

## Canon uniFLOW 2018 LTS

### Outstanding Enterprise Output & Scan Management Solution

The analysts at Keypoint Intelligence - Buyers Lab (BLI) have recognized Canon uniFLOW 2018 LTS as Outstanding Enterprise Output & Scan Management Solution for the 2018 software Picks season thanks to its key strengths and benefits:

- Unmatched integration of functionality among all the output management solutions that have been evaluated by BLI
- With a modular architecture, your business can purchase only the functionalities it needs and scale the solution as your business grows
- Advanced scan-workflow tools to automate processes, which helps your staff complete more tasks in less time with fewer mistakes
- Robust usage tracking, reporting, billing, cost reduction, output management, and cost recovery capabilities help your business identify and shrink cost centers related to printing, copying, scanning, and faxing
- Secure pull printing and Secure Audit Manager features help safeguard confidential information

While vital to a myriad of business processes, printing, copying, and scanning can be expensive and difficult to manage. While there is no shortage of cost accounting, print management, mobile printing, fleet management, document capture/routing and other solutions to choose from, they are typically sold separately and hence require a daunting investment in time and resources for deployment and ongoing administration. uniFLOW 2018 LTS, developed by NT-ware Systemprogrammierung GmbH and sold exclusively through Canon and approved resellers, packs all of these features and functionality—plus a host of others—into a single solution to help businesses effectively enforce print policies, reduce costs, optimise document imaging workflows, increase worker productivity, and ensure a secure document imaging environment.

“uniFLOW 2018 LTS is far and away the most comprehensive output management platform we’ve seen to date,” said Jamie Bsales, Director of Solutions Analysis at Keypoint Intelligence. “It delivers top-notch output accounting and cost-reduction features, plus management features that span from the office to the print room. And unlike some other print management products, the platform also offers robust scan capture, processing, and routing features to streamline document imaging jobs and increase productivity.”

## About Keypoint Intelligence - Buyers Lab

---

Keypoint Intelligence is a one-stop shop for the digital imaging industry. With our unparalleled tools and unmatched depth of knowledge, we cut through the noise of data to offer clients the unbiased insights and responsive tools they need in those mission-critical moments that define their products and empower their sales.

For over 50 years, Buyers Lab has been the global document imaging industry's resource for unbiased and reliable information, test data, and competitive selling tools. What started out as a consumer-based publication about office equipment has become an all-encompassing industry resource. Buyers Lab evolves in tandem with the ever-changing landscape of document imaging solutions, constantly updating our methods, expanding our offerings, and tracking cutting-edge developments.

## About Buyers Lab Software Pick Awards

---

Buyers Lab Document Imaging Software Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including evaluation of key attributes such as features, usability, and value. Each product that passes our lab test earns Buyers Lab's Platinum, Gold, Silver or Bronze rating, with the best performers qualifying as Pick contenders.
