BLI
PICK AWARD
TESTED

The Canon imageRUNNER ADVANCE DX C5860i has claimed the BLI 2021 Pick Award for Outstanding 60-ppm A3 Color MFP from Keypoint Intelligence thanks to its...

- Flawless reliability and straightforward operability that translate to minimal downtime

- Robust scan features provide added flexibility for scan-intensive environments

- Outstanding security features and efficient device management for IT personnel

- Expansive mobile printing and cloud-readiness, with support for Apple AirPrint, Mopria, and Canon's proprietary PRINT Business app

"The latest addition to Canon's imageRUNNER ADVANCE DX portfolio impresses with faultless reliability, superb all-round user-friendliness, and enhanced connectivity, ensuring mid-size and large workgroups will keep productive day in and day out," said George Mikolay, Associate Director of A3 Hardware/ Production at Keypoint Intelligence. "For scan intensive workflows, the device offers robust scan to USB capabilities, small-size document support, easy programming of destinations including the ability to store domains and extensions as one-touch keys, multi-feed detection, and auto-file split to ensure large scanned documents are more manageable for email. Job programming is simple regardless if it's performed at the device or from the desktop. The touchscreen is logically organized and combines quick menu options with the main function buttons to make it easier for users to access their most pertinent settings, while a timeline feature enables them to perform recent jobs without the need to reprogram."

"From an IT perspective, the Canon imageRUNNER ADVANCE DX C5860i setup and ongoing management will be effortless, too," commented Martin Soane, Keypoint Intelligence's European Lab Manager. "Given the unit's easy-to-access misfeed locations and simple toner and paper replacement, along with a rich offering of administrative tools and utilities that include integration with iW Management Console and Remote UI. IT personnel have an impressive level of control over keeping downtime to a minimum. Canon's Unified Platform Firmware also enables the unit's controller and firmware to be upgraded at regular intervals and across a whole fleet of devices."

About Keypoint Intelligence

For 60 years, clients in the digital imaging industry have relied on Keypoint Intelligence for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry's most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence to improve business goals and increase bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers', channels', and their customers' transformation in the digital printing and imaging sector.

About BLI Office Hardware Pick Awards

Buyers Lab Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including an extensive durability assessment and evaluation of key attributes such as usability, image quality, and value. Each product that passes its lab test earns the Highly Recommended or Recommended Seal and a Certificate of Reliability, with the best performers qualifying as Pick contenders.
