

Canon uniFLOW Online

Outstanding Cloud Output-Management Solution

Canon uniFLOW Online was awarded a BLI 2019 Pick award as Outstanding Cloud Output-Management Solution from the analysts at Buyers Lab thanks to its:

- Cloud-based architecture enables businesses to save money and simplify administration by eliminating the on-premises server from the equation
- Track all print activity across the entire network, regardless of the device's make or model
- Granular reporting capabilities and usage controls help businesses unlock savings
- Secure pull printing capabilities safeguard sensitive printed information, reduce waste, and help organizations comply with privacy and document security regulations

Organizations striving to get a handle on their document imaging activity will often wind up with multiple solutions to address cost tracking, mobile and secure pull printing, document capture, and other output management needs. But such an implementation can be cumbersome, with multiple software packages running on various servers, each requiring different administration tools and ongoing management from IT personnel. The uniFLOW Online platform, developed by NT-ware Systemprogrammierung GmbH and sold exclusively through Canon and approved resellers, addresses all these needs and more in an easy-to-deploy cloud-based offering.

Canon uniFLOW Online enables organizations to keep track of all print, copy, scan, and fax activity across their entire fleet. Collected data can be used to accurately allocate print costs, while detailed reports on output usage can help identify potential savings. The solution also delivers secure pull printing capabilities as well as support for mobile printing, not to mention scan capture functionality on supported Canon MFPs.

"With uniFLOW Online, the company took the critical parts of its class-leading on-premises output management platform and rebuilt them from ground up to live in a hosted cloud environment," said Jamie Bsales, Director of Solutions Analysis for

Keypoint Intelligence. “This makes it a snap to deploy for IT-challenged small and medium-size businesses that might not have the resources to manage an on-site implementation. The company also streamlined the feature set to make the system easier to manage, while keeping the essential functions that make a print management platform worth having.”

About Keypoint Intelligence - Buyers Lab

Keypoint Intelligence is a one-stop shop for the digital imaging industry. With our unparalleled tools and unmatched depth of knowledge, we cut through the noise of data to offer clients the unbiased insights and responsive tools they need in those mission-critical moments that define their products and empower their sales.

For over 50 years, Buyers Lab has been the global document imaging industry’s resource for unbiased and reliable information, test data, and competitive selling tools. What started out as a consumer-based publication about office equipment has become an all-encompassing industry resource. In a landscape that’s ever evolving, we change with it.

About Buyers Lab Software Pick Awards

Buyers Lab Document Imaging Software Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including evaluation of key attributes such as features, usability, and value. Each product that passes our lab test earns Buyers Lab’s Platinum, Gold, Silver, or Bronze rating, with the best performers qualifying as Pick contenders.
