PowerShot G9

12.1 MEGA PIXELS
6X OPTICAL ZOOM
3.0" LCD

PowerShot G, S, TX, SX

Photographic Genius.

- A class-leading 12.1 Megapixel digital camera with Canon DiG!C III Image Processor, 6x Optical Zoom and Optical Image Stabilizer.
- Full range of shooting and recording modes including RAW + JPEG for the ultimate in creative control.
- Optical viewfinder plus large high-quality 3.0-inch PureColor LCD II screen for bright, accurate color with greater viewing from a wider angle and with an anti-glare, anti-scratch coating.

This sophisticated, luxuriously appointed successor to Canon's G7 takes image quality to new heights with 12.1 megapixels of resolution. A new RAW mode gives you unparalleled creative control, while the oversized, extra-durable, vibrant PureColor LCD II screen with wide viewing angle makes shooting a pure pleasure.

PureColor LCD II

Shooting Modes

Basic Features and Functions

Supplied Accessories

- PowerShot G9 Body
- Lithium Battery Pack NB-2LH*
- Battery Charger CB-2LW*
- MMC Plus Card
- MMC-32MH • Neck Strap NS-DC6 • Digital Camera Solution CD-ROM • USB Interface Cable IFC-400PCU*
- AV Cable AVC-DC300*

NEW

* Available as optional accessory. (Wide/Tele: Number shown is 35mm equivalent.)
Note: When using the converter lenses, we recommend using the LCD screen to preview composition and refraining from the use of the built-in flash to avoid harsh shadows in the resulting photos.

Amazing Zoom, Amazing Camera.

- Full-featured, compact 8.0 Megapixel digital camera with a 12x Optical Zoom.
- Canon Optical Image Stabilizer Technology and ISO 1600 for steady shooting.
- DiGiC III Image Processor with improved Face Detection Technology and Red-eye Correction for sharper images and improved functionality.
- Hot shoe adapter for the Speedlite EX Series external flashes.
- Shoot easy movies with movies capable of 30 fps VGA or 60 fps QVGA. Also a convenient to use Movie Button, never having to switch to a shooting mode.

The S5 IS puts all the zooming power you want in a compact camera that creates both still images and movies of the very highest quality. Though simple to operate, it offers advanced users a world of creative possibilities including a hot shoe adapter for Speedlite EX Series external flashes.

Shooting Modes

Basic Features and Functions

Supplied Accessories

- PowerShot S5 IS Body • 4 AA-size Alkaline Batteries
- SD Memory Card SDC-32M • Lens Cap
- Neck Strap NS-DC4
- Digital Camera Solution CD-ROM • USB Interface Cable IFC-400PCU* • Stereo Video Cable STV-250N*

* Available as optional accessory. (Wide/Tele: Number shown is 35mm equivalent.)

Experience the Zoom Power.

- Exceptional value in a compact ultra-zoom 8.0 Megapixel digital camera with Canon DiGiC III Image Processor for superior image quality and vibrant colors.
- Zoom in for sharp, steady close-ups with Canon's 10x Optical Zoom lens with Optical Image Stabilizer.
- Genuine Canon Face Detection sets the focus; exposure and flash automatically, leaving you free to compose a group, capture an unguarded moment, or coax the perfect smile. Plus the new Face Selector Button lets you select the primary face.

So simple, yet so powerful. The new PowerShot SX100 IS has a 10x optical zoom, Optical Image Stabilizer and a DiGiC III Image Processor. Face Detection with a Face Selector Button and Red-eye Correction deliver stunning people shots. A LP movie mode allows longer recording times so you can shoot high-quality, 30 fps sound movies, then play it back right on the camera.

Face Selector Button

* Available as optional accessory.

The First Look at a Bold Concept.

- ELPH-sized 7.1 Megapixel digital camera with ultra-compact Canon 10x Optical Zoom lens and proprietary Optical Image Stabilizer Technology.
- DiGiC III Image Processor with improved Face Detection Technology and Red-eye Correction for sharper images and improved functionality.
- Enjoy the unprecedented clarity of 1280 x 720 HD movies at 30 fps with Face Detection, stereo sound and 1080i component video playback.

Only Canon could fit everything you want into a compact-size camera. The first-of-its-kind PowerShot TX1 is a 7.1 megapixel, 10x optical zoom camera with Optical Image Stabilizer that shoots HD Movies by simply pressing the Movie Button. You don't need to switch to shooting mode, so taking movies is now much easier than ever before.

- AV Cable AVC-DC300*

* Available as optional accessory.

Image of Perfection.

When two premier brands unite, the result is picture perfect—precision digital imaging from Canon wrapped in the modern American design of Coach. Presenting the sleek, titanium Canon PowerShot SD950 IS Digital ELPH in its own luxurious, custom-made Coach leather carrying case. It's an elegant gift for any occasion, brought to you by Canon and Coach.

PowerShot SD950 IS Coach Edition Kit Contents:

PowerShot SD950 IS Digital ELPH Kit (Battery Charger, Wrist Strap, MMC Plus Card MMC-32MH, CD-ROMs, Battery Pack, Interface Cable, AV Cable)

- Coach Leather Carrying Case
- Coach Edition Metal Neck Strap

Exclusive Coach Edition metal neck strap is included for your convenience.

* Available as optional accessory.

Wide Angle, Brilliant Features.

- Stylish dual tone 8.0 Megapixel Digital ELPH in two elegant colors.
- 3.8x Wide-Angle Zoom lens to get more family and friends into one perfect photo.
- Large high-quality 3.0-inch PureColor LCD screen with wide viewing angle and with an anti-glare, anti-scratch coating.
- DiGiC III Image Processor with Genuine Canon Face Detection sets the focus; exposure and flash automatically.

The PowerShot SD870 IS Digital ELPH offers a 28mm wide-angle (35mm equivalent) Lens and an Optical Image Stabilizer. Face Detection Technology keeps everyone looking their best even when you're using flash. Auto ISO Shift and ISO 1600 assure great pictures even in tough lighting conditions.

High Performance and Value.

- Top-of-the-line A Series model with upgraded features.
- 12.1 Megapixel resolution with Canon DiGiC III Image Processor and high-quality 6x Optical Zoom lens with Optical Image Stabilizer for exceptional image quality.
- Optical viewfinder plus large, high-quality 2.5-inch Vari-Angle LCD screen for flexible viewing at nearly every angle.
- Genuine Canon Face Detection sets the focus, exposure and flash automatically, leaving you free to compose a group, capture an unguarded moment, or coax the perfect smile.

Canon's A Series raises the bar again, pairing a sporty feel and easy operability with a formidable array of features and capabilities. 12.1 megapixel resolution and Optical Image Stabilizer Technology create impeccably detailed, beautifully clear images. And shooting is especially fun with the big, wide-view, vari-angle LCD screen plus optical viewfinder.

Vari-angle LCD Screen

EOS-1Ds Mark III

EOS Reborn.

- Entirely new 21.1 Megapixel Full-Frame Canon CMOS Sensor and Highlight Tone Priority.
- Dual “DiGiC III” Image Processor for excellent image quality and processing speed.
- Live View shooting capabilities, displayed on the large 3.0-inch LCD monitor.
- A shutter durability-tested to 300,000 cycles and EOS Integrated Cleaning System.
- Up to 5 fps, burst rate up to 15 consecutive RAW images or 45 full-resolution JPEGs.

EOS-1D Mark III

The Fastest Digital SLR*

- World’s fastest* digital SLR: 10.1 Megapixel Canon CMOS Sensor shooting up to 10 fps.
- All new high-precision AF system with 19 user-selectable AF points and 26 additional “assist points” for a total of 45 AF points.
- New, lighter body with enhanced weather resistance and outstanding reliability: featuring a shutter that’s durability-tested to 300,000 cycles.
- Dual “DiGiC III” Image Processors to provide up to 50% less shadow noise and superb image quality.

EOS 5D

Widen Your Horizon.

- World’s smallest and lightest full-frame digital SLR*: 12.8 Megapixel Canon CMOS Sensor for exceptional image quality.
- DiGiC II Image Processor dramatically improves speed: 3.0 fps for up to 60 (JPEG) / 17 (RAW) consecutive frames in a burst.
- Large 2.5 inch LCD monitor.
- Canon’s Picture Style feature, 9-point AF with 6 additional “assist” points and RAW + JPEG recording.

EOS 40D

NEW

The Spirit of Photography.

- New 10.1 Megapixel Canon CMOS Sensor, extensive noise reduction technology.
- 6.5 fps, burst rate up to 75 consecutive JPEGs or 17 RAW images and DiGiC III Image Processor.
- Strong, rugged build quality: magnesium-alloy exterior, shutter durability-tested to 100,000 cycles.
- EOS Integrated Cleaning System, Picture Style settings, Spot metering, and Highlight Tone Priority for advanced in-camera image control.
- Large 3.0-inch LCD monitor and advanced Live View function.

EOS 30D

Perfection Refined.

- 8.2 Megapixel Canon CMOS Sensor and DiGiC II Image Processor produce exceptional image quality.
- Lightning-fast 5 fps for up to 30 (JPEG) / 11 (RAW) / 9 (RAW+JPEG) consecutive frames in a burst and 0.15-second startup time.

EOS DIGITAL REBEL XTi

Incredibly Advanced. Remarkably Simple.

- High performance digital SLR with 10.1 Megapixel Canon CMOS sensor and DiGiC II Image processor.
- Large 2.5 inch LCD monitor with new user interface and wide viewing angle. Fast 3 fps shooting with 27 consecutive frame burst rate and a 0.2-second startup time.
- High Precision, wide area 9-point autofocus system.

EOS DIGITAL REBEL XT

Simple, Limitless Performance.

- 8.0 Megapixel Canon CMOS Sensor and DiGiC II Image Processor enable impressive performance.
- Durable but extremely lightweight, compact body, accepts all EF and EF-S lenses.

DiGiC III/II IMAGE PROCESSOR

The backbone of a good digital camera is the signal processing technology. Developed for high performance capturing and recording of digital images, Canon's **DiGiC III/II** chip

speeds up processing, compression and display. With superior color reproduction, bright, high-saturation subjects achieve natural color rendition and white balance. The latest-generation **DiGiC III** Image Processor works in concert with Canon's CMOS sensors and DDR SDRAM buffer to achieve even higher levels of performance. The processor's outstanding power and speed deliver dramatically improved image quality and performance. Power consumption has been further reduced for even longer battery life. Color reproduction and noise reduction in low light situations have been significantly improved as well.

CMOS SENSOR

Canon developed its CMOS sensors for digital SLRs, taking advantage of

proprietary knowledge from the development and manufacturing of its renowned autofocus sensors and semiconductor manufacturing equipment. Unlike CCD sensors, which amplify signals only after they have been transferred to an image processor, CMOS sensors convert and amplify signals before they are transferred. As a result, Canon's CMOS sensors produce a cleaner signal, and power consumption is reduced by up to 90% compared to CCDs. Using multi-channel signal paths, Canon has significantly increased data transfer speeds, dramatically improving camera responsiveness. In addition, Canon's CMOS sensors include unique on-chip noise reduction technology to minimize both fixed pattern and random noise, resulting in silky-smooth images.

EOS SYSTEM ACCESSORIES

The EOS System is unrivaled in its comprehensive array of accessories, ranging from battery grips to focusing screens to remote controls, that enhance power, customization and speed. Also, EOS cameras and EX-series Speedlites work in tandem to deliver great exposures and automatic balanced fill-in-flash.

EF LENSES

With more than 50 EF lenses, the EOS System boasts one of the world's most comprehensive selection of autofocus lenses. All EF lenses feature Canon's advanced optical technology, offering quality, breadth and scope to photographers everywhere. L-Series Lenses have a reputation in the professional photography world for remarkable performance. Their lens construction typically includes UD (Ultra-low Dispersion) glass, fluoride or aspherical elements coated with Super Spectra Coating for incredible clarity and brilliant colors. EF-S lenses were developed for EOS SLRs with APS-C size sensors. Lightweight and compact, these lenses take advantage of the sensor's size to deliver optimized performance without compromising image quality. For instantaneous, quiet autofocus, Canon developed the world's first USM (Ultrasonic Motor) for a lens.

To prevent blurred images when shooting in low light or at slow shutter speeds, many EF lenses are equipped with Optical Image Stabilizer technology that corrects camera shake by shifting a lens group to realign the image on the imaging sensor or film.

The Perfect Complement to Canon Cameras

Canon's superlative digital cameras are designed from the ground up to produce images of unparalleled clarity and color. From the EOS series and all through the PowerShot line, Canon cameras help photographers of all skill levels capture the best possible images with speed and ease. Canon brings this same level of commitment to the printing and sharing of these images with the PIXMA and SELPHY series of photo printers. For wallet-sized photos printed on the fly to exhibition quality, fine art prints, there's a Canon printer that's just right, no matter the photographer, no matter the skill level. With advanced technologies to ensure vivid, richly colored prints that will last a lifetime, Canon printers ensure you'll produce the perfect print—fast, every time.

MP970

1 CONNECT

Connect the USB cable to a Canon digital camera or PictBridge compatible camera.

2 PRESS/PRINT

Press the lit Print/Share button. You'll have long-lasting, professional quality prints in minutes.

Direct Print

Canon's Direct Print system lets you make beautiful prints from your Canon digital cameras quickly, easily and without the use of a computer. Canon PowerShot and EOS Digital cameras can be connected directly to Canon SELPHY and PIXMA Photo Printers. It's simple: just connect your camera to your printer, press the lit Print/Share button and watch your long-lasting, photo lab quality photos print before your very eyes.

Print/Share Button

Camera and printer sold separately.

PIXMA Pro9500 Photo Printer

The Fine Art Powerhouse

Canon's flagship PIXMA printer, the Pro9500 uses the LUCIA 10-color pigment ink-system to produce breathtaking, borderless images up to 13" x 19". It's compatible with a number of heavyweight Fine Art papers, has three different black inks for enhanced black and white printing performance and is wonderfully simple to use, even directly from your digital camera.

PIXMA Pro9000 Photo Printer

Exceptionally Advanced— Direct From Your Camera

Capable of quickly printing photo lab quality prints plus detailed proofs and information sheets from your latest shoot, Canon's PIXMA Pro9000 offers a proven combination of speed and versatility. Its FINE print head provides unrivalled resolution and its ChromaLife100 dye-based inks create long lasting, beautiful photos for sharing or display.

PIXMA MP970 Photo All-In-One

The Ultimate Photo All-In-One

The PIXMA MP970 does it all—fast! It can print a borderless 4" x 6" photo in just over half a minute at resolutions up to 9600 x 2400 dpi with 7 individual ink tanks. It features a 3.5-inch TFT display, has Canon's Auto-Image Fix technology and handles a number of advanced print media. The Ethernet interface enables networking, and a duplex printing feature saves paper.

PIXMA MP610 Photo All-In-One

Premium Photo All-In-One. Ease of Use PLUS

For the photographers who want to print their photographs quickly and easily, look to the MP610. It has a 2.5-inch TFT with an Easy-Scroll Wheel for editing and viewing, individual ink tanks, plus a number of advanced features to ensure the perfect print.

PIXMA MP520 Photo All-In-One

Advanced Features, Easy to Use, Outstanding Performance

Whether printing from a digital camera, compatible memory card, cell phone, or a computer, the MP520 is a perfect all-in-one choice. With advanced technologies and high-resolution output, every photo is sure to look its best. A 2.0-inch TFT display helps ensure correct settings are achieved before printing.

PIXMA MP470 Photo All-In-One

Modern Design with Enhanced Performance

Bundled with Canon's Easy-PhotoPrint EX software, the PIXMA MP470 is not only a great choice for making beautiful prints; it also functions as a high-quality copier, and the Advanced Z-lid can accommodate bulky items. Whether scanning photographs, reviewing images on its built-in 1.8-inch LCD display or copying documents, with or without a computer, the sleek MP470 won't disappoint.

User-friendly for Beginner and Pro Alike.

The genius of Canon's printer technology is that while it's incredibly advanced, it's also designed to be simple. Large, bright screens, the Easy-Scroll Wheel and logical buttons take the guesswork out of printer operation. Menus are designed to be clear and intuitive, whether in the camera or on the printer.

With Canon technology in your corner you can concentrate on what matters—your pictures. You'll be a master printer before you know it!

SELPHY ES1

COMPACT PHOTO PRINTER

The Fun of Effortless Photography on the Go

A perfect companion for printing your pictures at home or out and about, there's nothing like the compact SELPHY ES1. It uses an integrated paper/ink cartridge, has a big LCD for easy viewing and allows your imagination to run wild with loads of Creative Print options.

INSERT

Simple and convenient, a single ES1 cartridge contains ink and paper for 50 postcard prints.

PRINT

Get beautiful, long-lasting prints.

Integrated Ink and Paper Cartridge

The Canon SELPHY ES1 is the first photo printer to use a single integrated cartridge that holds both ink and paper. Various paper sizes are available, including 50 postcards or 25 card-size sheets, and you can replace the cartridge error-free and quickly.

PIXMA mini320

Compact Photo Printer

On-the-Go, Fast Photo Lab Quality Up to 5" x 7"

The unique PIXMA mini320 is a veritable mobile photo lab. It prints beautiful high-resolution photographs, up to 5" x 7", in a flash, has a 2.5-inch TFT display and an Easy-Scroll Wheel for fast, intuitive operation, and even helps to enrich photos with its Auto-Image Fix feature.

SELPHY CP740

COMPACT PHOTO PRINTER

Easy Operation. Beautiful Prints. No Computer Needed.

The SELPHY CP740 creates brilliant, 4" x 6" photos with up to 100 year longevity* in under a minute. Whether printing directly from a digital camera or compatible memory card, or wirelessly through an optional Bluetooth connection, the CP740 is always ready. It has a built-in retractable USB cable†, and an optional battery for printing anywhere.

Long-Lasting Prints.

With Canon printers, your photos and memories will last more than a lifetime. PIXMA Photo Printers' ChromaLife100** system allows your photos to stay clear and colorful through a combination of select genuine Canon Inks, Canon Papers and Canon's FINE Print Head Technology. SELPHY Compact Photo Printers apply a water- and gas-resistant coating to provide over a generation's worth of enjoyment.

It's Easy to Connect and Print.

Select SELPHY Compact Photo Printers are equipped with a built-in retractable USB cable† to keep the process streamlined and the printing area organized. Simply pull out the cable from the printer and connect to the digital camera. You can print directly from your compatible memory card†† using the built-in memory card slots. You can also send images captured on a compatible cell phone, wirelessly to compatible PIXMA photo printers and SELPHY compact photo printers via optional Bluetooth. No matter how you connect, Canon makes printing your photos easy and enjoyable.

For more information on Canon Photo Printers, please visit: www.usa.canon.com/consumer

* Based on accelerated dark storage testing by Canon under controlled lighting, temperature and humidity conditions. Canon cannot guarantee the longevity of the prints; results may vary depending on printed image, display/storage conditions and environmental factors.

** Based on accelerated dark storage testing by Canon under controlled temperature, humidity and gas conditions, simulating storage in an album with plastic sleeves. Canon cannot guarantee the longevity of the prints; results may vary depending on printed image, drying time, display/storage conditions and environmental factors. See www.usa.canon.com/ChromaLife100 for additional details.

† May not be compatible with all digital cameras; otherwise, use USB cable provided with digital camera.

†† Compatible memory cards include CompactFlash®, MicroDrive®, Memory Stick®, Memory Stick Duo™, Memory Stick PRO™, Memory Stick PRO Duo™, MultiMediaCard® (v.3.31), MMCmobile™, MMCplus™, SD Memory Card™, miniSD™ Card, SDHC™, miniSDHC™, RS-MMC™. The following can be used with the addition of a special adapter sold separately: xD-Picture Card™, Memory Stick Micro™, MMCmicro™, microSD™, and microSDHC™.

In a World of Choices, Maria's is PowerShot

Off court, Maria Sharapova takes her shots with a PowerShot. That's because Canon's advanced technology gives her the world-class performance she expects. Face Detection Technology automatically adjusts focus, exposure and flash on up to nine faces. DIGIC III ensures sharp images and fast performance. Legendary Canon optics offer brilliant, luminous quality that Optical Image Stabilizer technology maintains even when zooming in low light. And Canon's seamless automation and great design make shooting fun and easy – as easy as Maria's choice in cameras.

MAKE EVERY SHOT A  POWERSHOT

Find the Joy in Every Image.

Like you, Maria Sharapova expects the best. Cherished moments: easily captured, preserved forever, and ready to share with friends and family. PowerShot technology delivers on every expectation, with sharp images in any light, fast, easy performance and compact, stylish design. When your highest expectations meet PowerShot technology, it's a love match.

Sharapova rule #1
Make every shot a PowerShot

Creative Solutions

CREATE YOUR OWN 4" x 8" CARDS & PHOTOS

With SELPHY Compact Photo Printers, PIXMA series Photo Printers and the included Easy-PhotoPrint or Easy-PhotoPrint EX software, you can create your own personalized greeting cards and photos—perfect for any occasion! Simply connect your digital camera and SELPHY ES1 or CP740 Compact Photo Printer or PIXMA series Photo Printer to your computer, download your favorite images, open Easy-PhotoPrint and create professional-quality greeting cards and photos. It's fast and easy!

Calendar

Album

CREATIVE PRINTS

The SELPHY ES1 can create Albums and Calendars in 6 layouts. Place Speech Bubbles in 6 styles—anywhere on your picture.

IMAGE EDITING

The SELPHY ES1 can automatically detect and reduce red-eye in your flash photos. Plus it can also automatically compensate for harsh backlighting. The advantage? Better prints, effortlessly.

Speech Bubble

CREATIVE PARK

Fuel Your Creative Genius

At Canon's Creative Park, you can download a collection of greeting cards, stationary, envelopes, papercraft models, calendars and more, for free, and can print them out on your Canon printer. With constant updates for holidays and seasonal crafts and greetings, it's easy and fun to find just the right picture, sentiment or project, ready to print.

*Not compatible with all models.

PowerShot Technology

DIGIC III

DIGIC III/DIGIC II IMAGE PROCESSOR

The **DIGIC** Image Processor significantly enhances the performance of Canon digital cameras providing superior image quality, rich color, faster operation, and lower power consumption. The **DIGIC III**, the third generation digital image processor that offers a major boost in noise reduction signal processing to compensate for high ISO settings. The **DIGIC III** is also the first **DIGIC** Image Processor to support Face Detection AF/AE/FE* Technology. Canon designs and manufactures its own image processors to work seamlessly with all other technologies in Canon digital cameras, providing the user with the best photographs possible.

* Face Detection only detects faces facing forward. And shows up to 9 frames or 35 frames on select models.

with Image Stabilizer ON

OPTICAL IMAGE STABILIZER*

Camera shake often blurs images in low light and at long focal lengths. But now you can achieve excellent-quality images in many difficult situations—outdoors at dusk, inside without a flash, even at the end of the zoom range. Canon's lens-shift Optical Image Stabilizer technology uses miniature gyroscopic sensors to detect motion and generate a corrective signal to reduce blur caused by camera movement. An image-stabilizing lens group along the optical axis is shifted in response to the detected motion, providing effective cancellation of unwanted lens movement and vibration. End result—the images you capture are sharp while zoomed in, at slower shutter speeds and even in low light situation without a tripod.

Image Stabilizer Unit

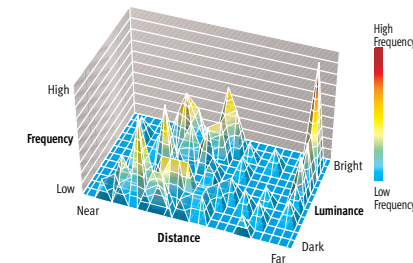

with Image Stabilizer OFF

ISAPS ISAPS TECHNOLOGY

iSAPS (Intelligent Scene Analysis based on Photographic Space) technology dramatically improves Autofocus, Auto Exposure and Auto White Balance systems. Statistical frequencies for different combinations of focal length, focus distance, scene brightness and other factors were culled from Canon's huge volume of data and combined with advanced prediction algorithms. The result is that PowerShot cameras optimize AF, exposure and auto white balance settings for any given scene rapidly and effectively.

UA LENS TECHNOLOGY*

The UA lens is a Canon exclusive: a glass-molded aspherical lens with an ultra-high refractive index that delivers incredibly bright, clear shots while keeping the camera compact.

* Not on all models.

PowerShot Technology

Face Detection Technology

With Face Detection AE/AF/FE

Without Face Detection AE/AF/FE

FACE DETECTION AF/AE/FE*

Cameras equipped with the **DIGIC III** Image Processor feature Face Detection Technology. When the shutter button is pressed halfway, the camera finds faces in the frame to ensure excellent focus, proper illumination of both the face(s) and the overall scene, and adjusts the flash for the location of the face(s).

Face Detection AF/AE/FE

Face Detection AF finds faces, tracks them as you frame your shot, then delivers perfect focus. New models let you select, track and focus a single face within a group.

Face Selector AF* enables to focus on a specific face only. The selected face is being double-framed and tracked when the face moves in the frame.

Face Detection AE makes all your group shots better by properly illuminating both the faces and the background areas.

Face Detection FE* adjusts the flash exposure based on the location of the faces in the frame.

AiAF MULTI-POINT AiAF

Canon's wide-area AiAF intelligently and automatically selects one or more focusing points based on factors, such as subject position and motion. AiAF works in conjunction with iSAPS Technology to more quickly and accurately achieve autofocus under a wide variety of shooting conditions. You get fast, accurate AF whether you hold the camera horizontally or vertically, with stationary or moving subjects, with off-center subjects, and even in low-light/low-contrast lighting.

Multi-Point AiAF

FLEXIZONE AF/AE

Using FlexiZone AF/AE, you can freely move a single AF point around the frame. Now you can easily focus on off-center subjects without reframing the shot. When spot metering is selected, you can choose to measure exposure at the chosen AF point or at the center of the frame. This option gives you maximum flexibility, enabling you to handle difficult lighting situations like a pro.

RAW MODE*

The PowerShot G9's RAW Mode lets you shoot images without processing them in any way. It gives you complete creative control in editing. RAW images are processed in your computer, using Canon's supplied RAW Image Task software. A wide range of variables can be adjusted in processing to produce exactly the final image you want.

RED-EYE CORRECTION*

DIGIC III allows some PowerShot models to detect and correct red-eye during playback. In unusual cases where red-eye is not automatically detected, it can easily be corrected manually from the LCD screen.

with Red-eye Correction

without Red-eye Correction

ISO SETTING

Canon PowerShot cameras give you a choice of ISO-equivalent settings. Low ISO speeds give you better image quality, while high ISO speeds reduce the effects of camera shake or blurring of moving subjects and sharpen photos in low-light situations. While the camera will automatically select the best ISO speed for conditions, in manual and advanced shooting modes, you can set the ISO to 80, 100, 400, 800 or ISO 1600.** When shooting at high ISO speeds, select PowerShot digital cameras can apply automatic Noise Reduction for beautiful prints at even the highest ISO speeds.

ISO 1600

ISO 80

AUTO ISO SHIFT*

In general, sensitivity should be set to the lowest level the ambient light allows, yet too low a setting can cause camera blurry photos. PowerShot cameras with Auto ISO Shift provide options when shooting to prevent unsatisfactory images. In addition to allowing the user to trigger when the ISO can be changed, Auto ISO Shift now can automatically adjust sensitivity for the given light while notifying the photographer.

PowerShot Technology

WB
SELECT

WHITE BALANCE

Canon iSPAS Technology ensures fast, accurate automatic white balance compensation. PowerShot cameras also let you select from preset modes covering common lighting conditions, for example, daylight, cloudy, tungsten, fluorescent, flash, or underwater.* You can even perform manual white balance adjustment using a white reference target, storing the measurement as a custom setting for later recall.

SAFETY
ZOOM

SAFETY ZOOM*

Set a minimum acceptable megapixel count when you are using digital zoom, and Safety Zoom will make optimal use of the digital zoom range. The zoom pauses at the end of the "safety zoom" rather than at the end of the optical zoom range.

DIGITAL
TELE
CONVERTER

DIGITAL TELE CONVERTER*

The digital tele converter feature lets you shoot subjects at great distances without mounting a separate tele converter lens. Simply select one of two magnification levels from the menu.

with Digital Tele Converter

without Digital Tele Converter

EXPOSURE METERING*

Advanced photographers can select from three metering modes: evaluative metering, center-weighted average metering or spot metering. Spot metering provides an exceptional degree of control, enabling the measurement to be tied to a designated AF point or fixed at the center of the frame.

Evaluative Metering

Spot Metering

SAFETY
SHIFT

SAFETY SHIFT*

In Av and Tv modes, a Safety Shift function is available to eliminate exposure errors: the camera will automatically change shutter speed or aperture to work within the ambient brightness conditions.

SAFETY FE*

Safety FE (which can be disabled) makes automatic adjustments to prevent over/under exposed flash shots when shooting in manual mode.

INTELLIGENT ORIENTATION SENSOR

By automatically sensing whether the picture is being taken horizontally or vertically, PowerShot cameras are able to avoid the typical errors that occur in AutoFocus, Auto Exposure and Auto White Balance with less sophisticated cameras. Moreover, pictures are properly oriented during playback, whether on the camera's screen or a computer monitor.

Horizontal

Vertical

FLASH EXPOSURE COMPENSATION*

With Flash Exposure Compensation, you can adjust flash output above or below the level the camera automatically selects by up to ± 2.0 stops in 1/3-stop increments. This is particularly useful for shooting situations that are difficult for the camera's automated sensors to meter correctly such as subjects that are unusually light or dark in color.

16:9
WIDESCREEN

16:9 WIDESCREEN RESOLUTION*

Select PowerShot models allow you to set your recording pixels in Widescreen. Images taken in this setting have a 16:9 aspect ratio, so when viewing images on widescreen televisions or computer monitors, they are displayed without warping or cropping.

WIRELESS†

PowerShot SD430 Digital ELPH Wireless cuts cables out of the picture for unrivaled convenience. It allows direct printing, uploading to a computer, transfer to another SD430 Digital ELPH and remote capture. You can register up to eight wireless devices to the camera via the Setup Menu. Plus, the state-of-the-art security system prevents third-party interception of your images during transfer.

VGA/XGA/720P MOVIE RECORDING*

Smooth, high quality movie clips can be captured at full VGA resolution (640 x 480) and 640 x 480 LP mode. Some PowerShot models also offer XGA size (1024 x 768 at 15 fps) for stunning detail, and 720p for unprecedented HD clarity at 1280 x 720 at 30 fps. Also available in movie mode* are Face Detection AF for excellent focus of faces, stereo sound recording, and 1080i component video playback.

Time
Lapse
Movies

TIME LAPSE MOVIES*

Time Lapse is a new feature that mimics the effect of time lapse photography. Clips are recorded at one or two fps, then played back at 15 fps for a fascinating effect.

MOVIE EDITING

From start-point to mid-point or from mid-point to end-point, the user can edit or erase unwanted movie clips right in the camera in increments as short as one second.

MOVIESNAP*

Great shots can happen at any time, even while you're recording a movie. MovieSnap lets you capture a special moment as a high-resolution still image while simultaneously shooting a movie: simply press the shutter button down fully. The camera will record the image at the same resolution and compression rate you've previously selected.

† PowerShot SD430 Digital ELPH Wireless only.
* Not on all models.

PowerShot Technology

MY COLORS[†]

My Colors lets you customize color before/after shooting and correct individual colors on the LCD screen as you shoot! A wide range of modes, include Vivid Blue, Vivid Red, Vivid Green, Positive Film, Lighter Skin Tone, Darker Skin Tone, and Custom Color.

Positive Film*

Combines “Vivid Red,” “Vivid Green” and “Vivid Blue” to achieve a highly saturated effect.

Vivid Color

Yields vibrant shots with dramatic high-contrast.

Vivid Red*

Charges up red objects in your images for extra impact.

Vivid Green*

Adds vivid dimension to greens for extraordinary nature shots.

Vivid Blue*

Emphasizes the sea, sky or other blue areas.

Neutral Color

Produces images of subtle, elegant tonality.

Black & White

Delivers enhanced clarity — especially useful when shooting text.

Lighter Skin Tone*

Lightens your subjects' skin tones.

Darker Skin Tone*

Darkens skin tones a shade.

Custom Color

Allows you to set balance of red, green, blue and skin colors; finely adjust brightness and vividness.

Sepia

Recreates the look of vintage photographs.

PowerShot Technology

Auto

The camera sets all parameters for the user, providing point-and-shoot simplicity.

Portrait

The camera uses larger apertures for reduced depth-of-field, bringing the subject into focus while blurring the background.

Landscape*

The camera uses smaller apertures when possible for increased depth-of-field and sharpness.

SHOOTING MODES & SPECIAL SCENE MODE

PowerShot cameras offer shooting modes that make it easy to take perfect photos in a wide range of shooting situations by providing intelligent presets with optimized settings. Special Scene Mode gives you advanced presets to ensure the best possible photos under difficult shooting conditions.

Kids & Pets*

Reduce focus time so you won't miss those special shots.

Night Snapshot

Reduce blur when you're shooting at dusk or in front of a nighttime background.

Movie

HD (720p)*, XGA (1,024 x 768)*, VGA (640 x 480), QVGA (320 x 240), Compact (160 x 120) with audio. Unwanted scenes can be deleted in playback mode.

Tv Shutter-Priority*

The user selects the shutter speed, and the camera automatically selects the appropriate aperture.

Manual

The user has complete control over exposure, selecting both aperture and shutter speed manually.

Aquarium*

The camera adjusts image quality to achieve proper flash-free exposure and natural hues when taking an indoor aquarium picture.

Night Scene*

Slow-sync flash is expertly combined with appropriate ambient light exposure to properly expose both subject and background.

Program*

The camera automatically and intelligently selects the aperture/shutter speed combination based on the shooting conditions.

Av Aperture-Priority*

The user sets the aperture, controlling depth-of-field. The camera automatically selects the appropriate shutter speed.

ISO 3200*

Expands the user's ability to shoot in even darker settings without using the flash, and helps capture well-exposed images.

Foliage

Capture brilliant shots of autumn foliage, greenery and blossoms.

PowerShot Technology

Beach

Get clear shots of people at a sunny beach without darkened faces.

Color Accent*

Choose to retain a single color in your image while other colors turn monochrome.

Snow

Shoot clear snow scenes without darkened subjects and bluish tint.

Color Swap*

Select a color and replace it with a color you specify for special effects.

Fireworks*

Grab brilliant images of skyrocketing fireworks.

Creative Light Effect*

Transform background bright spots to stars, hearts, music notes and more.

Underwater*

Capture underwater images with reduced backscatter effect. (Optional Underwater or All Weather Case required)

Stitch Assist*

Easy-to-use guidelines simplify the shooting of aligned multiple frames that can later be combined (using bundled software) to create panoramic photos.

Indoor

Reduce blur and improve color accuracy when shooting handheld indoors.

Super Macro*

Select the Macro Mode from your camera's shooting modes. This function will let you focus less than an inch from the subject – discover a world of fascinating textures.

Sports*

Ideal for sports, this setting uses high shutter speeds to capture for fast-moving subjects.

Digital Macro*

The camera trims the image center and digitally zooms to create beautiful enlarged close-ups.

NIGHT DISPLAY FUNCTION

When you are shooting at dusk or at night, Night Display function lets you see the LCD screen clearly. It brightens the object by reducing the frame rate on the LCD screen.

FOLDER MANAGEMENT

With Folder Management, you can organize images stored on memory cards in folders. File names can be numbered continuously or reset with the creation of each new folder, and the camera can be set to create a new folder at a specified time every day, week or month.* That way, when downloading a large number of files, you know where to find the images you want.

IMAGE RESIZING*

Image Resizing reduces the number of recording pixels during playback. This is a perfect in-camera control for uploading images to your website/blog or sending images via email without downloading the images to modify the size in your computer. Resizing sizes are M3 (1600 x 1200), S (640 x 480) or XS (320 x 240).

MAGNIFIED PLAYBACK*

During playback, images on the LCD screen can be magnified to reveal greater detail. You can zoom into the image with magnifications ranging from 2x to 10x and can scroll vertically or horizontally to view any part of the frame. Even after you have magnified an image, you can view the next image or previous image without first returning to the original size.

MY CATEGORY*

This feature is a handy time-saver and organizational tool that lets you, in select PowerShot models, categorize still images and movies. Entire categories (select from up to 7) can then be played, printed, erased or protected.

MULTI-LANGUAGE SUPPORT**

Select from a number of different languages for on-screen menu text. The interface choices may include English, German, French, Dutch, Danish, Finnish, Italian, Norwegian, Swedish, Spanish, Simplified/Traditional Chinese, Japanese, Korean, Russian, Portuguese, Greek, Polish, Czech, Hungarian, Turkish, Thai, Arabic, Romanian, and Ukrainian.

SLIDE SHOW*

Newer PowerShot cameras offer the convenience of viewing captured images and movies as a Slide Show on the camera's LCD screen. You can individually choose which images and movies to include or select them by date or folder.

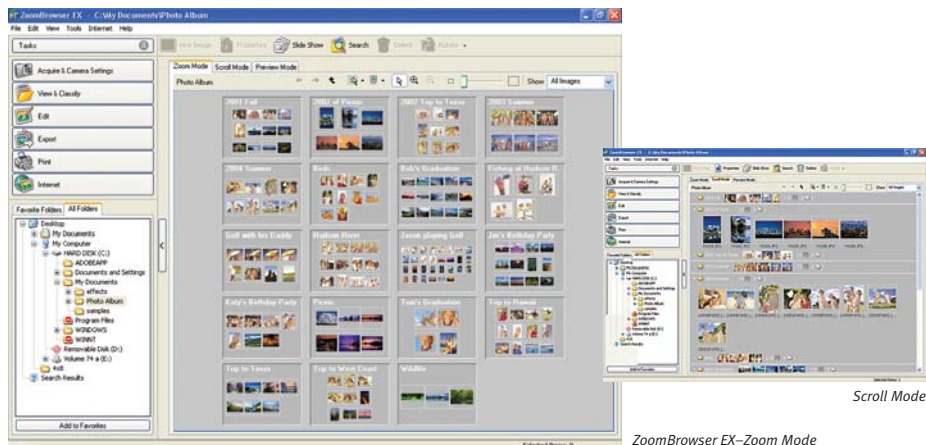

SOUND MEMOS

While viewing images in Playback mode, users can speak into the camera to record sound memos up to 60 seconds per image. It's great for making technical notes or creating audio captions for future reference.

Software

Every Canon PowerShot camera kit includes a comprehensive software bundle that gives the owner of a Windows or Macintosh computer a powerful set of tools for camera control, image file management and image viewing and editing.

Scroll Mode

ZoomBrowser EX—Zoom Mode

ZOOMBROWSER EX (WINDOWS)/IMAGEBROWSER (MAC)

ZoomBrowser EX for Windows and ImageBrowser for Macintosh provide essential camera connectivity, file management and image viewing functions. Version 6.0 provides five new features: 1) you can print (a) one photo per page or (b) index prints with selectable shooting information alongside, 2) USB 2.0 Hi-Speed makes downloading even faster, 3) Shooting information is available in tables along with several photo views allowing easy comparisons of the settings, 4) New editing functions make photo modifying more flexible than ever, and 5) you can now extract the best scene or images from a movie as stills.

Movie Editing

Enjoy full-featured movie editing and cropping, including merging multiple movies and stills, adding titles or comments, creating transitions and other effects. In addition, newer PowerShot cameras record movies in 1-second increments that allows highly flexible editing with quick data-save performance.

Easy Image Viewing

Zoom Mode: Enables direct access to all the images regardless of the folder structure. Displays all the images including the images within the sub-folder.

Scroll Mode: When a large number of images exist in a folder, users can open images within multiple folders and view these images simultaneously.

High-Speed Viewing

Use this software to browse quickly though huge numbers of photos. It minimizes the time to display all thumbnails in a folder.

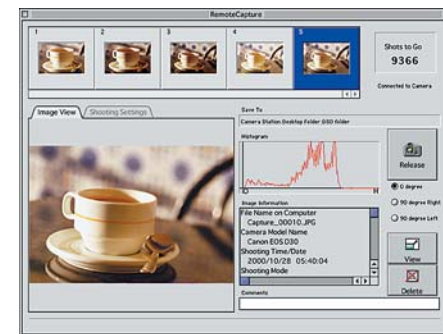

Red-Eye Correction

There are both Auto and Manual Modes to correct the red-eye caused by night or indoor shooting simply by selecting "Red-eye Correction" from the edit menu.

REMOTECAPTURE* (WINDOWS/MAC)

Integrated into ZoomBrowser EX/ ImageBrowser, this handy program lets you control many camera operations from a computer. View a live image, adjust zoom, set image size, quality, and other shooting conditions and take the shot ... all by "remote control" on your computer. A new interface clearly displays all functions.

Remote Capture

DIRECT TRANSFER* (WINDOWS/MAC)

PowerShot cameras with the Print/Share button* greatly simplify the transfer of image files to a computer. With the software installed and the camera connected to a PC, simply press the Print/Share button to initiate the file transfer process. A menu will appear on the camera's LCD, giving you a number of flexible file transfer options, including the transfer of a selected image and making it your computer's new desktop wallpaper.

Digital Photo Professional

DIGITAL PHOTO PROFESSIONAL FOR EOS DIGITAL (WINDOWS/MAC)

Take full advantage of the RAW mode capability of certain Canon EOS Digital cameras using this handy program. Features include fast batch conversion of RAW files to other formats, such as TIFF and JPEG, RAW image preview at high speed, detailed control over numerous parameters, histogram display and thumbnail catalogs.

PHOTOSTITCH (WINDOWS/MAC)

Line up sequential images horizontally, vertically or in 2 x 2 matrices to create ultra-high-resolution panoramic prints and posters. PowerShot cameras provide a Stitch Assist feature that helps you more accurately align consecutive shots for easier joining within the PhotoStitch application.

RAW IMAGE TASK*

RAW Image Task allows users full editing abilities of RAW image files taken with the PowerShot G9. The easy-to-use software allows complete post-shooting adjustment of exposure, color, contrast, white balance and more. Print directly from the RAW or export to tiff or jpeg for a complete, powerful image editing solution.

Maximum Per Clip Time**	1 hour or 4GB					3 minutes		2 hours	

† Storage Capacity varies depending on camera settings. This data is estimated from Canon's standard shooting conditions. Figures for Movie Mode represent total capacity of the particular media. Please check individual product literature for details. Maximum elapsed time for movie clips varies according to the camera model.

** Depend on the writing speed of memory card. Movie may stop recording before reaching to above length. For shooting 720p movies, a memory card with a nominal transfer speed of 20MB/sec. or faster is recommended.
