

## Canon imageRUNNER ADVANCE 8585i

Outstanding 81- to 90-ppm A3 Monochrome MFP

The Canon imageRUNNER ADVANCE 8585i won BLI's Pick for Outstanding 81- to 90-ppm A3 Monochrome MFP for the Summer 2016 test season for its....

- Excellent reliability.
- Very good value proposition.
- High quality printed and copied output.
- Quick and accurate scanning.
- Easy operation from drivers and highly customizable control panel.
- Support for mobile printing and cloud-based services.

"When you consider the Canon imageRUNNER ADVANCE 8585i's excellent reliability and high drum yield, as well as on-the-fly toner replacement and support for remote access to service mode and remote firmware upgrades, uptime will be maximized," said BLI Manager of Lab Operations Joe Ellerman. "Printed and copied output is also impressive, with fully formed and dark characters, distinct fine lines, bold solids and clear transitions from light to dark shades."

"The device is also loaded with convenience- and productivity-enhancing features, including an easy-to-use control panel that can be customized with personal settings and shortcuts," said BLI Senior Editor George Mikolay. "And the intuitive print driver design makes navigating menus quick and easy. Mobile print support allows users to print on the go, while Canon Advance Cloud Portal provides users with access to Google Drive via your MEAP-enabled MFP's control panel. Fast scan speeds and small color file sizes, as well as support for scanning to fully editable PowerPoint and Word files without the need to manually retype information, are also time-savers. Users can streamline workflow and control costs even further by upgrading the device with MEAP open architecture, which allows for tight integration with uniFLOW and third-party solutions."

## About **BLI Pick Awards**

---

Twice a year with its Pick awards, BLI gives special recognition in each category to those products that provided the most outstanding performances in BLI's exhaustive lab tests. Its Outstanding Achievement awards acknowledge products or capabilities that stand out for attributes such as innovation, usefulness, energy efficiency or value.

BLI's awards stand alone in that they are based on a rigorous battery of lab tests that takes approximately two months to complete. The evaluation includes an extensive durability test, during a portion of which each unit is run at the manufacturer's maximum duty cycle. BLI's durability test is unique among office product evaluations and uniquely qualifies BLI to assess reliability, a critical factor for buyers and IT directors.

Other performance attributes evaluated include ease of use, media handling, productivity and value, among others. Each product that successfully passes BLI's lab test earns BLI's Recommended or Highly Recommended seal and a BLI Certificate of Reliability and the best performers qualify as Pick contenders. Consequently, a BLI Pick is a hard-earned award that buyers and IT directors can trust to better guide them in their acquisition decisions.
