Preparing to Connect the Multifunction To the Network

**Network Requirements**
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

**Wireless Connection**
Before connecting the machine to the network, the computer needs to be connected to the network. Make sure that configuration of the computer and access point or router is complete.
Preparing to Connect the Multifunction To the Network

Notes on Network Connection

• The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.

• In an office setup, consult your network administrator

• If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

• Place the machine and computer on the same network segment.
Software Installation

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer’s hard disk. Installation time varies depending on the computer environment or the number of application software to be installed.

**IMPORTANT**

• Log on as the administrator (or a member of the Administrators group).

• Quit all running applications before installation.

• Do not switch users during the installation process.

• Internet connection may be required during the installation. Connection fees may apply. Consult the internet service provider.

• It may be necessary to restart your computer during the installation process. Follow the on-screen instructions and do not remove the Setup CD-ROM during restarting. The installation resumes once your computer has restarted.

• If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.
To set up the PIXMA MX472 to your wireless network, you must first install the software to your computer.

To begin the setup procedure, insert the Setup CD-ROM into your computer.*

*If you don’t have or cannot use the Setup CD-ROM, follow the steps below to start the setup.

- Download the software (click the link to download)
- Double-click the downloaded .exe file (Win-MX470-1_0-ucd.exe)

If the User Account Control dialog box appears during the setup, click Yes or Continue.
Installing the Drivers & Software

Click **Next** on the initial screen
Installing the Drivers & Software

- Connecting to the wireless network

On the **Connection Method Selection** screen (1-1) select **Wireless Connection**.

Continue to follow on-screen instructions. Select **Connect to the network** when the **Printer Setup** (2-1) screen appears.
Installing the Drivers & Software  
- Connecting to the wireless network

Continue to follow on-screen instructions. Press the **Setup** button on the printer then click **Next** on the **Printer Setup** (2-2) screen.

Carefully follow the instruction to select **Wireless LAN setup** on the printer. Press the **OK** button on the printer. Then, click **Next** on the **Printer Setup** (2-3) screen.
Installing the Drivers & Software
- Connecting to the wireless network

Continue to follow the on-screen instructions until the **Setup Procedure Selection** screen (3-1) appears. If your printer’s LCD screen is the same as that shown above **Push Button Method** on the **Setup Procedure Selection** screen (3-1), press the printer’s **Stop** button. Once your printer’s screen is the same as that shown above **Other Methods**, click **Other Methods** on the **Setup Procedure Selection** screen (3-1).
Installing the Drivers & Software
- Connecting to the wireless network

Select Other setup on Setup Procedure Selection screen (3-2).
Installing the Drivers & Software
- Connecting to the wireless network

Select **Wireless setup Using the USB Cable** on the **Setup Procedure Selection (3-3)** screen. Please note that instructions to connect the computer and printer will appear later in the setup, once the software installation has completed.
Installing the Drivers & Software

Continue following on-screen instructions. On the **Software Installation List**, select *software to install and click Next.*

*MP Drivers* is required and cannot be deselected. We recommend installing **My Image Garden** and **Quick Menu** to take full advantage of the printer’s features.
Continue following on-screen instructions.

When the **Check Printer Settings** dialog box appears, check the **Set up the network connection via USB** checkbox. Then click **Next**.

At this point, setup of the printer and network is complete. Continue to follow any remaining on-screen instructions to finish and exit the setup program.
Installing the Drivers & Software
- Connecting to the wireless network

Connect the printer and computer using a USB cable. The screen shown below will close automatically once the printer has been detected.

Follow this procedure.

1. Connect the printer and the computer using the USB cable.

2. Please wait for a while until the printer is detected.

Detection may take some time. When detection is completed, this window closes automatically.
Installing the Drivers & Software
- Connecting to the wireless network

If the *Detected Access Points List appears, select the Access Point to connect to, enter the Network Key and click Connect.

If the Confirm Connection Access Point dialog appears, verify the correct Access Point (router or Network name) is listed and click Yes.

*Generally, this list is only seen if there are multiple access points (routers) in the area and the computer is not currently connected.
Disconnect the USB cable and click **Next**.
Installing the Drivers & Software

- Completing Setup

Continue following on-screen instructions.

When the **Setup Completion** dialog box appears, click **Complete**.

![Setup Completion Dialog Box](image)

At this point, setup of the printer and network is complete. Continue to follow any remaining on-screen instructions to finish and exit the setup program.
