Canon uniFLOW Online

Outstanding Cloud Output Management Solution

60TH ANNIVERSARY
BUYERS LAB
2022
BLI
PICK AWARD
· TESTED ·

Canon uniFLOW Online (v2021.3) has claimed the Buyers Lab (BLI) 2022 Pick Award for Outstanding Cloud Output Management Solution from Keypoint Intelligence thanks to its...

- Support for hybrid working environments

- Wide range of output management features

- Access control and data protection capabilities

- Robust portfolio of capture features and integrations with cloud services

Canon uniFLOW Online comes with a comprehensive collection of output management features to secure, track, control, and manage to help businesses manage their print environment in the cloud. The solution also makes it easy for users to be as productive at home as they are in the office. Accessing a device is as easy as waving a badge, and users can operate it using their smartphone or tablet to prevent the spread of contagions on control panels. Users also enjoy a consistent UI across their print environment, no matter which device they are using. Over the last year, uniFLOW Online has been updated and enhanced to work with other cloud solutions, provide businesses with even stronger security measures, and enable workers to automate scanning processes.

"For the fourth time in as many years, Canon uniFLOW Online is taking home a BLI Pick Award for Outstanding Cloud Output Management Solution," said Lee Davis, Associate Director of Software/Scanners at Keypoint Intelligence. "The solution's continued success shouldn't come as a surprise, as Canon has been continually upgrading and improving the solution, ensuring that customers have access to the latest and greatest output management capabilities available. In recent updates, Canon has added enhanced access control and scan/workflow functionality to protect sensitive data and optimize workflows where paper documents intersect with digital business processes."

About Keypoint Intelligence

For 60 years, clients in the digital imaging industry have relied on Keypoint Intelligence for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry's most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence to improve business goals and increase bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers', channels', and their customers' transformation in the digital printing and imaging sector.

About BLI Software Pick Awards

Document Imaging Software Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including evaluation of key attributes such as features, usability, and value. Each product that passes its lab test earns a Platinum, Gold, Silver, or Bronze rating, with the best performers qualifying as Pick contenders.
