

Canon imageRUNNER ADVANCE DX C5840i

Outstanding 40-ppm A3 Color MFP

The Canon imageRUNNER ADVANCE DX C5840i has claimed the BLI 2021 Pick Award for Outstanding 40-ppm A3 Color MFP from Keypoint Intelligence thanks to its...

- Maximum uptime thanks to near-perfect reliability and easy maintenance
- High-quality color and black output makes for professional-looking business communications
- Top-tier print functions and user-friendly walk-up activity for streamlined workflows
- Robust mobile printing and cloud-readiness for added flexibility, while high-usage apps and onboard tools save time and reduce costs

"The Canon imageRUNNER ADVANCE DX C5840i is a potent choice for any small or mid-size workgroup looking for a device that can keep workflows moving smoothly and efficiently," said Martin Soane, Keypoint Intelligence's European Lab Manager. "The device's reliability was nearly flawless, with just one misfeed experienced over 170,000 impressions. And, with simple maintenance procedures for replacing toner and clearing misfeeds and an above average maximum paper capacity, users can expect minimal disruption in the workplace. IT personnel can draw on Canon's excellent administrative tools and services—iW Management Console and Remote UI—to help them manage their print environment more effectively."

"Ease of use is another remarkable facet of the Canon imageRUNNER ADVANCE DX C5840i," said George Mikolay, Associate Director of A3 Hardware/Production at Keypoint Intelligence. "Touchscreen menus and print driver tabs are logical and easy to navigate, and both can be customized to a high degree to further simplify job programming. A timeline feature on the main screen shows recently performed jobs, which can be selected again for repeat work. Whether for archival purposes or to share with peers, digitizing documents will be a cinch given the device's rich scan features, including the ability to scan to Word and PowerPoint file formats, encrypt PDFs, and the automatic split of large scan files for more manageable email delivery. And, with inbuilt connectivity providing integration with cloud-storage destinations like Dropbox and OneDrive, scanned documents can be easily shared with peers across multiple locations."

About Keypoint Intelligence

For 60 years, clients in the digital imaging industry have relied on Keypoint Intelligence for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry's most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence to improve business goals and increase bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers', channels', and their customers' transformation in the digital printing and imaging sector.

About BLI Office Hardware Pick Awards

Buyers Lab Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including an extensive durability assessment and evaluation of key attributes such as usability, image quality, and value. Each product that passes its lab test earns the Highly Recommended or Recommended Seal and a Certificate of Reliability, with the best performers qualifying as Pick contenders.
