

IGS PRO NAMED "BEST OF SHOW" AT ISTE 2018 BY TECH & LEARNING

IGS Pro is a new offering for intelligent grading that enables teachers to create test answer sheets and review tests scores even more efficiently, on the cloud, and with advanced functionality, such as aligning tests questions with learning objectives.

Education technology experts working with Tech & Learning reviewed hundreds of products and solutions exhibited by vendors at the ISTE 2018 conference, which was held on June 25 – 27 in Chicago, IL. Winners were evaluated by anonymous Ed Tech experts on areas such as quality and effectiveness, ease of use, and creative use of technology.

"Once again, the ISTE show floor was inundated with Ed Tech—from the latest in makerspace gear to sophisticated upgrades of district-wide enterprise assessment software," said Tech & Learning's Managing Director of Content, Kevin Hogan.
