Network Requirements  
Notes on Wireless Connection  
Installing the Drivers & Software
Important

If any of the following situations exist

• You have replaced your Router or Access Point
• You want to use a different wireless network
• Router settings have been changed.

Please complete the following steps to apply the new configuration settings to your multifunction.
Preparing to Connect the Multifunction To the Network

Network Requirements
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Wireless Connection
Before connecting the machine to the network, the computer needs to be connected to the network. Make sure that configuration of the computer and access point or router is complete.
Preparing to Connect the Multifunction To the Network

Notes on Network Connection

• The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.

• In an office setup, consult your network administrator

• If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

• Place the machine and computer on the same network segment.
Software Installation

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. Installation time varies depending on the computer environment or the number of application software to be installed.

**IMPORTANT**
- Log on as the administrator (or a member of the Administrators group).
- Quit all running applications before installation.
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees may apply. Consult the internet service provider.
- It may be necessary to restart your computer during the installation process. Follow the on-screen instructions and do not remove the Setup CD-ROM during restarting. The installation resumes once your computer has restarted.
- If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.
When you reinstall your printer on your network because of a router or network change, you follow the same procedure as for a first time install. A step-by-step walk through of the wireless setup is built into the installation routine of the software for your PIXMA.

To begin the setup procedure, insert the Setup CD-ROM into your computer.*

The setup program will start automatically. The setup instructions presented in this document describe the “Cableless Setup” method which does not require the need to know the SSID (network name), or network passphrase and does not require the printer to be temporarily connected to the computer with a USB cable.

*If you don’t have or cannot use the Setup CD-ROM, follow the steps below to start the setup.

- Download the software (click the link to download)
- Double-click the downloaded .exe file (Win-mg5500-1_0-ucd.exe)

If the User Account Control dialog box appears during the setup, click Yes or Continue.
Click **Start Setup Again** if the following screen appears.

* For Windows XP Users: The Cableless Setup is not supported in Windows XP. Use the “**Standard Setup**” method to re-install the MG5520 on your wireless network. [Click here for instructions.](#)
Installing the Drivers & Software

On the **Connection Method Selection** screen (1-1) select **Wireless Connection**.

Continue to follow on-screen instructions. Select **Connect to the network** when the **Printer Setup** (2-1) screen appears.
Installing the Drivers & Software

Continue to follow on-screen instructions. Press the HOME button on the printer then click Next.

Carefully follow the instruction to select the WLAN icon and Wireless LAN setup on the printer. Then, click Next on the Printer Setup (2-3) screen.

1. Use the ▲ or ▼ button (A) to display the WLAN icon.
2. Press the left Function button (B).
3. Select Wireless LAN setup, then press the OK button. The (blue) Wi-Fi lamp (C) lights up when wireless connection is enabled.
Installing the Drivers & Software

Continue to follow the on-screen instructions until the **Setup Procedure Selection** screen (3-1) appears. If your printer’s LCD screen is the same as that shown above **Push Button Method** on the **Setup Procedure Selection** screen (3-1), press the printer’s **Stop** button. Once your printer’s screen is the same as that shown above **Other Methods**, click **Other Methods**.
Select **Other setup** on **Setup Procedure Selection** screen (3-2) and then **Cableless setup** on **Setup Procedure Selection** screen (3-3).
Select **Other setup** on your printer and press the **OK** button. Click **Next** on the **Connection via Cableless setup** screen (4-1).

Select **Cableless setup** on your printer and press the **OK** button. Click **Next** on the **Connection via Cableless setup** screen (4-2).
Press the **OK** button on your printer. Click **Next** on the **Connection via Cableless setup** screen (4-3)

1. Press the **OK** button.
2. When the screen shown to the right appears, click "Next," then follow the instructions on the next screen to proceed with setup.
Installing the Drivers & Software

Continue following on-screen instructions. On the **Software Installation List**, select *software to install and click Next.*

*MP Drivers* is required and cannot be deselected. We recommend installing **My Image Garden** and **Quick Menu** to take full advantage of the printer’s features. It is not necessary to re-install these applications if they were installed previously.

---

**Software Installation List**

The selected software will be installed. Make sure that the software you want to install is selected, and then click [Next].

Estimated installation time: 10 to 15 minutes
Installing the Drivers & Software

Continue following on-screen instructions.

When the **Setup Completion** dialog box appears, click **Complete**.

![Setup Completion dialog box]

At this point, setup of the printer and network is complete. Continue to follow any remaining on-screen instructions to finish and exit the setup program.
