BENEFIT FROM OUR OPTICAL EXPERIENCE

The heart of any projector is its optics. Nearly 70 years of expertise in designing and crafting precision lenses for photography, broadcast TV cameras and camcorders goes into every lens we manufacture. Our projector lenses deliver remarkably broad zoom ranges and incredibly short throw distances and consistently produce images with superior color and clarity.

MAXIMUM IMPACT IN MINIMUM SPACES

Normally, a projector must be positioned far away from a screen to project a large image. This is not the case with Canon projectors. They feature wide-angle zoom lenses, allowing you to achieve big, vibrant images from as little as 9.2 feet (2.8m), making them ideal for a small conference room.

OPTIONAL ACCESSORIES

FOR LV-7575

Network Imager LV-NI02
The Network Imager LV-NI02 connects the LV-7575 to your computer network, enabling remote management of the projector through a simple browser-based graphic user interface. This makes a number of tasks easier, such as programming for operation on a daily or weekly schedule, input mode switching and picture adjustment.
Send status alerts via email, furthermore, it offers remote transfer of images, and centralized control of multiple projectors.
