User’s Manual

Network Set-up and Operation

Wired Setting
Projector Set-up and Operation

This is the manual for the Network function. Read this manual thoroughly to operate the Network function. First, read the user’s manual of the projector to understand the basic operation of the projector and the safety instructions. The safety instructions in the user’s manuals should be followed strictly.

for LV-7490
Compliance

Federal Communications Commission Notice
Model: LV-7490
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.
Use of shielded cable is required to comply with class B limits in Subpart B of Part of FCC Rules.
Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.
Canon U.S.A., Inc.
One Canon Plaza, Lake Success, NY 11042-1198, U.S.A.
Tel No. (516)328-5600

Canadian Radio Interference Regulations
This class B digital apparatus complies with Canadian ICES-003.

⚠️ CAUTION IN USING THE PROJECTOR VIA NETWORKS
● When you find a problem with the projector, remove the power cable immediately and inspect the unit. Using the projector with failure may cause fire or other accidents.
● If you remotely use the projector via networks, carry out a safety check regularly and take particular care to its environment. Incorrect installation may cause fire or other accidents.

⚠️ CAUTION IN USING NETWORK FUNCTION
● We assume no responsibility for the loss or damage of data, or damage of the computer caused by using this projector. Making back-up copies of valuable data in your computer is recommended.
Safety instructions

Please read and understand all instructions thoroughly before using.

About safety symbols

The following symbols are used in this manual to alert you to important safety information. Always observe the instructions to reduce the risk of injury and property damage.

<table>
<thead>
<tr>

Safety information

**WARNING**

Always mount and operate the product in accordance with the safety instructions specified by the projector and peripheral equipment makers.

- Do not attempt to disassemble or service the product yourself. Doing so may result in a fire, an electric shock, or product damage.
- If the projector emits a strange odor, or makes a strange noise, immediately turn the power and peripheral equipment off, unplug these devices, and contact your dealer.
- Do not drop the projector or subject it to strong shocks. Doing so may result in damage to the internal parts, an electric shock, a fire, or product damage.

**CAUTION**

- The disk which comes with the product is a CD-ROM. As CD-ROM cannot be played back on an audio CD player, never play back on it. Playing back the disc will generate loud noise, resulting in damage to your hearing or the speakers.
- Do not touch the projector with wet hands when the power cord plugs of the projector or peripheral equipment inserted into the electrical outlet. Otherwise, an electric shock may result.

Chapter 1
Preparation

Describes features and operating environment of this projector.
Chapter 1 Preparation

Features

Web Management function (p.31)
With this function, you can monitor projector functions such as power status, lamp status, input mode, signal condition, lamp-use time, etc. through the network by using the web browser installed on your computer.

E-Mail Alert function (p.25)
The projector sends messages to the registered e-mail addresses when a lamp abnormality or power failure occurs with the projector. This message describes how to solve the cause of the problems. You can take efficient action for quick recovery.
**Features**

**Required operating environment for computers**
When operating the projector via networks, computers should meet the operating environment below.

Flow of installation

To use the projector via the networks, follow the setup procedures below.

**STEP 1**  
Connect the LAN and set the configuration.

Decide depending on the LAN environment.

➔ “2. Setup Procedures” (pp.11–16).

Detailed LAN configurations need to be done with a browser later.

First, complete the Wired LAN connection between computers and projectors, then start browser configurations.

➔ “3. Basic setting and operation” (pp.17–30).

**STEP 2**  
Network Configuration has completed.

Follow each chapter to operate the projector.

▪ Operate and manage the projector  
 ➔ “4. Controlling the projector” (pp.31-43)
  
  ➔ “Power Control and status check” (p.32)
  
  ➔ “Control” (p.34)
  
  ➔ “PC adjustment” (p.38)
  
  ➔ “Setting up the projector” (p.39)
  
  ➔ “Projector information” (p.42)
Chapter 2

Setup Procedures

Describes how to configure the network.
Setting procedures and contents differ depending on the LAN installation location. When installing, consult your system administrator to set up the LAN appropriately.

**Connecting to the LAN line**

Connect the LAN cable to the LAN connection terminal of the projector.

* Please use a shielded LAN cable.

**Network configuration**

Set the Wired LAN network through the projector menu. Detailed network settings will be made with browser. Refer to “3. Basic setting and operation” (p.17-30). First, complete the settings described in this chapter before performing steps in “3. Basic setting and operation.”

**Setting Procedure**

1. Select “LAN mode select” in the Network menu, and press Point ▶ or OK button.
2. Select similar LAN environment among LAN1, LAN2 and LAN3 with the Point ▲▼ buttons, and press OK button. Then the Menu will disappear, the “Please wait...” message will appear, and switching operation will start. Switching will take a while and the projector’s LINK/ACT Lamp will be on or blink, and after completing the operation, the “Please wait...” message will disappear.
3. Select "Network setting" in the Network menu and press OK button, and then the LAN setting screen will appear and selected LAN settings will be displayed. Adjust each item to the setting environment. Consult your system administrator about the detailed settings.

Press OK button in a row where you want to adjust, and adjust the figures with the Point ▲▼ buttons and move among the items with the Point ◀▶ buttons, and then press OK button to fix. Move to the next row with the Point ▲▼ buttons to adjust.

4. After completing all the settings, select “Set” and press OK button. Now, all procedures have been done. To cancel the adjusted settings, select "Cancel" and press OK button.

You can confirm the LAN settings you have made from “Network information” (p.14). In such cases that the LAN cannot be connected, see this screen.

**Item** | **Description**
---|---
DHCP | Sets DHCP function On or Off. When you setup the network setting manually, select "Off". When it is set On, IP address, Subnet, Gateway and DNS are automatically set according to your network environment.*1.
IP address | Sets IP address of the projector
Subnet | Sets Subnet mask according to your network environment.
Gateway*2 | Sets IP address of the default gateway (Router)
DNS*3 | Sets IP address of the DNS server.

* The numerical value is a setting example.

---

*1 Set “On” only when the DHCP server is available on your network environment.
*2 Set [255.255.255.255] if the network does not provide the gateway (router).
*3 Set [255.255.255.255] if you do not use the function E-mail alert.
Chapter 2 Setup Procedures

Network PIN code

The Network PIN code is to restrict the access to the projector through the network. After setting the Network PIN code, you need to enter it to operate the projector via the networks.

1. Select "Network PIN code" in the Network menu, and press OK button.
   The Network PIN code screen will appear.
2. Set the Network PIN code.
   Set the figures with the Point buttons and move to the next items with the Point buttons. Select "Set" and press OK button to set. To cancel the preset Network PIN code, select "Cancel". When you do not want to set the Network PIN code, set "0000".
   It is recommended to set the Network PIN code if you use the projector via the networks. The Network PIN code can be set also through the networks. See “3. Basic setting and operation” ➔ “Initial setting” ➔ “Network PIN code setting” (p.23).

Network information

Select "Network information" in the Network menu and press Point or OK button to show LAN setting environment of the currently selected projector. (The description below is an example and different from what will be shown.)

* The numerical value is a setting example.
Network factory default

1. Select “Network factory default” in the Network menu and press OK button.
2. A confirmation box appears and select "Yes" and then press OK button.
3. Another confirmation box appears and select "Yes" and then press OK button.
4. All the wired LAN settings will go back to the factory default settings. For details, refer to “Wired LAN factory default settings” (p.16).

Chapter 3

Basic Setting and Operation

Describes basic operations and settings for controlling the projector by using the web browser. It is required that computer and projector is connected to the network and the network address is properly configured.
Login the setting page of the projector

[1] Enter the IP address

Launch the web browser installed in your computer, enter the IP address into the "Address" on the browser and then press "Enter" key.

Enter the address that you configured in item "Network configuration" (p.12).

[2] Login

If the setting page has set the password, the authentication window will appear. In this case type "user" onto the User Name text area and the login Network PIN code onto the Password text area and then click OK (Log in) button.

* The entering User Name must be "user" and it can not be changed.

[Note]
When accessing the projector for the first time or the Network PIN code "0000" is set, the auto-login will be performed and the next main setting page is displayed.
[3] Display of main setting page

The following main setting page will be displayed according to your display mode selection. Perform various kinds of settings through this page. Click on the menus to display the control and setting pages.

Main setting page in the display

Main menu
For selection of control and setting items of the projector.

Setting page
Displays the control and setting items according to the selected menu.
Chapter 3 Basic Setting and Operation

How to use the setting page

To control and set up the projector, use the setting menus on the web browser. Describes the basic operation and procedures commonly used on this manual.

Example of the setting page

The setting menu appears when clicking the sub menu tab.

* Each item has a valid setting range respectively.

Types of setting

**Text box setting**

Enter a number or text and then click *Set* button.

or

Change a value with – or + button.

**Pull-down menu setting**

Select an item with pull-down menu button and then click *Set* button.

The value in the text box indicates current value.

* Each item has a valid setting range. The setting value exceeding this becomes invalid. Some control items can not be used depending on the selecting input mode or functions of the projector you use. In this case, the values of those items are indicated with "---".
How to use the setting page

Radio button setting
Select an item by selecting a radio button.

Check box setting
Select items by ticking on check boxes.
After installing the projector, perform the following basic initial setting. Click **Initial Setting** on the main menu to display the initial setting page.

---

**Initial setting**

---

</tr>
</tbody>
</table>

* The serial number in the figure is used for an example.
Initial setting

Network PIN code setting
This is to set the Network PIN code to restrict the access from an unauthorized person through the network. Enter a 4-digit number as the Network PIN code onto the text box and click Set button. The projector begins restarting and it takes about 10 seconds. Close (Quit) the web browser and access to the login page again in 10 seconds. This is to perform the login authentication firmly. The default Network PIN code [0000] means no Network PIN code is set.

* When you connect the projector to the network, it is recommended to set a new Network PIN code. Only a four-digit number is valid for the Network PIN code.

PJLink and password setting
This is to set the PJLink password authentication on or off. If set "ON" with the PJLink pull-down menu, the password must be required. Enter a password* onto the text box and click Set button.

*1 to 32 alphanumeric characters can be used for the password.

What's PJLink?
The projectors equipped with PJLink function can be used together on the same network, regardless of model or brand, for centralized control and monitoring. This standard was established by the Japan Business Machine and Information System Industries Association (JBMIA). Please visit the Website at http://pjlink.jbmia.or.jp/english/.

PJLink Notice
The projector is compliant with PJLink Standard Class 1 of JBMIA, and it supports all commands defined by PJLink Class 1 and is verified conformance with PJLink Standard Class 1.

Network configuration

Click **Network** on the main menu. The following setting page is displayed. The IP Address, Subnet Mask, Default Gateway, DNS (Domain Name Server) and projector name are set up on this menu.

The IP address and Subnet Mask have been configured already in chapter "Installation". If you want to change them or configure default gateway or DNS, perform them in this page. If you change them, the projector begins restarting and it takes about 10 seconds. Close (Quit) the web browser and access to the login page again in 10 seconds.

*1 Set [0.0.0.0] if the network does not provide the gateway (router).
*2 Set [0.0.0.0] if you do not use the function E-Mail alert.
*3 If you use the DNS server, register the host name registered to the DNS server as a projector name. You can access with this projector name from any computers in your network. If you do not use the DNS server, access with the assigned IP address to the projector.

* All the network setting will reset to the default when setting [0.0.0.0] of the IP Address.
** If you make incorrect settings, you cannot find out the new network settings. Be careful to set up them correctly, otherwise you cannot connect to the projector. It is recommended to make a note of them.
E-mail setting

This projector has an E-mail function which can send an alert message to users or an administrator if it detects an abnormality on the projector or run out of the life span of the lamp. So must be set this E-mail setting. Click E-mail setting on the main menu and follow the below steps.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SMTP server</td>
<td>Enter server name or IP address of the SMTP server. (up to 60 characters)</td>

<td>Enter SMTP password. (up to 63 characters)</td>
</tr>
<tr>
<td>POP server</td>
<td>Enter server name or IP address of the POP server. (up to 60 characters)</td>
</tr>
<tr>
<td>POP server port</td>
<td>Enter Port number of the POP server. (from 1 to 65535)</td>
</tr>
</tbody>
</table>
1 Setting SMTP server and administrator address

Enter the server name or IP address of the SMTP server*1, the port number of the SMTP server and administrator address and click Set button. The administrator address is set to "Reply-To" address of the message sent from the projector.

*1 The SMTP server is a server for sending e-mail. Please contact your network administrator to have this SMTP server address.

2 Registering and deleting E-mail addresses

Enter the e-mail address onto "Add e-mail address" and click Set button.

To check the registered addresses, click Check/Delete sub menu tab. The addresses are listed as the figure on the right.

✉ Up to 10 E-mail addresses can be registered.

To delete the registered addresses, check the address you want to delete and click Delete button.

✉ If the projector sends an alert message due to the abnormality on the projector but the SMTP server is down in some other reason, the message will not be sent. In this case, the message "Unable to connect to server." will be displayed on the setting page. To clear this message, set up SMTP server address again.

✉ To use the E-Mail function, it must be set the DNS address on the Network setting page correctly.

✉ You cannot use this E-mail function if the DNS server and SMTP server cannot be used in your network environment.

✉ The projector does not send message to the address set in "Administrator address" text box. If you want to send e-mails to the administrator address, enter the administrator address into "Add address" text box.
3 Setting SMTP authentication

Set the SMTP authentication concerned and click Set button. Please contact your network administrator in details.

4 Setting POP server

When "POP before SMTP" is selected at "Auth" of "SMTP Authentication setting", enter "POP server*2" and "POP server port" and click Set button.

*2 The POP server is a server for receiving e-mail. Please contact your network administrator to have this POP server address.

If the authentication is not completed when sending alert e-mail, the error message will be displayed. Please check the respective settings.

5 Option selection for sending alert mail

Click Option sub menu tab. Check the condition items under which alert mail will be sent and click Set button.

Please refer to item "Examples :Type and contents of alert mail" described on the next page.

"When PJ lamp is off" signifies the lamp goes out without user operation. "When PJ is turned into Standby in proper user operation" signifies that the projector is turned on by using the web browser and then it is turned into standby with ON/STANDBY button on the top control or the remote control.

Up to 99,999 hours can be set for use time.
Examples: Type and contents of alert mail

When the projector has an abnormality, the following alert messages are sent to the registered E-mail address according to your selected condition. Administrator or user can take an efficient action quickly by receiving this message.

The following are examples of received messages.

● When internal PJ temperature is too high:

TITLE: Message from projector
Projector Model Name: model name
TCP/IP: 192.168.1.201 Projector Name: Proj05

It sends you following message.

* The Projector lamp is turned off, because internal temperature goes over the safety limit. Wait for the completion of the cooling process and make sure the projector has been turned into Standby. Then turn the projector on again. If the Indicator continues flashing, check the air filter for dust accumulation.

● When PJ needs service:

TITLE: Message from projector
Projector Model Name: model name
TCP/IP: 192.168.1.201 Projector Name: Proj05

It sends you following message.

* Maintenance requirement from Projector is detected. Check up LED status of projector and consult with the dealer.

MCI  3.3V  OK  Error information
MAIN   ALL   NG

The projector lamp was turned off, because the projector power circuit failed. Unplug the AC power cord and plug it, and then turn on the projector once again to verify operation. If the problem still persists, unplug the AC power cord and ask servicing to a qualified service personnel with the error information.

● When PJ lamp replacement time is reached:

TITLE: Message from projector
Projector Model Name: model name
TCP/IP: 192.168.1.201 Projector Name: Proj05

It sends you following message.

* The projector lamp has reached replacement time. Lamp ON 3000 h

Replace it with a new lamp immediately and reset the lamp counter. If the projector is used without resetting the lamp counter, the alert mail is sent to users in every power-on of the projector. This alert mail will not be sent when unchecking the mail sending condition "When PJ lamp replacement time is reached".
SNMP setting

This projector provides a SNMP (Simple Network Management Protocol) agent function. The SNMP consists of a manager and agents. The group which communicates information each other with SNMP is called "Community". There are two access modes in a community, Refer (read only) and Set (read-write). This projector allows to use Refer (read only) only. The SNMP message informs the projector status called "Trap" to an administrator. Click **SNMP Setting** on the main menu and set up each item.

### PJ information

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contact</td>
<td>Enter user name of the projector etc. (optional)</td>
</tr>
<tr>
<td>Place</td>
<td>Enter place of the projector (optional)</td>
</tr>
<tr>
<td>Community name(refer)</td>
<td>Enter community name (read only). Default name is &quot;public&quot;</td>
</tr>
</tbody>
</table>

### Trap

<table>
<thead>
<tr>

</tbody>
</table>
Chapter 3 Basic Setting and Operation

**Trap check/delete**

**Check and delete the trap address**

Checking the registered trap address and deleting the address. To delete the address, tick check box in front of the IP address and click **Delete** button.

-up to 10 trap addresses can be registered.

**Trap option**

**Trap option setting**

Tick check boxes in front of the condition item to send the trap.

-click **Set** button if you tick or un-tick the check box on a page.

-Up to 99,999 hours can be set for the time setting.

"When PJ lamp is off" signifies the lamp goes out without user operation. "When PJ is turned into Standby in proper user operation" signifies that the projector is turned on by using the web browser and then it is turned into standby with ON/STANDBY button on the top control or the remote control.

-Up to 99,999 hours can be set for the time setting.
Chapter 4
Controlling the Projector

Describes controlling and setting of the projector by using the web browser.
Click **Power & Status** on the main menu. The control page will be displayed.

By clicking **ON** or **Standby** button on the page, the power of the projector can be controlled.

**Item** | **Description**
--- | ---
**PJ status** | **Power** Displays the status of the lamp. (ON, OFF, On starting up, On cooling down, Service in need)  
Status Displays the status of the projector's power. (Refer to next page.)  
**Power control** Controls the projector power by clicking the "ON" or "Standby" button.

The web browser checks and updates the projector’s condition every 30 seconds automatically.
About projector condition

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Projector is operating normally.</td>
</tr>
<tr>
<td>Power management in operation</td>
<td>Power management is operating</td>
</tr>
<tr>
<td>Lamp failure</td>
<td>Lamp failure is occurring</td>

<tr>
<td>Abnormal Temperature</td>
<td>The temperature of the projector became too high</td>
</tr>
<tr>
<td>Standby after Abnormal Temp.</td>
<td>Projector detects abnormal temp. and sets into standby mode.</td>
</tr>
<tr>
<td>Power failure</td>
<td>Power failure has occurred inside the projector. Projector is turned off. Unplug the AC cord and ask servicing to a qualified service personnel.</td>
</tr>
</tbody>
</table>

When a security (PIN code lock) has been set on the projector, you also cannot control it through the network. To control the projector through the network, unlock the security on the projector using with the projector's menu control.

Caution about turning on/off the projector via the networks
When turning on/off the projector via the networks, preset the projector as follows:
1. Select “Setting” from the Projector menu.
2. Select “Standby mode” from the Setting menu and set it as “Network”.
If you set this function as "Network", the network part of the projector is constantly provided with power even if the projector is turned off. If you set this as Eco, then the network part will be turned off when you turn off the projector. Consequently, you cannot turn on/off the projector via the networks.
Chapter 4 Controlling the Projector

Control

Click **Control** on the main menu. The setting method differs depending on the contents of the page. Click on the page number to change pages and select desired setting items.

✶ Please see the user's manual of the projector to have the further information of each control item.

Input

This function is to select the input mode and source mode of the projector. Click **Set** button after selecting the input and source mode.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Input</strong></td>

Connection examples
Use of telnet
Web browser setting
Q & A
Examples of connection

**Peer-To-Peer connection**
Connecting the projector (PJ01) to the control computer (PC05) directly.

Connecting the projector (PJ01) to the control computer (PC05) via the hub.

> When the projector is connected to the computer directly without hub, the STP cross cable should be used.
The gateway (Router) installed in the network

Connecting the projector (PJ01) to the control computer (PC05) via the gateway.
Use of telnet

You can control the projector by using the telnet application installed on your computer. Normally, the telnet application is available on your computer.

* The telnet 10000 port is used to control the projector.

Control

(For example, in case of using the telnet application of Windows XP Professional.)

1. Select Run... submenu from Start menu on the computer. Type "telnet" onto the Open text area on the displayed window and press OK button.

2. The telnet application will start and the following window will be displayed. Type as below to connect the projector.
   
   > open 192.168.1.201 10000 [return]

* Use the IP address assigned to the projector.

(For example, in case of using the telnet application of Mac OS X v 10.4)

1. Select Terminal from Applications -->Utilities.

Type as below on the displayed window.

   > telnet [return]

   Last login: Wed Jan 30 06:17:19 on tty1
   Welcome to Darwin!
   Macintosh:~ # telnet
   telnet> 

   Last login: Tue Feb 7 05:19:08 on tty1
   Welcome to Darwin!
   Macintosh:~ # telnet
   telnet> open 192.21.29.281 10000
   Trying 172.21.29.281...
   Connected to 172.21.29.281.
   Escape character is "[".

   * Use the IP address assigned to the projector.
3. When communication is established correctly, the word "PASSWORD:" appears on the window. Type the login password (Network PIN code*) for the projector and then press "Enter" key on the keyboard. If you do not set up the Network PIN code, just press "Enter" key.
When the word "Hello" is replied, login has been succeeded.
* The password "1234" is used for the example.

4. Type the commands, refer to below table, to control the projector and then press "Enter" key for termination. For example, type "C00" which is a command to turn on the projector, and press "Enter" key. Confirm the projector is turning on.
* Enter with ASCII 64-byte capital characters and one-byte characters.

To disconnect the communication, press "Ctrl" key and "]" key at the same time, type "close" and then press "Enter" key on the Keyboard.
> close [return]

The table below shows the typical command lists for controlling this projector and please consult your local dealer for further information of another commands.

<table>
<thead>
<tr>
<th>Command</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>C00</td>
<td>Power on</td>
</tr>
<tr>
<td>C02</td>
<td>Power off</td>

</tr>
<tr>
<td>C1D</td>
<td>Menu display off</td>
</tr>
</tbody>
</table>

*1 Further instructions about the telnet application, please see the on-line guide on your computer.
*2 The password is a Network PIN code decided item "Network PIN code setting" (*pp.14, 23). If the authentication of the entered password is failed 4 times continuously, the communication will be disconnected automatically. Please try again for the connection.
☞ If the password or any command is not entered for more than 30 seconds, the communication will be disconnected automatically. Please try again for the connection.
Web browser setting

This projector is designed to be set up and controlled from an Internet web browser. Depending on the preference settings of the web browser, some control functions may not be available. Please make sure that the following functions are set up properly in the web browser.

Active Script/JavaScript enable

There are some control items used with the JavaScript function in the setting pages. If the web browser is set not to use this JavaScript function, it may not control the projector properly. In this case, the warning message "Make sure JavaScript is ON." will be displayed on the top of the page. To enable the JavaScript, please see further instructions on the next page.

Proxy setting

In some cases, your web browser is set up to use the proxy server for the internet or intranet connection. In this case, when you install this projector into the local network, you should set up the proxy setting of web browser preference correctly. Especially when connecting the projector and computer with a STP cross cable directly, or when the network does not provide the proxy server, make sure that "not use proxy server" is set up in your web browser preference. Please see item "Examples: OS/Browsers" in the next page for further setting up procedure.

There are various ways to change your browser preferences depending on the version or applications. Please see the setting instructions on next page for example and also refer to on-line help of your web browser.
Examples: OS/Browsers

Windows XP Professional

*Internet Explorer v.6.0*

ActiveScript setting

Select **Internet Options** from **Tools** menu on the web browser and then select **Security** tab and click **Customize Level**… button. On the security setting window, scroll down and find the **Scripting** item, make sure that "Enable" is selected in item **Active Scripting**.
Proxy setting

Select Internet Options from Tools menu on the web browser and then select Connection tab and click LAN Settings button. Properly set up your web browser’s the proxy server settings according to the local area network environment to which the projector is connected.

- Using proxy server

To use an external internet connection from the local area network, check the item Use a proxy server and enter the proxy server address and port correctly in the proxy settings window. For further instruction please consult your network administrator.

- Not using proxy server

Uncheck the item Use a proxy server.

If you connect the projector to the computer directly with STP cross cable, this must be unchecked.

To designate proxy settings that will not use the proxy server when accessing the projector installed in the local area network, enter the IP address or domain name here.
**Netscape Navigator v.7.1**

**JavaScript Setting**
Select **Preference** from **Edit** menu on the web browser and then select the item **Advanced/Scripts & Plugins** in the **Category** column. Make sure that the **Enable JavaScript for Navigator** is checked.

**Proxy setting**
Select **Preference** from **Edit** menu on the web browser and then select the item **Advanced/Proxies** in the **Category** column. Properly set up your web browser’s the proxy server settings according to the local area network environment to which the projector is connected.

**- Using proxy server**
When you use an external internet connection from the local area network, select the item **Manual proxy configuration**. Enter the proxy server address and port number correctly on **HTTP Proxy** item. For further instruction please consult your network administrator.

**- Not using proxy server**
Select the item **Direct connection to the Internet** in the proxy setting window. If you connect the projector to the computer directly with STP cross cable, this must be selected.

To designate proxy settings that will not use the proxy server when accessing the projector installed in the local area network, enter the IP address or domain name here.
Chapter 5 Appendix

MAC OS X v 10.4

**Safari v.3.2.1**

JavaScript enable setting
Select **Preferences...** from **Safari** on the web browser and then select **Security** tab and check **Enable JavaScript**.

Proxy setting
1. Open **Preferences...** from **Safari** menu on the web browser **Safari**. The preference menu appears.
2. Select **Advanced** icon and then click **Proxies: Change Settings ...**.
3. Select **Proxies** tab and properly set up your web browser **Safari**'s the proxy server settings according to the local area network environment to which the projector is connected.

- **Using proxy server**
To use an external internet connection from the local area network, check the items **Web Proxy (HTTP)** and **Secure Web Proxy (HTTPS)** of **Select a proxy server to configure** window and enter the proxy server address and port correctly in **Web Proxy Server** window. For further instruction please consult your network administrator.

- **Not using proxy server**
Uncheck the items **Web Proxy (HTTP)** and **Secure Web Proxy (HTTPS)** of **Select a proxy server to configure**.
If you connect the projector to the computer directly with STP cross cable, they must be unchecked.

To designate proxy settings that will not use the proxy server when accessing the projector installed in the local area network, enter the IP address or domain name here.
Q&A

Installation/Access

**Q** Why doesn’t the setting page appear in my web browser?

**A** Following causes are possible. Please check them.
1. The projector does not connect to the network.
   Check LED indicators status (p.12).
   - Check the connection of LAN cable if the LINK Lamp does not light green.
   - Check the network configuration of the projector if the ACT Lamp does not blink orange.
2. Wrong network configuration of the computer.
   Check the network configuration of the computer.
3. The proxy setting of the web browser is not set correctly (p.52).
4. The computer does not provide TCP/IP protocol.

**Q** How can I restrict access from the computer.

**A**
1. Please use the password authentication function on the login page (p.23).
2. Please use the IP filtering function provided with the gateway (router) to restrict the accessing from the computer. For further information please consult your network administrator.

**Q** Can I access the projector installed on the company’s local area network from a remote location?

**A** There are some ways to access to the projector in the LAN, but you must consult your network administrator for security reason.
- Use of modem
  (Connect to the company’s network from your home or some other places by using modem.)
- Use of private line
  (Connect to the company’s network from the branch office or maintenance office by using private line.)
- Use of internet
  (Connect to the company’s network from your home, branch office or some other places by using the internet.)
We use the DHCP/BOOTP server to assign the IP address. Is it possible to use the projector in this network environment?

Possible. This projector supports the DHCP/BOOTP server. To use this projector in this network environment, set it up so that the DHCP/BOOTP server does not assign the IP address configured to this projector for another device on the network. Please consult your network administrator (pp.13, 24).

How can I install several projectors?

Install and configure network one by one to avoid the IP address collision each other. To configure the IP address please see item "Network configuration" (pp.12-13, 24).

What should I do when I forget the IP address of the projector?

You can check the IP address in the "Network information" menu.

What should I do when I forget the password (Network PIN code)?

Please set the new network PIN code in the "Network PIN code" menu.

Can I register the setting page as a web browser "Favorites" or "Bookmarks"?

Please add "Login" page to your "Favorites" or "Bookmarks". Do not add the specified setting page because it will not be able to perform the password authentication correctly.
**Operation**

**Q** Why can't be turned on/off with web browser?

**A** Please make sure the settings of the projector are correct to use the projector. Please set the Standby mode of the projector's Setting menu to "Network". Refer to "4. Controlling the Projector" ➔ "Power control and status check" (-separated pp.32 - 33).

**Q** Why can't I change the controls in the setting page with web browser?

**A** Please make sure the projector is turned on. If it is in the standby mode, the setting is not effective to the projector. To control the projector with a web browser, the projector must be in the powered-on condition.

**Q** Why does it sometimes take a lot of time to complete the page display?

**A** The display speed of the page depends on the network environment in which both the projector and computer are placed. It may take much time to complete the page display if network traffic is heavy. Please consult your network administrator.

**Q** How many numbers of the E-mail address can I register in the E-mail setting page.

**A** You can register up to 10 addresses.

**Q** Why am I not receiving E-mail alert messages?

**A** Make sure that the registered E-mail address and SMTP server address are correct. If the SMTP server is located in your LAN (Local Area Network), the address should be set to the SMTP server in your LAN. The SMTP server located outside of your LAN may not be available for security reason. For further information please contact your network administrator (-separated p.25).
What are the rules for IP address assignment?

If the network is constructed with TCP/IP protocol, a unique IP address is required for each piece of network equipment. The following are basic rules of the assignment.

Rule 1
Do not configure the same IP address to the network equipment in the same network group. Each piece of equipment must be assigned a unique IP address.
If the IP address is set [192.168.x.x], the Subnet Mask should be set [255.255.255.0] for example.

Rule 2
The start address [xxx.xxx.xxx.0] and the last address [xxx.xxx.xxx.255] of the IP address must not be assigned to any other equipment. These address numbers are reserved.

Rule 3
The IP address must correlate to a network number. If network numbers are different between the equipment, they cannot establish communications each other. In this case, the router is placed in the networks to make the routing.

Can I control the projector by using the telnet application?

Possible. Please refer to the item "Use of telnet" (p.48 - 49).

What is the MAC address assigned to the projector?

The MAC address is displayed in "Network information" menu of the projector (p.14) and in "Information" menu through the web browser (p.42).
Can I update the firmware of the projector.

It is possible to update the firmware through the network. It is required to have a special tool for the updating. For further information please consult your local dealer. The version number of the firmware is indicated on the lower part of the "Initial setting" page.
**Menu Tree**
