Network Requirements
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Notes on Network Connection
- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device’s instruction manual or contact its manufacturer.

- The machine cannot be used over a wireless and wired connection at the same time.

Wireless Connection
Connect to your network environment over a wireless connection.
Be sure to prepare an access point.

**Important Information You Need Before Adding Your Multifunction**

The following information is required to connect to your access point or router.

- **Access Point Name/Network Name:**
  Also referred to as SSID. A name to identify the specific access point.

- **Network Key:**
  Also referred to as encryption key, WEP key or WPA/WPA2 passphrase, Pre-Shared key.

A password required to set to prevent unauthorized access to communication.

Check your access point or router for the following information, and then write it down.

**NOTE:** For details on how to check the following information, refer to the manual of your access point or router, or contact its manufacturer.
Installing the Drivers & Software

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. The installation process takes about 20 minutes. (The installation time varies depending on the computer environment or the number of applications to be installed.)

**Step One**

Turn on the computer, then insert the **Setup CDROM** into the CD-ROM drive.

**Step Two**

Double-click the **Setup** icon of the CD-ROM folder to proceed to the following screen.

If the CD-ROM folder does not open automatically, double-click the CD-ROM icon on the desktop.
**Step Three**

Enter your administrator name and password. Click **OK**.

If you do not know your administrator name or password, click Help (❓), then follow the on-screen instructions.

**Step Four**

Click **Easy Install**. Click **Install**. The drivers, application software, and on-screen manuals are installed all together.
Installing the Drivers & Software

**Step Five**

Click **Install**

*Applications may vary by model*

**Step Six**

Select **Use the printer with wireless LAN connection**, then click **Next**.

Follow any on-screen instructions to proceed with the software installation.
Installing the Drivers & Software

**Step Seven**
Read the License Agreement screen carefully and click Yes.

**Step Eight**
When the Create an Alias on Desktop screen appears, select Agree if you want an alias of the On-Screen manual to be placed on the desktop, otherwise select Do not Agree, then click Next.
Step Nine

Select Agree or Do not Agree on the Add Easy-WebPrint EX to the Dock screen, then click Next

Step Ten

Click Skip or Next on the Download Easy-webPrint screen
**Step Eleven**

When the **Printer Detection** screen appears, click **Next**.

**Step Twelve**

Make sure the machine is turned on, then click **OK**.
Installing the Drivers & Software

Step Thirteen

When the Set Up New Printer screen appears, click Next.

If the Detected Printers List screen appears, click Set Up New Printer.
**Step Fourteen**

When the **Connect Cable** screen appears, connect the machine to the computer with the Wireless LAN setup cable. Follow the on-screen instructions and click **Next**.

Follow this procedure.
1. Connect the printer and the computer using the wireless LAN setup cable.

2. Click [Next], and then wait until the printer is detected.

Printer detection may take some time. If the printer has not been detected, check that the printer is on and that the cable is connected, and then click [Next] again.

**Step Fifteen**

When the **Confirm Connection Access Point** screen appears click **Next**.

- **Confirm Connection Access Point**

Printer's network connection will be set up by connecting to the following access point. Do you want to continue?

- **Access Point:**
  - **AccessPointName**

  Clicking [Yes] will let this software obtain access point information saved in your keychain. If the ‘Confirm Access to Keychain’ dialog appears, click [Allow].

  If you want to select the connection access point manually, click [No].

If a screen asking for permission to access the **keychain** appears, click **Allow** or **Allow Once**.
Step Fifteen, Continued
If the Detected Access Points List screen appears.

1. Select the target access point name/network name (SSID).
2. Enter the network key.
   Enter upper and lower case letters of the alphabet correctly.
   Letters are case sensitive.
   To use WEP key number 2, 3 or 4, click WEP Key Number,
   then specify the WEP key number.
3. Click Connect.

Step Sixteen
When the Disconnect Cable screen appears, disconnect the network setup cable. Click Next.

Disconnect the network setup cable that was connected to the printer.

After disconnecting the cable, click [Next].
.Installing the Drivers & Software

**Step Seventeen**

When the **Setup Completion** screen appears, click **Complete** or **OK**.

Registering the Printer & Scanner

This section describes how to register the machine on a Macintosh computer.

**Step One**

When the **Register Printer and Scanner** screen appears, click **Register Printer**.

Proceed to the section that relates to your operating system for further installation instructions

Mac OS X v. 10.5.x / 10.6.x: Go to Step 2-A

Mac OS X v. 10.4.11: Go to Step 2-B
**Step Two**

2-A

1. Select **Canon MXxxx series** in the list of printers, then click **Add**. *xxx* refers to the model number. **MX410 series** shown in example, below

2. Go to Step Three, page 19.

*The alphanumeric characters after Canon xxxx series is the machine's Bonjour service name or MAC address*

---

**Step Two**

2-B (OS X v. 10.4.11)

1. When the **Printer List** window appears, click **Add**.
Registering the Printer & Scanner

**Step Two**

2-B

2. Click **More Printers** in the **Printer Browser** window.

3. Select **Canon IJ Network** in the pop-up menu, select **Canon MXxxx series** in the list of printers, then click **Add**. *xxx* refers to the model number. **MX410 series** shown in example, below.
Registering the Printer & Scanner

Step Two
2-B

4. Make sure that the **Canon MXxxx series** is added to the list of printers.

*xxx refers to the model number. MX410 series shown in above example.

Step Three

When the **Register Printer and Scanner** screen appears, click **Register Scanner**.
Registering the Printer & Scanner

**Step Four**

Select **Canon MX410 series** on the **Canon IJ Network Scanner Selector EX** screen, then click **OK**

![Canon IJ Network Scanner Selector EX](image)

**Step Five**

Click **Next** on the **Register Printer and Scanner** screen.

![Register Printer and Scanner](image)
Registering the Printer & Scanner

**Step Six**

Click **Next** on the **Print Head Alignment Recommended** screen.

**Step Seven**

Click **Next** on the **Register Printer and Scanner** screen.
Step Eight

If the **User Registration** screen appears, read the information and click **Next or Cancel**.

If the **Extended Survey Program** screen appears: If you can agree to Extended Survey Program, click **Agree**. If you click **Do not agree**, the Extended Survey Program will not be installed. (This has no effect on the machine’s functionality.).
Registering the Printer & Scanner

Step Nine

Click Exit. Setup is complete

*It is necessary to restart the computer before scanning using the Operation Panel on the machine for the first time.
