Canon

Getting Your Printer
Back On Your Network
After A Router Or Network Change

PIXMA iP7220

Windows and Mac OS

If any of the following situations exist

• You have replaced your Router or Access Point

• You want to use a different wireless network

• Router settings have been changed.

Please complete the following steps to apply the new configuration settings to your printer.
Network Requirements

Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Wireless Connection

Before connecting the machine to the network, the computer needs to be connected to the network. Make sure that configuration of the computer and access point or router is complete.

Connecting to the Network

Connect the PIXMA iP7220 to Your Wireless Network

To re-establish communication on the network after changing the router / Access Point or when connecting to a different network, the settings on the printer need to be changed

Simply insert the Setup CD-ROM that came with your printer into your CD-ROM drive and proceed through the easy to follow instructions On the following screen, select the Start Setup Again option
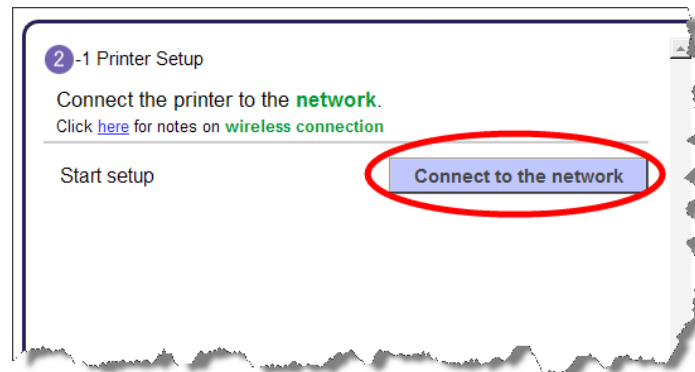

Connecting to the Network

On the Connection Method Selection screen, be sure to select **Wireless Connection.**
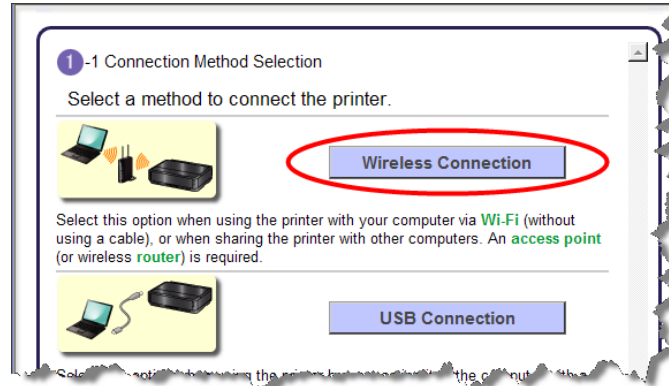

When the Preparation for Connection screen appears, make sure the printer is turned on, then click **Next.**

When the Printer Setup screen appears, click **Connect to the Network**. You will be setting up the printer the same way as a first-time setup.

Select **Wireless Setup Using the USB Cable**. This brings up the 'Software Installation List' screen. Since you will have already installed the desired software during your first installation, it will not be necessary to re-install all the software. Click the **Clear All** button. This will leave just the 'IJ Printer Driver' checked.   Click **Next** and continue through the installation process following the on-screen prompts.

3-1 Setup Procedure Selection

Check the following and select the most suitable connection method.

Wireless Setup Using the Supplied **USB** Cable Temporarily   Wireless Setup Using the USB Cable

After software installation, the procedure to connect your computer with the printer appears. Click "Wireless Setup Using the USB Cable," then wait until the next screen appears.

Connect to **WPS (Wi-Fi Protected Setup)**-compatible **Access Point**   WPS

Connecting to the Network

If you can't find your CD-ROM, you may download the iP7220 series Mini Master Setup, which includes the same step-by-step installation as the CD-ROM, by following the instructions below:

1. [Click here to access the iP7220 Drivers & Software page.](#)
2. Select the operating system and version of your computer (see example below).
3. Expand the 'Drivers' section, if necessary, by clicking the red triangle.
4. Click on 'iP7200 series Mini Master Setup…' .
5. After reading the details and disclaimer, click 'I Agree – Begin Download' and save the file to your computer.
6. Once the download is complete, double-click the file from its download location to begin the installation.

Drivers & Software

Select an Operating System and OS Version from the drop down menu below then click on a category to view the latest supported files for your product. Click on the file description to navigate to download, then click on "I Agree - Begin Download" to start downloading.
