

SAP Specifications

SAP is the leading supplier of Enterprise Resource Planning (ERP) software to the world's largest corporations. The nature of SAP implementations is such that a significant amount of information is viewed and printed in a structured reporting format. In order to utilize the extended finishing capabilities inherent in the Canon devices, a Device Type for the specified device must be used.

Minimum Requirements for SAP Device Types are:

- SAP Customers must have SAP R/3 version 3.1 or later for Form printing.
- SAP Customers must have SAP R/3 version 4.5 or later for ABAP list printing.
- SAP Customers must have a supported Canon device.
- OCR Font Support is included only for devices with PCL drivers, not PS due to SAP Standard.
- Barcode Printing is optional and supported on devices equipped with available Barcode Printing Kit.

A full list of compatible Canon device types are available directly through the Canon USA website.
