

Canon imageRUNNER ADVANCE C5535i

Outstanding 31- to 40-ppm A3 Color MFP

The Canon imageRUNNER ADVANCE C5535i, chosen by BLI analysts as winner of a Winter 2017 Pick for Outstanding 31- to 40-ppm A3 Color MFP, offers...

- Flawless reliability and exceptional ease of use
- Seamless functionality with a variety of mobile devices, cloud-based services, Canon and third-party solutions
- Standard Universal Login Manager, NFC, support for mobile printing and cloud-based services and remote access to service mode and firmware upgrades

“The Canon imageRUNNER ADVANCE C5535i is loaded with convenience- and productivity-enhancing features, including support for mobile printing and cloud-based services and remote access to service mode and firmware upgrades,” said BLI Senior Editor George Mikolay. “When you also consider the device’s highly intuitive drivers and fully customizable control panel, not to mention its fast print, scan and copy speeds, programming workflows day in and day out will be easy and efficient. And users won’t have to worry about figuring out procedures from a user manual since on-screen videos walk users through common tasks.”

“The device’s excellent reliability, high-capacity consumables and simple replacement procedures make maintenance requirements infrequent and a cinch,” said BLI Manager of Lab Operations Joe Ellerman. “The quality of printed and copied output is also impressive and will meet the needs of both general office and more marketing-heavy environments. Features that were once optional are now standard with the Canon imageRUNNER ADVANCE C5535i, including HDD encryption, PCL/PS Print, Wireless LAN and the Remote Operator’s Software Kit. Plus, the standard Universal Login Manager (ULM) ensures the confidentiality of output and allows an advanced level of customization for displays, settings and functions for users.”

About **BLI Pick Awards**

Twice a year with its Pick awards, BLI gives special recognition in each category to those products that provided the most outstanding performances in BLI's exhaustive lab tests. Its Outstanding Achievement awards acknowledge products or capabilities that stand out for attributes such as innovation, usefulness, energy efficiency or value.

BLI's awards stand alone in that they are based on a rigorous battery of lab tests that takes approximately two months to complete. The evaluation includes an extensive durability test, during a portion of which each unit is run at the manufacturer's maximum duty cycle. BLI's durability test is unique among office product evaluations and uniquely qualifies BLI to assess reliability, a critical factor for buyers and IT directors.

Other performance attributes evaluated include ease of use, media handling, productivity and value, among others. Each product that successfully passes BLI's lab test earns BLI's Recommended or Highly Recommended seal and a BLI Certificate of Reliability and the best performers qualify as Pick contenders. Consequently, a BLI Pick is a hard-earned award that buyers and IT directors can trust to better guide them in their acquisition decisions.
