

■Print Speed Measurement Conditions for PIXMA MP640

- Print speeds listed below reflect measured values based on Canon's unique measurement conditions and are for reference only.
- Actual print speeds may vary depending on printing conditions (document complexity, print frequency, temperature, humidity, printer driver settings and version, application used, system requirements, interface, type of paper used, direct print settings, etc.). Print speeds listed below do not take into account data processing time on host computer and data transfer time.
- Print speeds are calculated by rounding off the actual measurement value to the nearest integer.

		Print Speed on Photo Paper (Required time for making a print)	
Print Pattern	 4"x6" borderless ISO/JIS-SCID N2	 8"x10" Image ISO/JIS-SCID N2	
Image Size	4" x 6"	8"x10"	
Measurement Method	Print speeds on photo paper are measured based upon making a single print under the above measurement conditions, starting from the beginning of paper feed using the automatic sheet feeder to the end of paper ejection.		
Media	Canon Photo Paper Plus Glossy PP-201		
Settings	Page Size	4"x6"	A4
	Media Type	Photo Paper Plus Glossy	Photo Paper Plus Glossy
	Print Quality	Standard (Default)	Standard (Default)
	Borderless	ON	OFF
Application	Adobe Photoshop CS2		
PC environment	OS: Microsoft Windows Vista CPU: Intel® Core™2 Duo 2.66GHz RAM: 1GB Interface: USB2.0 Hi-Speed
