

Canon imageFORMULA ScanFront 400

Outstanding Workgroup Scanner

The Canon imageFORMULA ScanFront 400, chosen by BLI analysts as the winner of a Summer 2017 Pick award for “Outstanding Workgroup Scanner,” offers...

- Easy-to-use tablet-style 10.1-inch color touchscreen like those found on high-end MFPs
- Preconfigured workflows that streamline scanning chores
- An optional SDK that can be leveraged to custom-integrate scan workflows with business applications
- Optional integration with Canon’s uniFLOW capture and output-management platform

“With its stellar ease of use and flexible integration with uniFLOW and other business software, the Canon imageFORMULA ScanFront 400 is a very good choice for distributed scanning environments where the knowledge workers who need to capture documents are spread across different branches and office locations,” said Jamie Bsales, Director of Software Analysis for Keypoint Intelligence - Buyers Lab. “With a fleet of ScanFront 400 devices, businesses such as banks, law offices, insurance agencies, and healthcare providers can scan all of their important documents remotely to a central destination where they can be processed, stored, shared, and integrated into workflows.”

The ScanFront 400 offers an intuitive user experience through its 10.1-inch color touchscreen. Administrators can configure a number of one-touch buttons and deploy as many as 1,000 of them on the device’s control panel so users can quickly and easily execute frequently recurring scanning chores. And when integrated with Canon’s uniFLOW document capture and output management platform, administrators can build custom rules-based workflows to help streamline complex business processes and manage what users can do and see on the ScanFront 400.

“The ScanFront 400 proved to be very reliable and highly efficient during testing,” noted Joe Ellerman, U.S. Manager of Lab Operations for Keypoint Intelligence - Buyers Lab. “On top of completing our two-week, 30,000-scan durability test without a single mis-feed, it delivered faster-than-average scan speeds on most of our productivity tests.”

About **Keypoint Intelligence - Buyers Lab**

Keypoint Intelligence is a one-stop shop for the digital imaging industry. With our unparalleled tools and unmatched depth of knowledge, we cut through the noise of data to offer clients the unbiased insights and responsive tools they need in those mission-critical moments that define their products and empower their sales.

For over 50 years, Buyers Lab has been the global document imaging industry's resource for unbiased and reliable information, test data, and competitive selling tools. What started out as a consumer-based publication about office equipment has become an all-encompassing industry resource. In a landscape that's ever evolving, we change with it.

About **Buyers Lab Pick Awards**

Buyers Lab Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including an extensive durability assessment and evaluation of key attributes such as usability, image quality, and value. Each product that passes our lab test earns Buyers Lab's Recommended or Highly Recommended seal and our Certificate of Reliability, with the best performers qualifying as Pick contenders.
