

Canon uniFLOW Online

Outstanding Cloud Output Management Solution

Canon uniFLOW Online has claimed the Buyers Lab (BLI) 2021 Pick Award for Outstanding Cloud Output Management Solution from Keypoint Intelligence thanks to its...

- Strong portfolio of features compared to other cloud-based output management solutions
- Improved productivity at the MFP thanks to robust MFP-embedded applications that support easy-to-use scan/capture/route and secure print release functionality
- Outstanding mobile support through the uniFLOW Online Print & Scan app
- Microsoft Universal Print integration

Between the cost of print and the infrastructure required to support it, businesses have good reason to lift as much of their print infrastructure to the cloud as possible. Canon uniFLOW, developed by NT-Ware Systemprogrammierung GmbH and sold exclusively through Canon and approved resellers, enables businesses to monitor, control, and secure print activity, track and recoup print costs, simplify mobile printing, optimize scan workflows, and manage output devices through a single platform hosted in the cloud. Not only does it eliminate costly infrastructure that requires a lot of IT attention, but it also helps businesses prevent print costs from running out of control, streamline digital workflows that intersect with paper-based information, increase worker productivity, and secure sensitive information that can be accessed at the MFP.

“There aren’t many solutions that can wrap up cost tracking, securing printing, mobile printing, scan workflow, and device management into a single solution like uniFLOW does—for that reason, uniFLOW Online takes home the Outstanding Cloud Output Management Solution for the third year in a row,” said Lee Davis, Associate Director of Software/Scanners at Keypoint Intelligence. “The latest

iteration expands on its already robust portfolio of features and functionalities, adding improved scan workflow, security, device and print management, and mobile printing capabilities as well as integration with Microsoft Universal Print.”

About Keypoint Intelligence

For almost 60 years, clients in the digital imaging industry have relied on Keypoint Intelligence for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry’s most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence—improving business goals and increasing bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers’, channels’, and their customers’ transformation in the digital printing and imaging sector.

About Buyers Lab Software Pick Awards

Document Imaging Software Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including evaluation of key attributes such as features, usability, and value. Each product that passes its lab test earns a Platinum, Gold, Silver, or Bronze rating, with the best performers qualifying as Pick contenders.
