NOTES:

- Supported printing functions differ between printers so print data may be output without the print settings selected in the app depending on the printer model you are using.
- PDF Direct Print must be available on the imageCLASS device for PDF printing through this application.
- Color imageRUNNER LBP 5460, Color imageRUNNER ADVANCE LBP 5975, and Color imageRUNNER ADVANCE 5970 require the Hard Disk Kit HD-98B, PS-ROM A-98C, and Expansion RAM ER-128, ER-256, or ER-512 for PDF printing.

* Print methods for PDF files

- Output with PDF direct print if the Canon device has Direct Print Kit or PS Printer Kit
- Output by using Data Conversion Service on the Internet if the Canon device does NOT have the Direct Print Kit or PS Printer Kit.
- Render PDF file locally at the terminal (Default, if PDF direct is not available).
- A switch to enable/disable the use of PDF direct feature

** The Data Conversion Service on the Internet is used.

- For .xls/.xlsx files, the entire workbook is converted not individual work sheets.

***Some Microsoft Office files may not preview or print correctly depending on the content of their data. In such cases if you correct the layout with the Data Conversion Service, you can print the file with its original layout.
****Available specifications depend on printer feature

For printing with PIXMA series or SELPHY series printers, use Canon Easy-PhotoPrint.
