

## Canon imagePROGRAF iPF770

### Outstanding 36" Color Wide Format Technical Printer

- Excellent print productivity performance, with much faster than average speeds across the board in BLI's tests.
- Superb media handling capabilities, including support for a wide range of media types and orderly print collection via a well-designed output stacker.
- Excellent detailing in architectural output and a larger than average color gamut on both plain and glossy photo quality paper.
- Easy maintenance procedures, plus a unique hot-swap ink tank system which enables on-the-fly ink replacement to ensure uninterrupted printing.
- Intuitive GARO print driver provides a more flexible media-saving Free Layout nesting function than offered by competitive units.

"The imagePROGRAF iPF770 delivered impressive speeds in BLI's productivity tests which range from printing a single page to multiple technical documents of different formats at once to simulate a real-world environment," said David Sweetnam, BLI's director of research and lab services EMEA/Asia. "Image quality was very good overall, with its architectural output, in particular, standing out for its highly accurate color reproduction."

BLI Senior Analyst Ian Latham commented, "Past experience has led us to expect very good ease of use with Canon wide format devices and, again, that proves to be true for the iPF770. Straightforward cloud file storage using Canon's iPF Direct Print & Share utility and support for mobile printing from Apple iPads, provides flexibility and convenience for users, especially those working collaboratively in multi-site locations."

"Canon is honored to receive a Pick award in the Wide Format Technical Printer category for our imagePROGRAF iPF770," said Junichi Yoshitake, senior vice president and general manager of Canon U.S.A.'s Business Imaging Solutions Group. "With a number of built-in features to help minimize ink consumption, media waste, and maintenance costs, this 36-inch printer offers an easy-to-use, cost-effective device, without sacrificing vivid and impactful image quality."

## About **BLI Pick Awards**

---

With its Pick awards, which are announced once a year for wide format devices, BLI gives special recognition in each category to those products that provided the most outstanding performances in BLI's exhaustive lab tests.

BLI's awards stand alone in that they are based on a rigorous battery of lab tests that takes approximately two months to complete. The evaluation includes an extensive durability test that is unique among office product evaluations and uniquely qualifies BLI to assess reliability, a critical factor for buyers and IT directors.

Other performance attributes evaluated include ease of use, media handling, productivity and image quality, among others. Each product that successfully passes BLI's lab test earns BLI's Recommended or Highly Recommended seal and a BLI Certificate of Reliability, and the best performers qualify as Pick award contenders. Consequently, a BLI Pick is a hard-earned award that buyers and IT directors can trust to better guide them in their acquisition decisions.
