

## imageWARE Enterprise Management Console

# USER MANAGEMENT PLUG-IN

## Developed to further improve efficient fleet management

The optional User Management Plug-in for imageWARE Enterprise Management Console provides the ability to leverage Active Directory from the Plug-in. This plug-in lets you import user information exported from a device as well as manage the data. You can also check and edit it on the User Information page.

The items that can be set for the user information with this plug-in differ according to the optional plug-ins added to imageWARE.

### Advantages of this Plug-in:

- **Department ID Management**  
Set department IDs to the user information registered in the plug-in.
- **Distributing Local User Information**  
The local user information managed with this plug-in can be distributed to a device.
- **Managing User Information with Tasks**  
This plug-in enables you to distribute department IDs and local user information using tasks.

### AVAILABLE MANAGEMENT OPERATIONS

- Flow of Operations
- Managing Domain Users
- Managing Local Users
- Configuring User Folder Settings
- Configuring Initial Role Settings
- Associating Devices and Users
- Confirming Whether User Information/Department IDs can be distributed to devices
- Distributing Local User information to Devices
