Printer**Release**

S E R V E R ™

Control printing costs with an advanced Pay-for-Print solution

> **Superior Print Management**

> **Enhanced Waste Reduction**

> **Unparalleled Ease-of-Use**

Printer Release Server (PRS) helps control your printing environment, recover costs and eliminate waste by allowing you to easily charge for printing. Superior pay-for-print functionality and unparalleled ease-of-use allow PRS to offer a flexible and affordable print management solution for any-size environment.

Simple installation and functionality
PRS is easily installed and configured by your own staff members, and has little need for further administration. Comprehensive configuration tools and straightforward release capabilities ensure that PRS is readily used by your patrons.

Flexible pricing policies
■ Charge for all printing
■ Charge only for excessive printing
■ Differentiate cost by printer, color, or document size
■ Create separate policies for students and staff/faculty

Optional workstation controls
The PRS Print Assistant™ provides the option to offer the patron more control from their workstation. After the print command is used from an application the Print Assistant pop-up may

allow them to rename the print job, preview the printing cost, attach a release key, or cancel the job, all without leaving the workstation.

Custom Release Station design
The enhanced Release Station user interface ensures that patrons will quickly and easily view and print their queued documents. The customizable interface has a stylish and user-friendly design. Administrators can hide unwanted functions, or implement their own images to allow Release Station to visually assimilate into their environment.

A complete solution
PRS requires no client software or SQL integration. Our simple product offering provides scalability with additional Release Station modules and vending devices. Printer Accounting Server (PAS) provides account support, reporting and extended attribute pricing. Equitrac is your single source for a complete family of print vending products and print management tools.
