

IRIS Powerscan 12

2025 Pick Award

IRIS Powerscan 12 from Canon has won a BLI 2025 Pick Award from Keypoint Intelligence thanks to its...

- Ability to process up to 10,000 pages per day per workstation in the Essentials Edition alone, optimal for high-volume environments
- Comprehensive OCR and indexing with support for 139 languages, barcode recognition, and dynamic metadata handling
- Multi-channel document capture from scanners, MFPs, email, and folders, with integration to leading cloud and ECM platforms
- Advanced workflow automation including batch processing, custom rules, and real-time tracking to optimize efficiency
- Enterprise-grade security such as AES-256 encryption, SSL-secured transfer, digital signatures, and role-based access control

IRIS Powerscan 12 stands out for its ability to process documents quickly and accurately while offering a deep set of automation tools,” said Keith Haas, Analyst in Keypoint Intelligence’s Workplace Group. “From multi-channel capture and multilingual OCR to seamless cloud and ECM integrations, the platform is built for organizations that need to manage large document volumes without compromising security or compliance. Whether deployed in legal, healthcare, finance, or government environments, IRIS Powerscan 12 ensures businesses can meet operational demands with confidence.”

The solution can handle the demands in modern, high-volume document settings. It works with TWAIN- and ISIS-compatible scanners and offers integration with popular cloud platforms as well as enterprise systems such as Canon Therefore and Laserfiche. The solution incorporates intelligent compression technology (iHQC) to significantly reduce file sizes while preserving image quality, helping organizations store and share documents more efficiently. Its advanced indexing and classification features—using barcode recognition, metadata tagging, and machine learning (ML)-based FingerPrint technology—accelerate document organization and retrieval. With real-time tracking, batch processing, and rules-based automation, IRIS Powerscan 12 reduces manual workloads while enables teams to redirect their time toward strategic, higher-value work.

"IRIS Powerscan 12 stands out for its ability to process documents quickly and accurately while offering a deep set of automation tools," Haas said. "By uniting multi-channel capture with multilingual OCR and built-in connections to cloud and ECM platforms, the solution helps organizations manage large document volumes without compromising security or compliance. For administrators, centralized tools streamline the often-complex tasks of configuring workflows, managing users, and maintaining compliance, reducing operational friction. Security is reinforced through safeguards such as role-based access and encrypted transfers, ensuring protection while enabling smooth transitions across existing hardware."

About Keypoint Intelligence

For over 60 years, clients in the digital imaging industry have relied on [Keypoint Intelligence](#) for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry's most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence to improve business goals and increase bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers', channels', and their customers' transformation in the digital printing and imaging sector.

About Smart Workplace Solution Pick Awards

Smart Workplace Solution Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including evaluation of key attributes such as features, usability, and value. Each product that passes its Keypoint Intelligence lab test earns a Highly Recommended or Recommended rating, with the best performers qualifying as Pick contenders.
