

## imageWARE Enterprise Management Console

### ACCOUNTING MANAGEMENT PLUG-IN

Maintain complete oversight and control of activity on all network output devices

#### TRACK DOCUMENT USAGE AND CONTROL COSTS

In a business environment characterized by escalating expenses and the pressure to minimize them, it's surprising that the cost of utilizing Canon equipment isn't managed more aggressively. Most fortune 500 companies would find it hard to quantify the total spending associated with the use of basic equipment such as copiers, fax machines, and network printers. That is, until now.

#### INTRODUCING ACCOUNTING MANAGEMENT PLUG-IN

The Accounting Management Plug-in is a modular upgrade to the imageWARE Enterprise Management Console device management framework. This comprehensive, web-based software tracks, analyzes, and recovers costs associated with all networked output devices, including printers, fax machines, and copiers. With this one application, not only can IT administrators understand document output costs, they can also realize their ROIs.

#### BENEFITS OF USING ACCOUNTING MANAGEMENT PLUG-IN

##### Advantages of this Plug-in:

- Track document output costs.
- Offer charge-back capability with an accurate collection of billing data—on a per-project basis—for all your copies, prints, faxes, and scans.
- Enforce document-level print restriction, discouraging the use of higher-cost machines and increasing overall security.
- Quickly generate ROI reports.
- Provide simple and efficient billing-code management.
- Chart the optimal deployment of Canon equipment.

### Accounting Management Plug-in

## SIMPLE AND EFFICIENT BILLING CODE MANAGEMENT

The Accounting Management Plug-in provides an efficient cost-recovery solution to any organization looking to charge its clients for copies, prints, faxes, and scans for all your imageRUNNER or imageRUNNER ADVANCE systems enabled with MEAP technology. A simple-to-use MEAP application is included. When using this program, user authentication and billing codes can be entered from the device's touch-panel, providing simple organization to all jobs performed by the Canon imageRUNNER or imageRUNNER ADVANCE system. For optimal efficiency, users can also enter billing data from their workstations.

## KNOWLEDGE IS POWER

The Accounting Management Plug-in gives you a detailed snapshot of your organization's resources. With this application, users can control their costs through a number of advanced capabilities, including:

- **Track by Paper Type.** Analyze and manage cost by paper type and size.
- **Track by Individual, Group, or Department.** Determine how devices are being used.
- **Single- or Double-sided Output.** Account for single- and double-sided output and N-up print/copy output.
- **Device Paper Consumption and Device Usage Costs.** Account for pages output, sheets used, and costs incurred by each device.
- **Output Restriction.** Distinguish between color and black-and-white jobs and set usage limits based on the number of clicks or predetermined cost.
- **Automatic Reporting.** Schedule automatic reporting and receive reports via e-mail.
- **Advanced Analysis.** Export accounting and analysis reports as CSV files for advanced analysis using a bundled Microsoft® Excel macro.
- **Web-based Access.** Generate reports or any other administrative functions from anywhere on the network.
