

Canon imageRUNNER ADVANCE 6565i

Outstanding 61- to 70-ppm A3 Monochrome MFP

The Canon imageRUNNER ADVANCE 6565i won BLI's Pick for Outstanding 61- to 70-ppm A3 Monochrome MFP for the Summer 2016 test season for its....

- Excellent reliability.
- Very good value proposition.
- Outstanding productivity.
- High quality printed output.
- Easy operation from drivers and highly customizable control panel.
- Support for mobile printing and cloud-based services.

"The Canon imageRUNNER ADVANCE 6565i exhibited near-flawless reliability, and offers a high drum yield and high paper capacities," said BLI Manager of Lab Operations Joe Ellerman. "When you also consider that the device supports remote access to service mode and remote firmware upgrades, downtime will be minimized to the max. And its fast speeds when printing short-run or long-run print and copy jobs, or scanning in color or black and white, and impressive printed output mean documents will be output efficiently and presentably."

"The device is loaded with convenience-enhancing features, including an easy-to-use control panel that can be customized with personal settings and shortcuts," said BLI Senior Editor George Mikolay. "And the intuitive print driver design makes navigating menus quick and easy. Users can further streamline workflow and control costs by upgrading the device with MEAP open architecture, which allows for tight integration with uniFLOW and third-party solutions. Mobile print support allows users to print on the go, while Canon Advance Cloud Portal provides users with access to Google Drive via your MEAP-enabled MFP's control panel. If that's not enough, staple on demand support via the inner finisher allows users to make a copy and restaple it directly from the device. The inner finisher also features an option for staple-free stapling, which binds pages together by pressure versus staples, making separation easier later on, and also cutting down on consumable usage."

About **BLI Pick Awards**

Twice a year with its Pick awards, BLI gives special recognition in each category to those products that provided the most outstanding performances in BLI's exhaustive lab tests. Its Outstanding Achievement awards acknowledge products or capabilities that stand out for attributes such as innovation, usefulness, energy efficiency or value.

BLI's awards stand alone in that they are based on a rigorous battery of lab tests that takes approximately two months to complete. The evaluation includes an extensive durability test, during a portion of which each unit is run at the manufacturer's maximum duty cycle. BLI's durability test is unique among office product evaluations and uniquely qualifies BLI to assess reliability, a critical factor for buyers and IT directors.

Other performance attributes evaluated include ease of use, media handling, productivity and value, among others. Each product that successfully passes BLI's lab test earns BLI's Recommended or Highly Recommended seal and a BLI Certificate of Reliability and the best performers qualify as Pick contenders. Consequently, a BLI Pick is a hard-earned award that buyers and IT directors can trust to better guide them in their acquisition decisions.
