Notes on Network Connection

- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device’s instruction manual or contact its manufacturer.

- In an office setup, consult your network administrator.

- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

- If an error message appears or if you have trouble with the network connection, refer to the printed manual: Network Setup Troubleshooting.

- Place the machine and computer on the same network segment.

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.

A wireless Access Point or Router is required to use your printer on a wireless LAN.

Software Installation

If the machine is already connected to a wireless connection, it can be used from additional computers on the same network. Connection to the network is confirmed automatically. Only the software needs to be installed. It is not necessary to make any changes or settings on the printer itself.

**IMPORTANT**
- Log on as the administrator (or a member of the Administrators group).
- Quit all running applications before installation.
- If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.

A step-by-step walk through of the wireless setup is built in to the installation routine of the software that shipped with your PIXMA.

**Insert the Setup CD-ROM** that came with your printer into your CD-ROM drive of each computer you wish to use with the printer and proceed through the easy to follow instructions

*Note: If you don’t have or cannot use the Setup CD-ROM, you can still install the software on the computer by using a file downloaded from our web site. [Click here for information](#)
Installing the PIXMA MG5320 on Additional Computers

Follow any preliminary on-screen instructions. When the following screen appears, click Next.

PIXMA MG5300 series

You can select whether to use this printer via USB connection or LAN connection. Follow the on-screen instructions to select the connection method.

Network setup is required when using the printer via LAN connection. If the setup is already completed, the connection is confirmed automatically. If the setup is not completed, follow the on-screen instructions to set up the printer.
Network connection is automatically confirmed. Continue to follow any remaining On-screen instructions to install the software. On the Software Installation List screen, select any software to be installed. **MP Drivers** is required for the printer to be able to print and scan and cannot be de-selected. **MP Navigator EX** and **Easy-PhotoPrint EX** are highly recommended to take full advantage of your printer’s features.

*Note:* If you are using the downloaded Mini Master Setup file, only the **MP Drivers** will be installed.

You can download the additional software applications from the Software section of the Drivers & Software page where you obtained the Mini Master setup file.
Continue to follow on-screen instructions. Click **Complete** on the **Setup Completion** window.

Follow any remaining on-screen instructions to finish and exit the setup program.
