

- Print speeds listed below reflect measured values based on Canon's unique measurement conditions and are for reference only.
- Actual print speeds may vary depending on printing conditions (document complexity, print frequency, temperature, humidity, printer driver settings and version, application used, system requirements, interface,
- Print speeds are calculated by rounding off the actual measurement value to the nearest integer.

Print Speed on Photo Paper (Required time for making a print)									
Print Pattern	 <p>4"x6" borderless ISO/JIS-SCID N2</p>								
Image Size	4" x 6"								
Measurement Method	Print speeds on photo paper are measured based upon making a single print under the above measurement conditions, starting from the beginning of paper feed using the automatic sheet feeder to the end of paper ejection.								
Media	Canon Photo Paper Plus Glossy II PP-201
