Instructions for downloading & upgrading the printer's software:

For Mac OSX:

- Click the "Download" icon to the right of the file named "**mfuu-mac-mg6200-1_0-ea7.dmg**" in the Firmware section of the Driver & Software page for the MG6220.
- The next screen provides details of the software updater file as well as the End User License Agreement. Scroll down to the bottom of the screen and click the "I Agree - Begin Download" button to transfer the file to your computer. If prompted, choose the option to "Save" the file. Please note the location that your browser places the file.
- From its download location, double-click the "**mfuu-mac-mg6200-1_0-ea7.dmg**" file. This will create a "Printer Update" folder in the same location that contains the "Manual.html" and the "Printer Update Utility."

For Windows:

- Click the "Download" icon to the right of the file named "**fuu_-win-mg6200-1_0-ea7.exe**" in the Firmware section of the Driver & Software page for the MG6220.
- The next screen provides details of the software updater file as well as the End User License Agreement. Scroll down to the bottom of the screen and click the "I Agree - Begin Download" button to transfer the file to your computer. If prompted, choose the option to "Save" the file. Please note the location that your browser places the file.
- From its download location, double-click the "**fuu_-win-mg6200-1_0-ea7.exe**" file. This will create a "Printer Update" folder in the same location that contains the "Manual.html" and the "Printer Update Utility."
