If Your Wall Plate Has Two Jacks

Use the jack that supports the fax line.
If your wall plate provides one jack for two phone lines, it would be best to use a “2 Line 3 Way Adapter.” This adapter can be purchased at most stores that sell electronics. This device creates three plugs where there was one. One jack will be for your voice line. The other jack can be used for your fax transactions. In most cases, line 1 (L1) is used for phone calls; L2 is used for faxing. The third jack (L1+L2) allows access to both lines. This is where you would plug in a 2-line telephone, if available.

The L1 jack is usually your voice line

The L2 jack is usually your fax line
Fax to Phone Line Connection

First, connect one end of the supplied telephone cord to the telephone jack on the wall.
Fax to Phone Line Connection

Next, connect the other end of the supplied telephone cord to the lower jack (labeled “L”) on the MX882.

Setting Up The Receive Mode
Step 1

Turn on the MX882 by pressing the ON button.

Step 2

Press the FAX button.
Step 3
The fax standby screen will appear.

Step 4
Press the center FUNCTION button.
Step 5
The Receive mode settings screen will appear.

Step 6
Use the UP or DOWN button to select “FAX only mode”.
Step 7
Ensure that “FAX only mode” is highlighted.

Step 8
Press the **OK** button.
Step 9

Your MX882 is now set to FAX only mode. Notice that the mode is listed on the fax standby screen.
To Receive A Fax

When a call comes in on the fax line, the MX882 will answer the call and begin receiving the fax.

You do not have to be home or interact with the MX882 to receive a fax.
