Preparing to Connect My Multifunction To My Network

Network Requirements

Before installing the wireless drivers and software on the computer, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Software Installation:

If the printer is already connected to the network and the drivers and software have been installed on a computer, it can be used on additional computers on this same network. Just install the drivers, and software you wish to use, and you will be printing and scanning wirelessly. You don't need to change any settings on the printer or connect a USB cable between the computer and printer.

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.

Notes on Network Connection

- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.
- In an office setup, consult your network administrator.
- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.
- Place the machine and computers on the same network segment.

Installing the Drivers and Software

Installing the Driver

To use the machine by connecting it to a computer, software including the drivers need to be copied (installed) to the computer's hard disk. We recommend using the **Setup CD-ROM** for installation. If you do not have the CD-ROM or want to use drivers downloaded from our web site, <u>Click here for instructions</u>.

Step One

Turn on the computer, then insert the **Setup CD-ROM** into the CD-ROM drive.

If the program does not start automatically, doubleclick the CD-ROM icon in **Computer** or **My Computer**.

When the CD-ROM contents appear, double-click **MSETUP4.EXE**.

Step Two

Ensure the printer is powered on. On the opening screen select **Next**.
