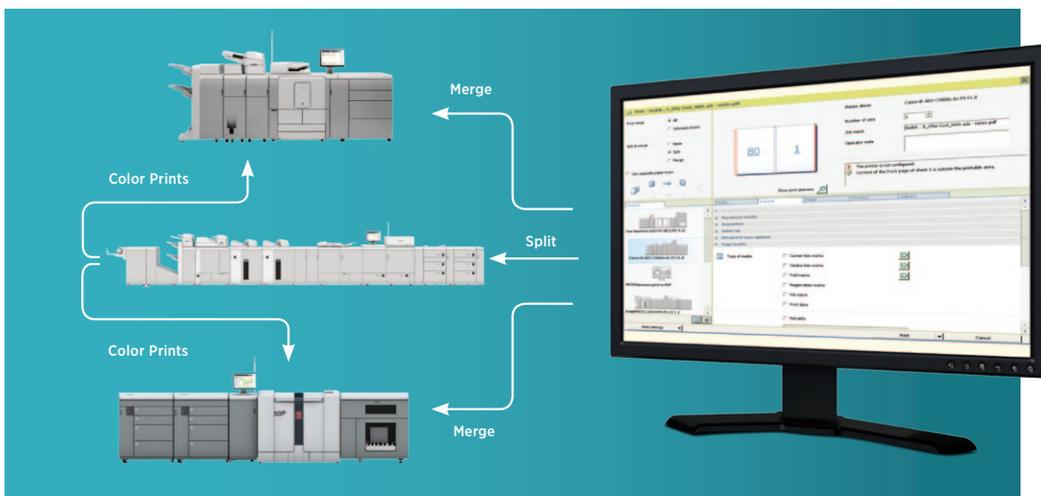

- Océ PRISMAproduction** High-performance workflow and output management

---

- Océ PRISMAproduction Host** High-performance print management software for professional spooling, transmission, and data conversion on the mainframe

---

- Océ PRISMAarchive®** High-volume archiving and retrieval

Océ PRISMAprepare streamlines the splitting and merging of color and black-and-white documents.

# PRINTING SOLUTIONS

## WORKFLOW SOLUTIONS AND SERVICES

As the print market changes, its solutions do, too. Commercial printers, retail quick-print shops, and in-plant production facilities are searching for ways to streamline their operations, maintain existing revenue streams, and generate new business.

Signifying its commitment to the production printing market, Canon has made a significant investment in the imagePRESS and varioPRINT lines of digital presses as well as imagePRESS Workflow Solutions.

The effectiveness of high-speed digital presses is directly related to the scope of the supporting workflow. imagePRESS Workflow Solutions is an extensive portfolio of hardware, software, and services configured to support the essential tasks of your production print business: Job Management, Job Submission, Quality Control, and Value-added Services.

Built to support the depth and breadth of production printing, imagePRESS Workflow Solutions targets key processes in production environments. By helping improve efficiency, accuracy, and automation, imagePRESS Workflow Solutions aims to deliver real value to your organization, allowing management to focus on business growth rather than internal processes.

Legacy systems, established procedures, and industry standards can be complicated initiatives to integrate into your business. Canon's portfolio of software and production solution architects encompasses not only the software, but also the depth of experience needed to help empower your company to run at a high level.

Today's business is about more than just the print. That's why Canon leverages its own Océ PRISMA Workflow Solutions (page 27) along with its strong selection of alliances and business partners. Together, Canon helps deliver strength and distinction to your value-added services portfolio.

Coupled with the Essential Business Builder program, imagePRESS Workflow Solutions portfolio can help propel your business and marketing efforts.

# PHOTO PRODUCTION SOLUTIONS

DreamLabo 5000

## PHOTO PRODUCTION PRINTER

### *DreamLabo 5000*

Canon's first-ever inkjet production photo printer significantly expands the potential of photo printing services. The system utilizes a new FINE high-density print-head technology, realizing color quality rivaling that of conventional silver halide processing. DreamLabo 5000 delivers high-speed printing of high-quality photos and detailed text to support a variety of value-added output, from photo merchandise to high-quality, print-on-demand offerings.

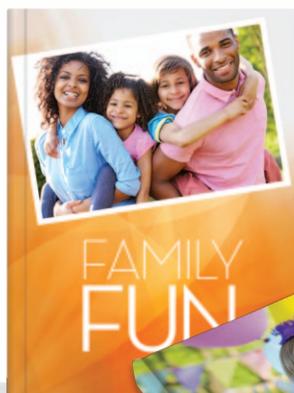

## KEY FEATURES

- 7-color dye-based ink system to produce premium quality photo prints
- High-speed, single-pass double-sided printing
- High productivity that can produce approximately 1,180 8" x 10" single-sided sheets per hour
- A line-up of single- and double-sided papers in a variety of finishes and widths to produce a wide range of photo merchandise
- Double paper magazines for uninterrupted printing

## OPTIONAL ACCESSORY

### FS500 - Film Hinge Processor

Designed to attach a binding hinge to DreamLabo double-sided prints that can be bound to produce FlatSpread lay-flat style photo albums.

# AFTERMARKET PRODUCTS

## CANON GENUINE TONER, PARTS, AND SUPPLIES

### THE GENUINE ADVANTAGE

Canon GENUINE supplies are designed by Canon engineers. They're developed using precise specifications, so you can be confident that your Canon device will produce high-quality results, time and time again. Toner, parts, and supplies are key ingredients for successful printing. Canon GENUINE supplies give you confidence that you'll have high quality throughout the entire printing process, delivering efficiency and minimal downtime for your machine!

#### How to Recognize GENUINE

Canon makes it easy to recognize GENUINE products. Always look for the Canon logo and GENUINE logo on all your supplies. A security seal can be found on all Canon GENUINE toner to help protect consumers against counterfeit products. In addition, each toner box contains a statement about why consumers should use GENUINE supplies and directs them to a Web site to learn how to detect counterfeit products. Canon is dedicated to helping you protect your investment.

#### Canon GENUINE Toner Technology

Canon has used its advanced research and development to create different types of toner to fit the needs of different markets. With Canon GENUINE toner, you can be sure that your device is using the toner that best fits your applications.

#### Canon GENUINE Drum Technology

Drums—metal cylinders coated with a thin photoconductive film—are directly involved in many steps of the printing process. That's why it's critical that they're reliable. Canon GENUINE drums deliver the quality and dependability you need throughout the entire printing process.

- **a-Si Drum:** Designed for high-speed Canon copiers and utilizes a uniform a-Si film over the surface to increase the drum's hardness and durability.
- **a-Si Imaging Assembly:** Developed for high-speed Canon print systems and is combined with many different parts, decreasing the time needed for cleaning and adjustments.
- **E-Drum/Compact E-Drum:** Canon Excellent Drum has an additional overcoat layer that aids in improving stability and productivity in both the production and office markets.
- **OPC Drum:** Canon GENUINE Organophotoconductor (OPC) drums are designed for mid- to low-speed Canon copiers and have exceptional charging characteristics and durability.

#### Toner for Canon Color Devices

<b>Consistently Vivid Toner (CV Toner)</b>	Digital Presses
<b>Pure Quality Toner (pQ Toner)</b>	Office and light production copiers
<b>Vivid Toner (V Toner)</b>	Digital presses
<b>Vivid Toner Clear (V Toner Clear)</b>	Digital presses
<b>Spherical and Synergy Toner (S Toner)</b>	Office color copiers
<b>Quick Fixing Color Toner (QF Color Toner)</b>	Mid-speed color copiers

#### Toner for Canon Black-and-White Devices

<b>Precise Output Toner (pO Toner)</b>	Office and light production copiers
<b>Exact Black Toner (eB Toner)</b>	Digital presses
<b>High-Reliability Toner (HR Toner)</b>	High-speed copiers
<b>Quick Fixing Toner (QF Toner)</b>	Mid-speed copiers

## Canon GENUINE Parts

Canon GENUINE parts are stringently tested using state-of-the-art equipment under many different conditions. Some of the integral parts of a Canon device include fixing and pressure rollers, cleaning blades, cleaning rollers, separation claws, and pick-up rollers. Canon also offers Quality Assurance (QA) kits that are carefully designed for preventative maintenance and to help avoid downtime. These parts are just a few of the components that help to ensure quality throughout the life of your device.

## Canon Specialty Print Media

Canon offers many different types of paper for use with your Canon device. These media are tested and qualified for use with your Canon copier, so you can be assured that it will perform effortlessly. Allow Canon to be your one-stop shop to satisfy all your paper needs!

**Business/Office Papers:** Canon business/office papers offer quality, even with everyday printing. Canon Multi-Purpose Paper and Color Copy Paper are consistent and reliable stocks that are ideal for everyday printing. Canon's commitment to the environment is shown through its recycled paper options.

**Professional Papers:** Canon's professional media options offer terrific choices for high-quality output. Coated Two-Sided Media are available in text and cover options and are impeccable choices when creating professional brochures, manuals, and direct mail.

**Specialty Media:** Create stunning and personalized labels, CDs/DVDs, and Index Tabs with Canon specialty media. These specialized stocks allow you to utilize your Canon device to its maximum potential. Transparencies, Tabs, and Labels will help you create a spectrum of eye-catching results.

## DID YOU KNOW?

Canon offers recycling options for its office consumables, including toner cartridges, toner containers, and waste toner containers.

# MIXED REALITY

## INDUSTRIES/MARKETS

- Architecture
- Training and Simulation
- University Research
- Manufacturing
- Entertainment
- Museums

## BENEFITS

- Boost productivity and speed products to market
- Interact with your designs
- Maximize attention to detail
- Gather development feedback instantly

The Canon MREAL Mixed Reality technology empowers enterprises to seamlessly merge the real and virtual worlds to create an immersive and interactive experience. The mixed reality (MR) experience offers more realism than conventional Virtual Reality, allowing you to actually see, experience, and interact with your designs in real time, from virtually any point of view, and with a life-like sense of scale.

## WITH CANON MIXED REALITY, THERE IS...

### Productivity

Effective Product Lifecycle Management places an emphasis on maximizing productivity to help reduce time to market, optimize designs, improve product quality, and reduce both costs and waste. The Canon MREAL System enables you to:

- develop digital prototypes;
- identify potential design concerns to help reduce prototype iterations;
- incorporate required characteristics quickly; and,
- get products to market sooner.

This enhanced productivity helps you save time, money, and resources.

### Interaction

Make the leap from screen to seen! With the Canon MREAL System, you can more realistically experience, examine, modify, manipulate, discuss, analyze, or present your designs. Experience the image as your ideas come to life. And it lets you emerge from the confines of the CAVE – MR images can be experienced nearly anywhere!

### Attention To Detail

The Canon MREAL System brings users to a 3-D world where—with unprecedented realism—they can interact with a scene, landscape, environment, or object. Designers can closely examine how components manufactured at different locations are expected to come together. Or how light will reflect off the interior trim of a car. See intricate details as you examine the image from virtually any angle.

### Feedback

When the audience is immersed in the MR experience, you gain tremendous insight. Whether collaborating on ideas, discussing new product designs, securing customer input, generating investor interest, winning management buy-in, or just entertaining an audience, the value of MR is priceless.

## THE CANON MIXED REALITY SYSTEM

Canon offers a portfolio of options to immerse the user in the Mixed Reality experience. The system leverages three key components: Canon's proprietary displays; the Canon Mixed Reality Platform Software; and markers or third-party positioning sensors.

### 1. CANON DISPLAYS

The display brings a view of virtual images seamlessly superimposed onto physical, real-world environments. It's available in three form factors: Head Mounted Display (HMD); Hand Held Display (HHD); and Network camera, which provides a third-party perspective.

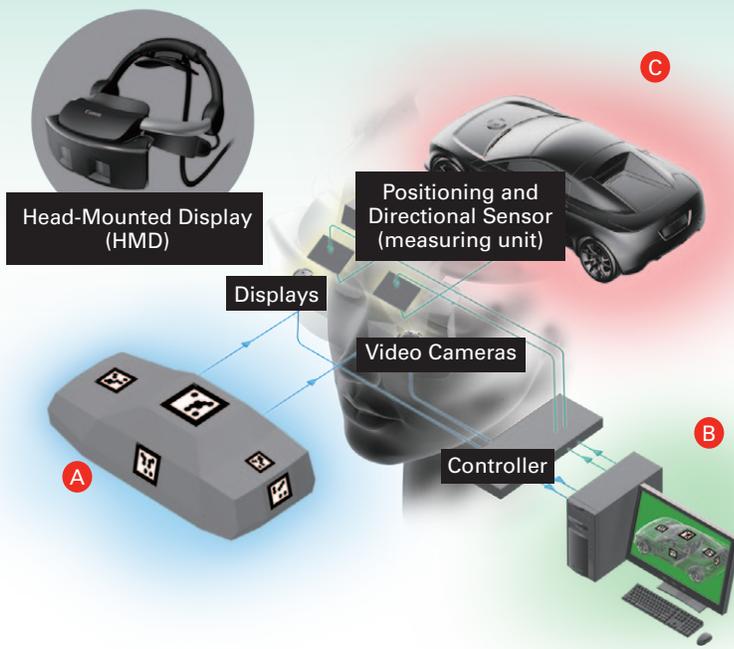

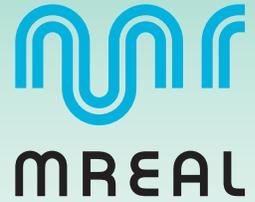

### 2. MR PLATFORM SOFTWARE

The Canon MREAL System integrates into your existing design workflow. Canon's MR Platform Software is a middleware solution for viewing designs from some leading 3-D CAD and design applications in mixed reality with the Canon HMD. The platform provides a software development kit (SDK) that can be used for integration with additional applications.

### 3. MARKERS AND SENSORS (THIRD-PARTY)

To render the images precisely in real space, the Canon MREAL System supports multiple positional technologies, including markers, optical sensors, and magnetic sensors available from some leading third-party manufacturers. Canon will work with you, taking into account your design goals and environment, to help determine which of these technologies would be best for viewing your specific designs.

Gyroscopic Sensor not included with the HM-A1; user must purchase this separately from a third-party provider.

## THE CANON MREAL SYSTEM

**A. Real World:** The real world is captured with linked video cameras installed on the right and left sides of the HMD, and the video is sent to a computer.

**B. Merging of Real-World and CG Images:** Markers detected by the video cameras or sensors calculate the position and orientation of the user's head, and then virtual CG video is combined with the video of the real world.

**C. MR World:** The combined video is sent back to the HMD and shown on the display. A free-form prism helps enable the user to experience a realistic, accurate, and smooth MR world.

### PROTECTING THE ENVIRONMENT

Canon is guided by the philosophy of Kyosei—all people, regardless of race, religion or culture, harmoniously living and working together into the future. As a world-class leader in imaging technologies, Canon is dedicated to protecting and preserving valuable environmental resources. To meet this commitment, Canon has put in place an Environmental Management System and currently holds one of the largest consolidated ISO-14001 certificates in the world. At each stage of the product life cycle—produce, use, and recycle—Canon assesses the amount of CO<sub>2</sub> emitted and strives to reduce it, always seeking ways to conserve energy and resources, and reduce hazardous substances.

### PRODUCT USAGE

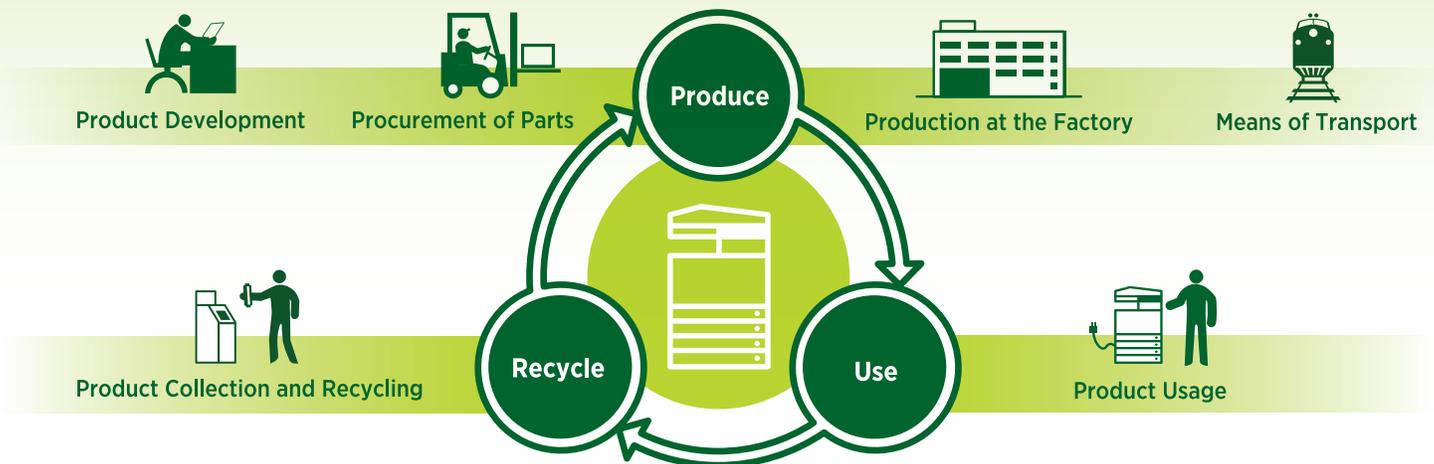

When a Canon device reaches your workplace, you'll value the features that help save energy, paper, and toner. Canon has developed innovative technologies that make its business products highly energy efficient while delivering great performance. For example, its RAPID Fusing System technology reduces power consumption of digital multifunction devices by up to 80% compared to predecessor models without this technology. Canon has been recognized by the U.S. EPA with 12 ENERGY STAR® awards since the program's inception in 1995. Canon devices also support a full range of features that help reduce paper usage and toner consumption.

### CARE FROM START TO FINISH

Starting with product development, all suppliers are required to meet Canon's stringent Green Procurement policy and environmental terms. This helps the company exceed the toughest global standards for restricting or eliminating hazardous chemical substances from its products. Canon's state-of-the-art technology is engineered into lighter, compact body designs that use fewer materials and save space, thereby reducing the amount of packaging and fuel required for transport. And to further reduce CO<sub>2</sub> and other greenhouse gas emissions when delivering products nationwide, Canon partners with the U.S. EPA in the SmartWay Transport program.

### PRODUCT COLLECTION AND RECYCLING

When Canon's business products have completed their full service life, they're effectively collected and remanufactured whenever possible. Canon pioneered the collection of used toner cartridges in 1990 and its recycling program is still going strong today. Canon's innovative green technologies also include bio-based plastic, a plant-derived compound that replaces certain petroleum-based plastic parts. Canon believes in living and working together into the future. It's committed to bringing you advanced technologies that run your business while respecting the global environment.

## Canon imaging systems are developed with leading-edge technologies with a stronger environmental focus at every stage of the product lifecycle.

- ✔ Canon's Lifecycle Assessment System (LCA) seeks to control carbon emissions at each lifecycle stage. The result? **An overall CO<sub>2</sub> target reduction of up to 50%** compared to Canon predecessor models. **This equates to as much as 2.5 tons of carbon per year, per device.\***
- ✔ In order to reduce dependence on petroleum-based materials, Canon uses **100% recycled plastics and bio-based plastics** on certain exterior parts.
- ✔ Smaller and lighter design helps improve transportation efficiency. As a result, carbon emissions per transporter vehicle can be **reduced by up to 50%.\***
- ✔ Power consumption in Sleep Mode is **as low as 1W or less.**
- ✔ ENERGY STAR: Savings in power consumption during a one-week period has been **reduced by up to 75%\*** compared to Canon predecessor models!
- ✔ The use of White LED array technology in its Color Image Reader compared to a traditional Xenon tube **reduces power consumption by up to 75%!**
- ✔ Canon offers **products that are registered in accordance with the Electronic Product Environmental Assessment Tool** (IEEE 1680.2 or EPEAT) for Imaging Equipment.
- ✔ Using Canon Image Sensor technology rather than traditional CCD sensors **reduces power consumption by up to 50%!**
- ✔ Advanced Color RAPID Fusing and Induction Heating (IH) technologies **reduce power consumption and limit the warm-up period.**
- ✔ pQ and pO Toners with a lower melting point **reduce fusing temperature requirements.**
- ✔ All suppliers are required to meet **Canon's stringent Green Procurement policy and environmental terms.** This helps Canon exceed the toughest global standards, such as those set by the European Union's RoHS Directive, which controls/restricts the use of hazardous substances.
- ✔ Each system is equipped with paper-, toner-, and energy-saving features that **cut costs and conserve resources.**
- ✔ Long-life parts and higher-yielding supplies help **maximize uptime and reduce the amount of materials** consumed during the product lifecycle.
- ✔ Canon's Corporate Environmental Management System **is certified to the ISO-14001 Standard.** In fact, Canon currently holds the largest ISO-14001 certification in the world, **with over 800 Canon companies and facilities certified.**
- ✔ Canon was recognized as the **2013 "Line of the Year" for most "Energy-Efficient" A3 MFP line** by respected third-party analyst Buyers Laboratory, Inc.

\*Actual reduction amount may vary by model.

# VERTICAL MARKET SOLUTIONS

Canon has identified vertical markets for which customized, specific solutions have been designed to help your organization become more productive, competitive, and cost efficient.

## ADVANCED SOLUTIONS for Education

Canon offers hardware and software technology solutions for EDUCATION that can help streamline testing and grading, boost collaboration, control expenses, improve accessibility, and reduce the impact of printing on the environment.

## ADVANCED SOLUTIONS for Financial Services

Solutions for FINANCIAL SERVICES are designed to help better manage document workflows, control costs, speed up application processes, improve front-to-back office integration, and streamline regulatory compliance.

## ADVANCED SOLUTIONS for Manufacturing

For Manufacturers, Canon solutions can help users manage authorized access to Canon MFPs, facilitate repetitive document printing activities with automated one step workflows, and help track print costs across the enterprise by monitoring usage, users, and devices.

## ADVANCED SOLUTIONS for Healthcare

Solutions enable HEALTHCARE professionals to help streamline admissions and discharge processes, facilitate with certain aspects of HIPAA and the HITECH Act, seamlessly integrate patient information with Electronic Health Record (EHR) systems, help contain printing costs, and help safeguard patient health data.

## ADVANCED SOLUTIONS for Legal

Solutions for LEGAL professionals are designed to boost overall productivity and efficiency across a firm by helping to streamline document workflows, tracking and reducing costs, and improving security via access controls.

Educators in K - 12 and higher education face many challenges, such as increasing productivity and efficiency, even as programs and budgets are cut. They also need to challenge and engage students by creating compelling print and online course materials and ensure that students' confidential information is kept secure.

## Spend less time testing and grading, and more time teaching

With added responsibilities, educators must find ways to work faster without sacrificing the quality of their teaching methods. The Intelligent Grading Solution enables educators to conveniently create and grade tests, generate reports, and share results without adding to an already overwhelming workload. With this embedded, easy-to-maintain cloud-based solution, educators can quickly gain insight into class and exam performance—using existing MFPs—allowing for more time to focus on student achievement.

With a few simple button presses, teachers can easily create customized test sheets on demand, quickly grade exams, and generate accurate reports.

## Reduce printing costs for faculty, administration, and students

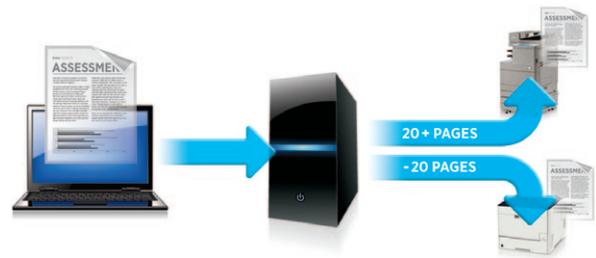

Facing continuing budget cuts, educational institutions must find ways to print more cost-efficiently, better manage student printing, and encourage responsible behavior by staff and students. Canon delivers solutions to help schools lower costs and improve printing efficiency, without sacrificing the quality of education.

Customizable log-in screen

Cost-savings and color usage reports

Prompt users to automatically route larger print jobs to a secure print queue rather than a more expensive, local printer.

## Create and access compelling materials from anywhere

Educators spend a great deal of time preparing engaging and effective materials. To do this in less time, many teachers now use tablets and other mobile devices. Canon offers mobile solutions, such as Canon Direct Print and Scan for Mobile, the Canon Mobile Print app, EFI PrintMe, and uniFLOW Mobile, which make it convenient to access and print these documents for distribution to colleagues, students, and students' parents.

With a portfolio of Canon mobile print and scan solutions, educators can easily authenticate and access printed and scanned course materials directly from their mobile devices.

## Achieve sustainability and accessibility goals

Schools are expected to be a model for environmental responsibility and provide a fully accessible institution for everyone, including those with physical challenges. Canon is committed to creating technology that enables schools to address concerns about limited mobility and visual impairments as well as provide environmentally conscious solutions. (See page 11 for more information about Canon's accessibility solutions.)

Control panel can flexibly tilt to be visible from any angle.

Tactile controls increase functionality.

Canon is proud to offer EPEAT registered products, helping schools identify solutions that can help reduce their environmental impact.

NOTE: Nothing in this brochure should be construed as legal counsel or regulatory compliance advice, including without limitations with respect to statutes such as Sarbanes-Oxley, FERPA, HIPAA, GLBA, Check 21, Section 508, or the USA Patriot Act. Each customer must have its own qualified counsel determine the advisability of a particular solution as it relates to regulatory and statutory compliance.

# FINANCIAL SERVICES

Banks and other financial companies are constantly challenged with better ways to increase efficiency and improve the flow of customer information, reduce costs and waste, and protect customer information. Processing financial documents can be a manual-intensive procedure. Every day, financial institutions must track, distribute, and archive applications with hard-copy and digital documents, while meeting security and compliance requirements.

## Secure authorized printing to any device

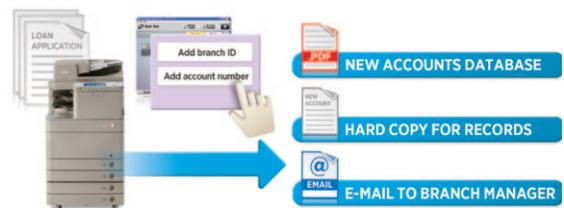

Customer confidential data on applications and documents needs to be secure in daily exchanges between individual bank personnel and financial institutions. Banks can leverage Secure Printing to ensure that only those branch personnel who authenticate themselves at the device can release and print customer applications and other sensitive documents.

Avoid leaving documents with sensitive financial information on the device trays.

## Streamline application processing with one-touch workflows

With Canon solutions, the repetitive manual copying, scanning, printing, storing and distributing, tasks can be organized into easy-to-use, one-touch buttons. Tellers can easily print, scan, and/or send new applications to multiple e-mail addresses and fax destinations—including their own PCs—with one touch.

Workflow Composer buttons can be set to streamline paper-to-electronic processes.

## Ensure fax availability and security while decreasing carrier costs

Financial firms are looking for a balance between having enough secure and reliable fax systems to serve their organization and reducing the service and supplies costs to support multiple devices. The Canon imageRUNNER ADVANCE systems\* offer the power of a group copier with up to four fax lines with its Super G3 four-fax board, eliminating the need for four separate fax devices. By using the Super G3 four-fax board, one device can serve as a high-capacity hub for all the other imageRUNNER ADVANCE devices on your network, giving each branch instant fax capability.

One imageRUNNER ADVANCE device with a four-line fax board can handle a large amount of fax traffic.

## Enforce your sustainability policy while reducing costs

Prominent financial companies are finding that active sustainability programs have multiple benefits, including helping to align with their clients' requirements of protecting the environment, while improving their bottom line. Canon designs products that help improve efficiency, conserve energy, and reduce waste. With enabled duplex printing, energy-saving sleep and operation modes, and user function controls, additional reductions in costs can be achieved with better operations and lower energy use.

Canon is proud to offer EPEAT registered products, helping governments, businesses, and individuals identify solutions that can help reduce their environmental impact.

\* The optional Super G3, four-line fax boards can be supported on the imageRUNNER ADVANCE C5200, C2200, 4200 and 4000 Series.

NOTE: Nothing in this brochure should be construed as legal counsel or regulatory compliance advice, including without limitations with respect to statutes such as Sarbanes-Oxley, FERPA, HIPAA, GLBA, Check 21, Section 508, or the USA Patriot Act. Each customer must have its own qualified counsel determine the advisability of a particular solution as it relates to regulatory and statutory compliance.

To succeed, a manufacturer must excel on several fronts. Relentless competition, rising energy costs, and strict regulation compel manufacturers to operate more efficiently, get new products to market faster, and protect confidential documents. Canon offers manufacturers enterprise solutions to help manage authorized access, streamline and organize office document workflows, and reduce printing costs.

## Authorized access

With Canon device and enterprise office solutions, a manufacturer can control who is authorized to access, print, copy, fax, or scan important documents like blueprints, schematics, strategic plans, and supplier agreements across its fleet of MFPs and printing devices. Authorized device access can be managed with user IDs, passwords, and Proximity Cards.

Universal Login Manager, AA-PRINT, and uniFLOW provide device authentication solutions for any size operation.

The Canon Access Management System (AMS) allows you to enable and restrict user access to key functionality based on authentication and user credentials.

## Simplify multistep processes into efficient workflow buttons

Automating steps for manufacturing document workflows can help improve turnaround time and speed up work and distribution activities around the MFP.

The Canon Workflow Composer enables manufacturers to simplify everyday, multistep workflows with one-touch buttons.

With a press of the Workflow Composer button, a combination of document activities, such as scanning, archiving, and sending, can be completed as a one-set workflow.

## Monitor secure words so you can take preventive action

Loss of trade secrets, client lists, and other company-critical information through theft of documents can jeopardize a manufacturer's competitive edge. Canon imageWARE Secure Audit Manager Express with uniFLOW can help users monitor device activity. If confidential information is scanned, printed, copied, faxed, or distributed through your Canon MFP device, your IT staff can set solution alerts.

Canon imageWARE Secure Audit Manager Express can be set to track document-related MFP activity and notify your IT administrator when specific key words are detected.

## Track and bill document expenses back to specific cost centers

It's hard to assess the profitability of specific products or operation areas when you don't know the source of all your print-related expenses. uniFLOW helps enable you to easily track device-related expenses by user, group, department, and more. The flexible, customizable solution lets you generate detailed activity reports, so you can charge costs back to specific users or internal departments as needed.

Detailed tracking and activity reports can help monitor usage and aide in billing back departments.

Few industries are undergoing as many changes as healthcare. Rising costs and new legislation are forcing providers to find new ways to be more efficient and profitable, while providing a higher quality of care.

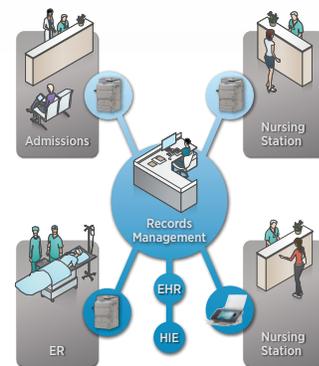

## Ensure healthcare information compatibility

Healthcare providers print more than one billion clinical documents each year in the U.S. Canon works closely with industry-leading healthcare information system providers to help ensure that you can efficiently and effectively print the documents you need.

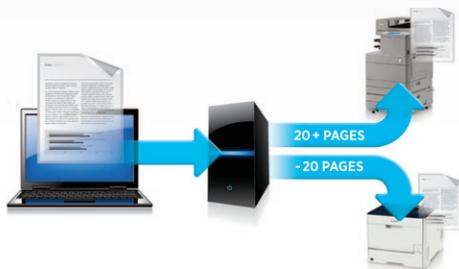

## Boost productivity and efficiency with EHR interoperability

The healthcare industry is rapidly transitioning from paper-based processes to electronic workflows. Canon is uniquely positioned to aid in that transition. From its own manufactured MFPs and scanners, Canon can help get critical paper-based patient information into the patient's electronic medical record by providing a consistent Scan-to-EHR workflow.

## Implement strategies to manage costs

Controlling all print costs in a healthcare setting can be difficult, especially in large organizations and integrated delivery networks. To help cut expenditures and maintain security, providers need to control facility-wide access to print, copy, fax, and other device features. Canon offers solutions that can help assess and contain costs by influencing staff behavior, preventing wasteful printing practices, and providing greater control over device usage across healthcare facilities.

Prompt users to send larger print jobs to a secure print queue rather than a more expensive, local printer.

Customizable log-in screen

Cost-savings and color usage reports

## Access management and data security help facilitate HIPAA compliance

Data security and privacy is essential in healthcare. Canon offers a range of solutions that help you safeguard patient health information (PHI) to support provider compliance with HIPAA and other regulations, without impacting the quality of care.

Universal Login Manager, AA-Print, and uniFLOW provide device authentication solutions for practices of any size.

The Canon Access Management System (AMS) easily enables and restricts user access to key functionality based on authentication and user credentials.

NOTE: Nothing in this brochure should be construed as legal counsel or regulatory compliance advice, including without limitations with respect to statutes such as Sarbanes-Oxley, FERPA, HIPAA, GLBA, Check 21, Section 508, or the USA Patriot Act. Each customer must have its own qualified counsel determine the advisability of a particular solution as it relates to regulatory and statutory compliance.

In most law firms, paper documents are still the dominant vehicle for storing data. With the advent of new electronic filing requirements in the courts, your manual and paper-based processes may be making it more difficult and costly to turn around case files in a timely manner. Canon can help your firm keep up with technology, while improving your digital workflow and making it easier to transition to electronic files.

## Maximize Productivity Across Your Firm

Paper documents are critical to how your firm practices law each day. Scanning hard-copy pages into a document management system is often a time-consuming, manual, multistep process. Now, Scan to Worldox enables your staff to quickly and easily send documents to Worldox directly from the touch-screen of your imageRUNNER ADVANCE multifunctional printer (MFP).

Now, you can step up to a Canon imageRUNNER ADVANCE device and quickly scan, classify, and upload your case documents to Worldox with confidence.

## Safeguard documents and confidential client information

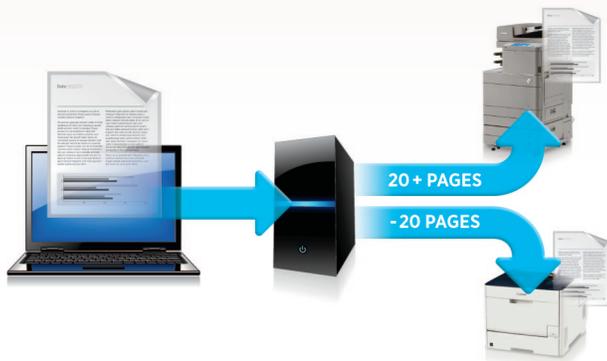

Securing case files is an ongoing concern for legal professionals. Many of today's multifunction devices have storage and communication capabilities that can rival those of desktop computers. Canon offers a range of solutions to help secure devices and safeguard sensitive client information.

Law firms can use device authentication to restrict access to functions based on user credentials, for secure print, to protect device data.

## Contain costs and client billback

Law firms and their clients want to know what they're paying for so they can rein in costs, which means many law firms need better ways to track expenses, while also controlling costs to increase profitability. Canon solutions can help influence staff behavior, provide visibility into costs, and help enable client billback for document-related expenses.

Prompt users to send larger print jobs to a secure print queue rather than a more expensive, local printer.

## Manage the move to mobile

According to a 2013 ILTA survey, 89% of law firms use tablets and more than half are funding the purchase of a partner's device or paying for service. With this proliferation and use of mobile devices (BYOD), law firms must comprehend the nature and power of the smartphone and tablet devices that connect to their networks for viewing, editing, and printing documents. Canon offers secure mobile solutions that work across a variety of platforms to help manage and control print users.

With Canon's mobile solutions, legal professionals can access documents remotely from the cloud\* and provide client security by authenticating themselves at the device prior to printing documents.

\*You must open a Google Cloud account to take advantage of the cloud functionality. Storage capacity and any pricing thereof is based on Google's current offering and is at Google's discretion. Your Google Cloud account is subject to Google's terms and conditions, which is subject to change at Google's discretion. Neither Canon Inc. nor Canon U.S.A., Inc. represents or warrants any third-party product, service, or feature referenced hereunder.

NOTE: Nothing in this brochure should be construed as legal counsel or regulatory compliance advice, including without limitations with respect to statutes such as Sarbanes-Oxley, FERPA, HIPAA, GLBA, Check 21, Section 508, or the USA Patriot Act. Each customer must have its own qualified counsel determine the advisability of a particular solution as it relates to regulatory and statutory compliance.
