

# PrintLog<sup>®</sup>

ACCOUNTING SERVER

## Centralized Print and Copy Management

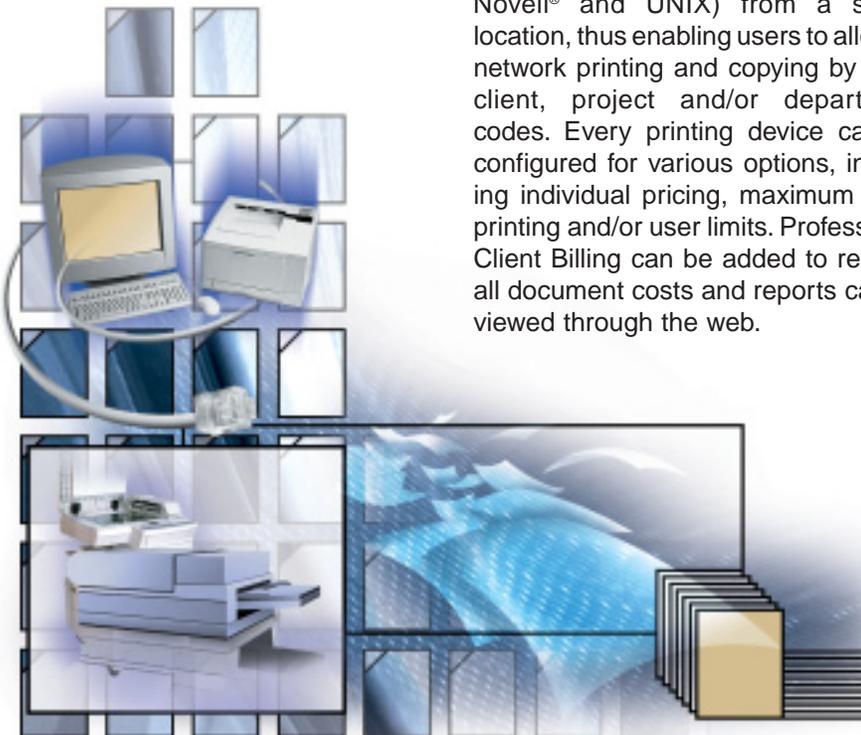

- **Allocate Costs Easily with Flexible Billing Options**
- **Adapts to Multiple Print Environments**
- **Release Documents Securely with MyPrint™**

PrintLog Accounting Server, Equitrac's next generation accounting server, is an advanced network print tracking solution that enables users to monitor, manage and measure all network document activity. Designed to easily install on most operating systems, PrintLog Accounting Server remotely monitors all print servers on the network (Windows® NT, 2000, Novell® and UNIX) from a single location, thus enabling users to allocate network printing and copying by user, client, project and/or department codes. Every printing device can be configured for various options, including individual pricing, maximum page printing and/or user limits. Professional Client Billing can be added to recover all document costs and reports can be viewed through the web.

PrintLog Accounting Server tracks network printing by requesting account information prior to releasing the job. Data collected is then sent to the server for consolidation and reporting. PrintLog Accounting Server offers a number of analysis tools, including:

- **Individual Device Configuration**
- **Analysis Toolkit for scenario costing**
- **Web based reporting for quick analysis**
- **Over 70 reports for detailed reviewing**

PrintLog Accounting Server's architecture works from an accounting server and one or more print servers. While maintaining centralized management and administration, PrintLog Accounting Server can provide true scalability in network environments with numerous user and device configurations. Add-on modules allow for additional print servers in Windows® NT, 2000, Novell® NetWare, or UNIX environments and even Macintosh services. By adding terminals, users can track all digital and analog documents and incorporate security and load balancing features with MyPrint™ technology.

# PrintLog Accounting Server Benefits

## Administration and Tracking

- Centrally managed and configured
- Complete audit trail of all transactions
- Accurately track and allocate document costs
- MyPrint for secure document release
- Assign print costs by user, group, printer and application
- Automated push installation procedures
- Flexible pricing by attribute for each output device

## Reporting

- Over 70 standard reports
- Additional web-based reports available
- Scheduled report generator
- Reports can be viewed, printed or e-mailed
- Export to HTML, CSV or RTF file types
- Device diagnostic reports
- Comprehensive analysis features

## Enhanced Features

- Enhanced client pop-up functionality
- Integration with PCDocs, WORLDOX and iManage
- Auditing architecture
- Enhanced management tools including wizards
- Seamless integration with PageControl Station and PageCounter 100

Now featuring Professional Client Billing Pop Up

## PrintLog Accounting Server System Requirements:

### Server requirements

Pentium III Processor  
Windows NT 4.0, 2000  
64 MB of RAM  
100 MB available disk space

### Workstation Support

Windows NT Workstation 4.0, 2000  
Windows 95, 98, Me, XP  
Apple Macintosh 8.1 or greater  
Unix (with LPR software)

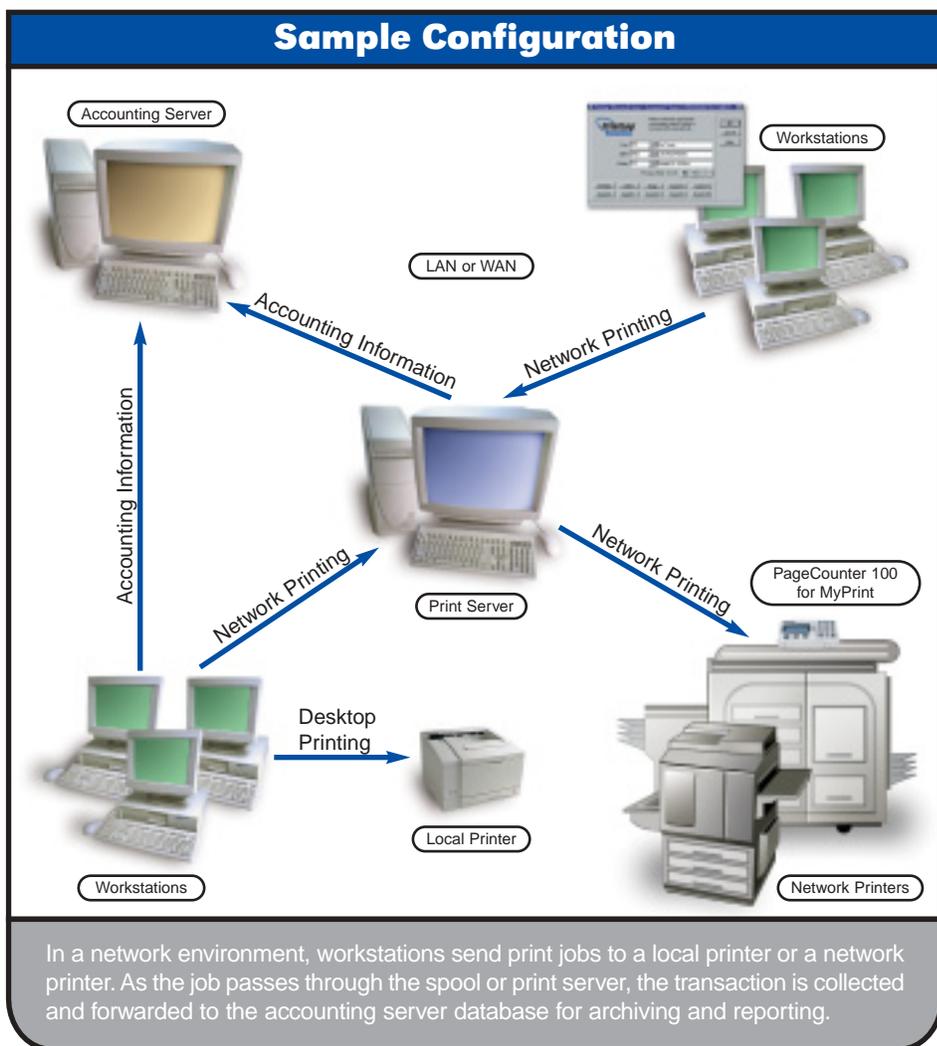

### Printer connectivity and support

PostScript, PCL & PCL6 printers  
All LPR-compatible adapters  
Parallel port connections  
All Windows NT-supported connections  
Many other network adapters

### DMS Integration

DOCSOpen (client and server):  
3.9.0, 3.9.5  
WORLDOX (client and server):  
WORLDOX 2000  
iManage (server): 5.3, 6.0, 7.1  
iManage (client): InfoRite 5.3,  
DeskSite 6.0
