Network Requirements

Before installing the wireless drivers and software on the computer, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Software Installation:

If the printer is already connected to the network and the drivers and software have been installed on a computer, it can be used on additional computers on this same network. Just install the drivers, and software you wish to use, and you will be printing and scanning wirelessly. You don’t need to change any settings on the printer or connect a USB cable between the computer and printer.
Notes on Network Connection

- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.

- In an office setup, consult your network administrator.

- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

- Place the machine and computers on the same network segment.
Installing the Driver

To use the machine by connecting it to a computer, software including the drivers need to be copied (installed) to the computer’s hard disk. We recommend using the Setup CD-ROM for installation. If you do not have the CD-ROM or want to use drivers downloaded from our website, Click here for instructions.

**Step One**

Turn on the computer, then insert the Setup CD-ROM into the CD-ROM drive.

If the program does not start automatically, double-click the CD-ROM icon in Computer or My Computer.

When the CD-ROM contents appear, double-click MSETUP4.EXE.

**Step Two**

Ensure the printer is powered on.

On the opening screen select Next.
Step Three

Remove the check mark from the box beside the item you prefer not to install. Or, click Clear All to install just the MP Drivers. Then click Next to begin the installation.

Step Four

When installation is complete click Exit.
Downloading the Driver

To use the printer on additional computers, download and install the drivers to the computer's hard disk.

**Step One**

Go to the [Drivers & Software for your model](#)

**Step Two**

On the [Drivers & Software](#) page, select your computer’s operating system and OS version from the drop-down menus.
**Step Three**

In the **Drivers** section, click the link* for the **MP Driver** download file.

*Name varies by model

You can get a description of the file and its contents by clicking the plus sign (+) beside the file name to expand the view.

**Step Four**

On the next screen, read the information and instructions and click **I Agree - Begin Download**

Once the file has been downloaded, double-click it to begin the installation process

**IMPORTANT:**
- Quit all running applications before installation.
- Log on as the administrator (or a member of the Administrators group).
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees apply.
- It may be necessary to restart your computer during the installation process. Follow the on-screen instructions. The installation resumes once your computer has restarted.

If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.
Installing the Driver

**NOTE:** If a User Account Control screen appears, click Continue or Yes (depending on Windows version) to continue.

**NOTE:** If the same screen reappears in subsequent steps, click Continue or Yes.

**Step One**
Click **Next** on the **Welcome** screen.

**Step Two**
Select your place of residence and click **Next**.
**Step Three**

Click **Yes** for the License Agreement.

---

**Step Four**

On the **Connection method** screen select **Use the printer with wireless LAN connection**, then click **Next**.

If the **Please Allow All Install Wizard Processes** screen appears, click **Next**.

Installation starts. Follow any on-screen instructions to install the software.
**Step Five**

Ensure the printer is powered on. If it is not powered on, press the **ON** button so that its light is illuminated. Then click **OK**.

**Note:**

If the below window appears and the printer is connected to the same network as the computer, click **Redetect**.
Step Six

At Detected Printers List window, select the printer and then click Next.

Completion

You will now be able to print and scan wirelessly.

If you need scan software, download and install My Image Garden.

Continue on to the next page for instructions to download this software.
In order to take advantage of your machine’s scanning capabilities, you must have scanning software installed on your computer. Canon’s **My Image Garden** will not only allow you to print photos saved on your computer, but it will also scan images directly into it. The latest version of this software can be downloaded from our web site.

Follow the instructions below if you want to download the software from our web site.

**Step One**

Go to the **Drivers & Software for your model**

**Step Two**

On the **Drivers & Software** page, select your computer’s operating system and OS version from the drop-down menus.
Step Three

In the **Software** section, click the link for **My Image Garden** download file.
