Network Requirements
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Notes on Network Connection
• The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device’s instruction manual or contact its manufacturer.

• The machine cannot be used over a wireless and wired connection at the same time.

Wireless Connection
Connect to your network environment over a wireless connection.
Preparing to Connect My Multifunction To My Network

Be sure to prepare an access point.

Important Information You Need Before Adding Your Multifunction
The following information is required to connect to your access point or router.

• **Access Point Name/Network Name:**
Also referred to as **SSID**. A name to identify the specific access point.

• **Network Key:**
Also referred to as encryption key, WEP key or WPA/WPA2 passphrase, Pre-Shared key.
A password required to set to prevent unauthorized access to communication.
Check your access point or router for the following information, and then write it down.

**NOTE:** For details on how to check the following information, refer to the manual of your access point or router, or contact its manufacturer.
Downloading the Driver

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. The installation process takes about 20 minutes. (The installation time varies depending on the computer environment or the number of applications to be installed.)

**Step One**

Go to the Drivers & Software for your model

**Step Two**

Select your operating system in the Select OS dropdown menu.
Step Three

In the Drivers section, click Download icon for the MP Driver.
Step Four

On the next screen, read the information and instructions and click I Agree - Begin Download
Once the file has been downloaded, double-click it to begin the installation process

IMPORTANT:
• Quit all running applications before installation.
• Log on as the administrator (or a member of the Administrators group).
• Do not switch users during the installation process.
• Internet connection may be required during the installation. Connection fees apply.
• It may be necessary to restart your computer during the installation process. Follow the on-screen instructions. The installation resumes once your computer has restarted.

If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.
Installing the Driver

NOTE: If a User Account Control screen appears, click Continue or Yes (depending on Windows version) to continue. 
NOTE: If the same screen reappears in subsequent steps, click Continue or Yes.

**Step One**

Click Next on the Welcome screen.

**Step Two**

Select your place of residence and click Next.
Step Three
Click Yes for the License Agreement.

Step Four
After searching for printers, the Detected Printers List appears. Verify your printer is detected and click Next.

If the Please Allow All Install Wizard Processes screen appears, click Next.

Installation starts. Follow any on-screen instructions to install the software.
**Step Five**

Turn on the printer then click **OK**.

**Step Six**

Click **Next** on the **Set Up New Printer** window.
Step Seven

If the Confirm Connection Access Point screen appears, make sure that the target access point is displayed, then click Yes.
**Step Eight**

If the **Detected Access Points List** screen appears, select the target access point name/network name (SSID), enter the network key and click **Connect**.

If the **Confirm Connection Access Point** screen appears, make sure that the target access point is displayed, then click **Yes**.
**Step Nine**

Remove the Wireless LAN setup cable, then click **Next**.

**Step Ten**

Click **Complete** on the **Setup Completion** screen.

Wireless setup is now complete
