

# Setting up the Wireless Connection Using a Mac Computer

PIXMA MX350 / MX870

## Set Up the MX350 / MX870 Printer for use on a Wireless Network Using a Mac computer

To use the MX350 or MX870 printer wirelessly with a computer, the printer must be connected to the Wireless LAN and software including the drivers needs to be copied (installed) to the computer's hard disk.

Instructions are the same for both models (MX350 / MX870) and apply equally for first-time installations, adding the printer to additional computers in the wireless network and for re-installations after making a Router or Network change.

Steps to complete the setup are available in the KnowledgeBase Article "Setup the MX350 / MX870 for use over a Wireless LAN - Mac OSX" Click the link below to access the article.
