Network Requirements
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Notes on Network Connection
- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device’s instruction manual or contact its manufacturer.

- The machine cannot be used over a wireless and wired connection at the same time.

Wireless Connection
Connect to your network environment over a wireless connection.
Preparing to Connect My Multifunction To My Network

Be sure to prepare an access point.

**Important Information You Need Before Adding Your Multifunction**

The following information is required to connect to your access point or router.

- **Access Point Name/Network Name:**
  Also referred to as **SSID**. A name to identify the specific access point.

- **Network Key:**
  Also referred to as encryption key, WEP key or WPA/WPA2 passphrase, Pre-Shared key.
  A password required to set to prevent unauthorized access to communication.

Check your access point or router for the following information, and then write it down.

**NOTE:** For details on how to check the following information, refer to the manual of your access point or router, or contact its manufacturer.
Installing the Driver

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. The installation process takes about 20 minutes. (The installation time varies depending on the computer environment or the number of applications to be installed.) We recommend using the Setup CD-ROM for installation. If you do not have the CD-ROM or want to use drivers downloaded from our website, Click here for instructions.

**Step One**

Insert the Setup CD-ROM into your computer’s CD-ROM drive

**Step Two**

On the opening screen select Easy Install
Step Three

On the next screen click **Install**

Step Four

Select **Use the printer with wireless LAN connection**, then click **Next**.
Step Five

Click Yes for the License Agreement

Step Six

Click Yes or No for the License Agreement Adobe RGB
Installing the Drivers and Software

**Step Seven**

Click Next if the Please Allow All Install Wizard Processes appears.

**Please Allow All Install Wizard Processes**

Firewall or anti-virus software may show alert dialogs during the installation of Canon products. Please allow the installation to proceed by selecting an option in the dialog such as:

- Permit
- Allow
- Yes
- Unblock

**Step Eight**

Click Next on the Printer Detection screen.

**Printer Detection**

Start searching for the printer on the network. Click [Next]. Click [Cancel] to cancel the installation.
**Step Nine**

Turn on the printer and click **OK**

**Step Ten**

Click **Next** on the **Set Up New Printer** Window
Installing the Drivers and Software

**Step Eleven**
Connect the printer and computer using the network setup cable. The window closes automatically when detection is completed.

**Step Twelve**
If the **Detected Access Points List** appears, select the access point (SSID) you will be using, enter the network key and click **Connect**.
Step Twelve, continued
If the Confirm Connection Access Point screen appears, click Yes.

Step Thirteen
Disconnect the network setup cable then click Next.
Step Fourteen
Click Complete or OK on the Setup Completion screen. Your device and software have now been set up. Please follow any remaining On-screen instructions to finish and exit.
Downloading and Installing the Drivers

Downloading the Driver

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. The installation process takes about 20 minutes. (The installation time varies depending on the computer environment or the number of applications to be installed.)

**Step One**

Go to the Drivers & Software for your model

**Step Two**

Select your operating system in the **Select OS** dropdown menu.
Step Three

In the Drivers section, click the link* (the “.exe” file) for the MP Driver.  
*Name varies by model

* The file name turns red when the mouse pointer is on the file name.
Step Four

On the next screen, read the information and instructions and click **I Agree - Begin Download**.
Once the file has been downloaded, double-click it to begin the installation process.

**IMPORTANT:**

- Quit all running applications before installation.
- Log on as the administrator (or a member of the Administrators group).
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees apply.
- It may be necessary to restart your computer during the installation process. Follow the on-screen instructions. The installation resumes once your computer has restarted.

If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.
Installing the Driver

NOTE: If a User Account Control screen appears, click Continue or Yes (depending on Windows version) to continue. NOTE: If the same screen reappears in subsequent steps, click Continue or Yes.

**Step One**

Click Next on the Welcome screen.

**Step Two**

Select your place of residence and click Next.
Step Three

Click Yes for the License Agreement.

Step Four

On the Connection method screen select Use the printer with wireless LAN connection, then click Next.

If the Please Allow All Install Wizard Processes screen appears, click Next.

Installation starts. Follow any on-screen instructions to install the software.
**Step Five**

Turn on the printer then click **OK**.

**Step Six**

Click **Next** on the **Set Up New Printer** window.
**Step Seven**

Connect the printer and computer using the network setup cable (USB cable). The USB port is located near the center on the back of the machine.
Step Eight

If the **Detected Access Points List** screen appears, select the target access point name/network name (SSID), enter the network key and click **Connect**.

If the **Confirm Connection Access Point** screen appears, make sure that the target access point is displayed, then click **Yes**.
**Step Nine**

Remove the network setup cable (USB cable), then click **Next**.

**Step Ten**

Click **Complete** on the **Setup Completion** screen.
In order to take advantage of your machine’s scanning capabilities, you must have scanning software installed on your computer. **MP Navigator EX** is a software application which makes it easy to import your scanned images into an application software directly, to print them, attach to an E-mail or to save them to your computer. The latest version of this software can be downloaded from our website. The software can also be installed using the Setup CD-ROM. After inserting the CD, select **Custom Install** on the opening screen, then select **MP Navigator EX** and any other software you want to install, then click **Next**. Follow the instructions that appear on your computer screen.

Follow the instructions, below, if you want to obtain the software from our website.

**Step One**

Go to the **Drivers & Software for your model**

**Step Two**

Select your operating system in the **Select OS** dropdown menu.
**Step Three**

Select the MP Navigator EX download file in the **Software** section

<table>
<thead>
<tr>
<th>Software</th>
<th>Date Posted</th>
</tr>
</thead>
<tbody>
<tr>
<td>mpnx 4 1-win-mx410-4 1 0-eis.exe</td>
<td>12/27/2010</td>
</tr>
</tbody>
</table>

**Step Four**

On the next screen, read the information and instructions and click **I Agree - Begin Download**

Once the file has been downloaded, double-click it to begin the installation process

**IMPORTANT:**
- Quit all running applications before installation.
- Log on as the administrator (or a member of the Administrators group).
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees apply.
- It may be necessary to restart your computer during the installation process. Follow the on-screen instructions. The installation resumes once your computer has restarted.

If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.
Step Five

Follow any instructions that appear on the screen
