Adding Your Multifunction to the Network 5
Network Requirements
Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Notes on Network Connection
• The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device’s instruction manual or contact its manufacturer.

• The machine cannot be used over a wireless and wired connection at the same time.

Wireless Connection
Connect to your network environment over a wireless connection.
Preparing to Connect My Multifunction To My Network

Be sure to prepare an access point.

**Important Information You Need Before Adding Your Multifunction**

The following information is required to connect to your access point or router.

- **Access Point Name/Network Name:**
  Also referred to as **SSID**. A name to identify the specific access point.

- **Network Key:**
  Also referred to as encryption key, WEP key or WPA/WPA2 passphrase, Pre-Shared key.
  A password required to set to prevent unauthorized access to communication.

Check your access point or router for the following information, and then write it down.

**NOTE:** For details on how to check the following information, refer to the manual of your access point or router, or contact its manufacturer.

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.
Adding Your Multifunction to Your Network

**Step One**
Press the **Setup** button (A)

**Step Two**
Select **Wireless LAN setup**, and then press the **OK** button.
Adding Your Multifunction to Your Network

**Step Three**

Select **Yes**, then press the **OK** button.

When wireless connection is enabled, the Wi-Fi lamp (D) lights blue.

**Step Four**

Select **Easy setup**, and then press the **OK** button.
Step Five

Select the access point name, then press the OK button.

NOTE: If you are living in an apartment, nearby access points in use may be detected.

Step Six

When one of the following screens is displayed, enter the network key using the Numeric buttons (E), then press the OK button. If the following screen is not displayed, go to step 8.

Press the button to switch character entry modes. Network key entry is case-sensitive. Be sure to enter upper and lower case letters of the alphabet correctly.
Adding Your Multifunction to Your Network

**Step Seven**

Make sure that the network key is correct, and then press the **OK** button.

**Step Eight**

When the connected to the access point screen appears, press the **OK** button.

The **Setup menu** screen returns.

**NOTE**: If **Failed to connect to the access point** appears, press the **OK** button, make sure that the network key is correct, then enter it again. If a connection still cannot be established, refer to the printed manual: **Network Setup Troubleshooting**.
**Step One**

insert the **Setup CD-ROM** into the CD-ROM drive. If the program does not start automatically, double-click the CD-ROM icon in **Computer or My Computer**, then double-click **MSETUP4.EXE**.

For **Windows 7/Windows Vista**: Click **Run Msetup4.exe** on the AutoPlay screen, then click Yes or Continue on the User Account Control dialog box. If the User Account Control dialog box reappears in following steps, click Yes or Continue.

**Step Two**

Click **Easy Install**.
The drivers, application software, and on-screen manuals are installed.
Step Three

On the next screen click **Install**

Step Four
