

CANON INFORMATION & IMAGING SOLUTIONS

Business Challenges:

"We think we are **spending too much** on printing and copying, but we're not sure how much."

"How can we get **a single overview** of our print and device-related expenses?"

"We want to understand the **hidden** energy and network **costs** associated with our devices."

"Is there a way to engage outside professionals to **manage printing** across our enterprise?"

"We need **a strategy to cut costs** while improving productivity."

PROFESSIONAL SERVICES

Business Process Optimization >

OUTPUT ANALYSIS & DESIGN

Reduce TCO and Maximize Technology Investments

The Output Analysis & Design service can help your organization ensure that your device fleet efficiently and effectively supports your business goals.

You can engage these services in one of two ways. Canon Information & Imaging Solutions can assess your organization and deliver a detailed report on your current situation with recommendations for improvement. Or if it makes sense for your business, they can also provide these services as part of a Canon Managed Document Service (MDS) engagement.

Many organizations today can uncover efficiencies they never knew possible. Why not reduce costs while printing more productively?

Professional Print Assessment and Optimization

Canon Information & Imaging Solutions can undertake an onsite assessment of your organization, and provide a detailed report with actionable information about your current print environment. They can also devise an optimization plan that enables you to reduce your Total Cost of Ownership (TCO) while maintaining a productive workplace.

Print Assessment services can deliver:

- An analysis of current usage practices for creating and printing documents
- A comprehensive count and breakdown of the output devices in your enterprise
- Print volume data that shows how much you're printing and what it costs
- Meaningful device utilization statistics, such as user ratio per device, cost per page per device, output cost per employee, total output costs, and more
- An environmental and sustainability report on your device usage

Fleet Optimization services can deliver:

- A replacement plan strategy to optimize print resources, while delivering a reduced TCO
- Solutions that can increase productivity, improve information security, optimize document workflows, and support environmental sustainability initiatives — as needed by your organization.

The end result is a clear, logical path forward that puts your organization on the road to an efficient but highly productive office.

Output Analysis & Design services can address the following areas:

Basic Device Utilization Assessment

The Basic Device Utilization Assessment uses network enterprise management software to create a device list and obtain usage statistics. It can help you understand performance trends, uncover gaps in device coverage, and find ways to improve and right-size your fleet.

Advanced Device Optimization Assessment

The Advanced Device Optimization Assessment provides a detailed report on your total print environment.

It includes application usage, page size, job size, and end user output behavior statistics.

Advanced Device Optimization Assessment & On-Site Walk-through

The Advanced Device Optimization Assessment and On-Site Walk-through offers all of the service elements of Advanced Device Optimization Assessment, but also accounts for print, fax, MFP, and copy machines not on your network.

Basic Cost Summary Assessment

A Basic Cost Summary Assessment determines the costs associated with usage. This can allow you to identify areas for improving efficiency, reducing costs, and increasing your return on investment.

Advanced Device Optimization Design

The Advanced Device Optimization Design service creates a comprehensive plan for implementing a managed print environment for TCO reduction, device efficiency, and optimization.

Moving to Managed Document Services

Output Analysis & Design is often the first step in a Canon Managed Document Services engagement. For many companies, managed document services offer a great way to understand and control their printing costs.

Canon Information & Imaging Solutions can assess your organization and help you determine if a Managed Document Services engagement is right for you.
