Connecting to a printer and printing via Wi-Fi (PowerShot SX60 HS / PowerShot G7 X)
You can connect your camera to a printer and print using Wi-Fi.

When establishing a wireless connection with a printer, you can either use the camera as an access point (Camera Access Point Mode) or use another access point.

IMPORTANT

- This camera requires a PrintBridge-compatible printer (supporting DPS over IP) for printing via Wi-Fi.
- The position and shape of the operation buttons, screens displayed, and setting items may differ according to the model you use.

NOTE

- Connections require that a memory card with saved images be in the camera.
- Follow these instructions when using the camera as an access point.

To connect using another access point, please refer to Sending images to a computer (Wi-Fi function).

Connecting your camera and printer via Wi-Fi

Register the printer you want to connect to using Wi-Fi.

1. Press the <Playback> ( ) button to turn the camera on.

2. Press the [ ] button.
NOTE

When making Wi-Fi settings for the first time, a screen will appear for you to register a nickname for the camera.

This nickname will be displayed on the screen of target devices when connecting to other devices via Wi-Fi.

![Image of Change Device Nickname screen]

- Press the <FUNC./SET> button to access the keyboard, and use it to enter a nickname for the camera.

3. Press the <△><▼><◄><►> buttons, to choose [ ], and then press the <FUNC./SET> button.

4. Press the <▲><▼> buttons to choose [Add a Device], and then press the <FUNC./SET> (■) button.

NOTE

- Once a printer is added, the printer name will be displayed on the screen in step 4. To connect to a printer again, simply choose the printer name from the list.
- Once you have connected to devices via the Wi-Fi menu, recent destinations will be listed first when you access the Wi-Fi menu. You can easily connect again by pressing the <▲><▼> buttons to choose the device and then pressing the <◄> button. To add a new device, display the device selection screen by pressing the <◄><►> buttons, and then configure the setting. If you prefer not to display recent target devices, choose MENU > [Wi-Fi] tab > [Wi-Fi Settings] > [Target History] > [Off].

5. Choose the displayed SSID (network name) from the printer's Wi-Fi setting menu.
6. Once the printer is ready for the connection, the printer’s name will be displayed on the camera. Press the <FUNC./SET> ( ) button.

- The printer is added and the printing screen appears.
