DVD CAMCORDER

your life on disc

From Canon comes the performance and ease-of-use of a DVD camcorder — in the affordable, super-slim, stylish DC100.

With the DC100, you get all the convenience and functionality of recording and sharing your videos with DVD technology. The DC100 delivers great video and makes it easy to capture the precious moments in your life.

- Genuine Canon Optics: 25x Optical Zoom
- Widescreen HR Recording
- Dolby Digital Stereo
- Super Slim Design

record direct to dvd

The DC100 digital camcorder gives you all the convenience of DVD technology by letting you record directly to DVD. Only 3" (8cm) in diameter, DVD-R/-RW discs can store up to 60 minutes of video (120 minutes on a double-sided disc) and are compatible with most DVD players. The DC100's DVD functionality gives you a variety of options for shooting and sharing your special moments. You can easily locate your scenes without having to rewind or fast forward, create playlists of your favorite scenes, and even do some quick editing right in your camcorder.

widescreen hr recording

The DC100 records true High Resolution Widescreen for picture perfect video. Canon's Widescreen HR Mode uses the entire width of the image sensor, capturing true 16:9 widescreen. That means more pixels — which means amazing image quality. Plus, the Widescreen Button lets you switch from standard 4:3 to 16:9 at a single touch, while a big, 2.7" LCD screen lets you see exactly what your DC100 is recording. And, even if you don't have a Widescreen TV, you can still watch the Widescreen HR you recorded with your DC100 on your standard television, in letterbox format. The DC100 is just what you need to complete your home theater experience.

canon optical performance

For decades, the name Canon has been synonymous with optical excellence. That's why Canon's expertise in designing lenses for photography and broadcast television goes into every camcorder lens we make. That means your DC100 gives you video that's rich in color and detail. The DC100 is also equipped with a built-in, high quality Image Stabilizer for rock-steady video — even when you're recording at maximum telephoto without a tripod, or when you're panning and zooming. Plus, the DC100's 25x Optical Zoom Lens and 1000x Digital Zoom give you the zoom range you need to capture every shot. Whether it's a panoramic view of a majestic landscape, or a close-up of your child on stage, you'll get the shot with the DC100.

THE OFFICIAL
CAMCORDER
OF *Life*

brilliant video

The DC100 features Canon's exclusive DIGIC DV image processor for vivid video with exceptional color and clarity. The DC100 also comes with features — found on much more expensive camcorders — that help you capture brilliant images. The new Level Shot Control feature gives you a horizontal marker in your viewfinder to help you keep your camcorder level. It also provides a marker in your viewfinder to help you center your subject. Plus, Smooth Zoom Control gives you 3 fixed zoom speeds to ensure smooth, steady zooms automatically. Your friends and family will be impressed by the professional looking video made possible with your DC100.

audio excellence

To match the brilliance of its video image quality, the DC100 records audio with Dolby Digital Stereo. That ensures a complete movie theater experience in the comfort of your living room with the vivid memories that you captured for your friends and family.

additional features

- Built-in Lens Cover
- 2.7" LCD Screen with Backlight
- Easy Menu System
- 9 Digital Effects/9 Fades (Camera Mode)
- 12 Selectable Display Languages
